CONTENTS

OF THE

REGISTRAR GENERAL'S ANNUAL REPORT FOR 1874.

REPORT:— PAGES

General Review of Facts for the Year . . . . . v–vii

Emigration from the United Kingdom . . . . . vii–viii

Increase of Population and Influence of Emigration thereon . viii

Meteorology at Greenwich; Prices of Wheat, Meat and Potatoes; and Pauperism . . . . . viii–ix

Marriages. Number celebrated according and *not* according to the Rites of the Established Church; Conditions of Persons married; Ages of Persons married; Marriages of Minors; Signatures of Marriage Registers; Educational condition of different Counties, as shown by the Signatures of Marriage Registers; Buildings registered for the Solemnization of Marriages; Certified Places of Worship; Designations of Religious Bodies . . . . . x–xiv

Births. Number registered; Birth-rate; Sex; Children born *in* and *out of* Wedlock . . . . . xiv–xv

Deaths. Number registered; Death-rate; Sex; Age; Mortality of Males and Females at various Ages; Seasons; Locality; Death-rate of Children under Five Years of Age, and under One Year of Age; Deaths in Public Institutions . . . . . xv–xxiv

Progress of Registration. Aggregate Number of Names on the Registers, Particulars as to the Alphabetical Index to the Names, and Number of Searches in the Registers and of Certificates granted at the Central Office . . . . . xxiv–xxv

United Kingdom. Population, Emigration, Marriage, Birth, and Death Rates xxv

The Army. Strength and Mortality of the Army at Home and Abroad . . . . . xxv–xxvi

The Navy. Strength and Mortality of the Navy xxvi

Births and Deaths of British Subjects at Sea; Marine Register Book; Mortality by Drowning in the Merchant Service compared with that in the Royal Navy . . . . . xxvii–xxviii

Wills. Calendars of Grants of Probate and Administration kept at the General Register Office; Numbers and Values of Probates and Administrations xxviii

European States. Marriage, Birth, and Death Rates; and Density and Proximity of Population . . . . . xxviii–xxxi

Meteorology; Remarks by James Glaisher, Esq., F.R.S. . . xxxii–xxxiv

Preliminary Tables . . . . . xxxv–xcviii

ABSTRACTS:—

Marriages Registered in England in each of the Registration Divisions and Counties, and Districts; distinguishing those according and those *not* according to the Rites of the Established Church; in each quarter of the year; and distinguishing also Persons married according to their conjugal Condition, Minority, and Signature of the Register by marks 2–25

Ages of Persons married, distinguishing those of Bachelors, Spinsters, Widowers, Widows 26–28

Marriages, Births, and Deaths Registered, and Excess of Births over Deaths, in each of the Divisions, Counties, and Districts; also Births and Deaths and Excess of Births over Deaths in each of the Sub-districts of England; distinguishing the Sexes and Illegitimate Births throughout 30–84

ABSTRACTS—*continued.* PAGES

Births Registered in the Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters 86–89

Births of Children born out of Wedlock Registered in the Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters 90–93

Deaths Registered in Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters 94–97

Deaths of Males and Females in Public Institutions 99–118

Deaths of Males and Females at different Ages Registered in Divisions, Counties, and Districts 120–141

Causes of Death of Males and Females in England at different Periods of Life 144–149

Supplementary Table of Causes of Death of Males and Females in England at different Periods of Life 150–153

Causes of Death of Males and Females in London at different Periods of Life 154–159

Causes of Death of Males and Females in England, and in each of the Divisions and Counties 160–183

Deaths from several Zymotic and other Causes, and Inquest Cases, in the Divisions, Counties, and Districts of England . 184–195

Violent Deaths in England, distinguishing Sex and Age . . . 196–201

Violent Deaths in each of the Eleven Divisions of England, distinguishing Sex 202–206

Deaths returned as having occurred from Suicide in England, distinguishing Sex and Age 207–208

Deaths returned as having occurred from Suicide in each of the Eleven Divisions of England, distinguishing Sex 209–210

Deaths returned as having occurred from Murder and Infanticide in England, distinguishing Sex and Age 211–212

Deaths returned as having occurred from Murder and Infanticide in each of the Eleven Divisions of England, distinguishing Sex . . 213

Deaths returned as having occurred from Manslaughter in England, distinguishing Sex and Age 214–215

Deaths returned as having occurred from Manslaughter in each of the Eleven Divisions of England, distinguishing Sex 216

APPENDIX.

LETTER TO THE REGISTRAR-GENERAL ON THE CAUSES OF DEATH IN ENGLAND, by WILLIAM FARR, Esq., M.D., F.R.S.:—

Causes of Death:—

(1) *Zymotic Diseases* 219–221

(2) *Constitutional Diseases* 221

(3) *Local Diseases* 222

(4) *Developmental Diseases* 222

(5) *Violence* 222–224

Tables 225–258

Index of Districts, Sub-districts, and of certain Towns, referring to Numbers used in the several Tables of Abstracts 259–273

Alphabetical Index to Report, Tables, and Appendix . . . 274–288

REPORT

TO

The Right Honourable George Sclater-Booth, M.P., President of the Local Government Board, &c. &c.

General Register Office, Somerset House,
31st July 1876.

(1874.)

Sir,

I have the honour to submit to you my Thirty-seventh Annual Report on the Registration of Births, Deaths, and Marriages in England.

This is the last year that registration has been carried on under the old Acts, and the results admit of strict comparison; my next Report will enable me to discuss the effect of the changes under the new measure, which you introduced in 1874 on the part of the Government, and which received Her Majesty's sanction.

Births, deaths, and marriages are so important,—connecting as they do, successive generations, and reflecting vividly the happiness or misery of families,—that they demand every year attention. It is not with these events a mere question of money, or of fluctuations of prosperity that come and go, but of life.

I have continued the publication of my Weekly and Quarterly Returns, which have proved of much use for administrative as well as scientific purposes. The weekly table appears on every Wednesday, and gives an ample analysis of the births and deaths and causes of death in the Metropolis during the previous week. I have added to it weekly returns for the Outer Ring of London, and for all the great cities of the United Kingdom.

The facts in the Quarterly Return are compiled rapidly by the Registrars, from their register books, and I am thus able to publish the number of births and deaths in each of the 2193 sub-districts of England and Wales within a month of the end of every quarter of the year.

The returns of marriages being made in part by the clergy of the Established Church, and not by my own officers, do not reach this office in time to enable me to do more than publish the number of weddings in the second quarter following their occurrence.

The weekly Table of Mortality is an old London institution, improved, I hope, if not perfected; and now its utility is very much increased by its

including corresponding returns from Calcutta, Bombay, and Madras, in our Indian Empire; from Paris, Brussels, Amsterdam, Rotterdam, the Hague, Copenhagen, Stockholm, Christiania, Berlin, Hamburg, Breslau, Munich, Vienna, Buda-Pesth, Rome, Naples, Turin, and Florence, in Europe; from Alexandria in Africa; from New York, Brooklyn, Philadelphia, and Boston, in North America. The births and deaths, distinguishing deaths from the principal zymotic diseases, are sent to me, and published weekly. Thus observers, like watchmen on the walls, are ever on the look out, so that men see exactly what is going on, and neither plague, cholera, nor any other great epidemic can take the nations by surprise.

Statistics are cultivated in Russia, and I hope ere long to be able to add the capitals of that empire to the other cities whose authorities now co-operate in carrying out this great system of hygienic observation.

The doctrines of population were never more important than they are in the present day, and I trust that the series of facts in these reports will be of use to political students in enabling them to solve the problems in which this kingdom,—the mother of so many colonies,—is so deeply interested. The age at marriage in all cases, and the age of parents at the births of their children, appear now to be all that the English schedules want to meet the requirements of physiological and statistical science.

There can be no doubt that large sums of money have been expended here and there in recent years on sanitary works of various descriptions; and the country naturally expects to see the fruits of the expenditure. Has the money been wisely expended, or has there been a failure either in the schemes of work, in the skill of engineers, or in the medical officers of health? Have they not understood the highest truths of hygienic science as they were taught by Professor Parkes, whose loss the country has to deplore? or have the municipal and other sanitary authorities not yet completed what they have undertaken? What is certain is that the mortality of the whole population, though not so low as it is in some countries is much lower than it is in large empires. That the health of the people is not stronger is partially due to the increasing density of the population; without corresponding arrangements for lodging them, for supplying them with pure water, for preventing the discharge of black smoke into the air they breathe, or for carrying away impurities to the earth to which they belong. This question has already been intelligently discussed by Dr. Buchanan;* but I have thought it well, with the observations of thirty years before me, to inquire especially into the connexion between great reductions in the mortality and genuine sanitary works. The result is decisive; there remains no question that the increased salubrity of several towns and districts is due to sanitary measures. Where no such effects follow improvements the improvement is only apparent, or the works are imperfect.

Considering the mining and manufacturing operations, the industries of every kind going on, and the aggregation of great numbers of people in cities, this greater London alone holding within 15 miles of Charing Cross more than four millions of people, the progress of the health of England since the seventeenth century when the great plague ravaged London is a source of congratulation. Much undoubtedly remains to be done. But the Medical Council is growing alive to the importance of the systematic study of State medicine. A body of Health Officers second to none in skill, and devoting themselves wholly to conservative medicine will be called into existence, by attractions as great in the counties and cities as

---

* See Report by Dr. Buchanan on the results which have hitherto been gained in various parts of England by works and regulations designed to promote the public health.—9th Report of the Medical Officer of the Privy Council, pp. 40–208.

private practice offers. If engineers, chemists, and agriculturists in the end solve the sewage and water questions satisfactorily; if dwellings are built and regulated so as to be noxious no longer in village, town, or city, the returns of Death—that impartial, inexorable inspector,—will bear testimony to the efficiency of all the Health Departments.

Increase of Population.—The returns published by the Marine Department of the Board of Trade show that the number of emigrants, who left the United Kingdom in 1874 for places out of Europe was 241,014 or 69,598 less than in 1873.

An attempt has been made to distinguish *bonâ fide* settlers from passengers, but it has hitherto proved unsuccessful.

The annexed Table shows the nationality of the emigrants from the Ports of the United Kingdom during the last twelve years :—

Years.	English.	Scotch.	Irish.	Foreigners.	Not distinguished.	Total.
1863	61,243	15,230	116,391	7,833	23,061	223,758
1864	56,618	15,035	115,428	16,942	4,877	208,900
1865	61,345	12,870	100,676	28,619	6,291	209,801
1866	58,856	12,307	98,890	26,691	8,138	204,882
1867	55,494	12,866	88,622	31,193	7,778	195,953
1868	58,268	14,954	64,965	51,956	6,182	196,325
1869	90,416	22,559	73,325	65,752	5,975	258,027
1870	105,293	22,935	74,283	48,396	6,033	256,940
1871	102,452	19,232	71,067	53,246	6,438	252,435
1872	118,190	19,541	72,763	79,023	5,696	295,213
1873	123,343	21,310	83,692	72,198	10,069	310,612
1874	116,490	20,286	60,496	38,465	5,277	241,014

After distributing, proportionally, 5277 emigrants whose birth places were not distinguished, the number of *English* emigrants during the year 1874 was 118,855, of Scottish 20,663, of Irish 61,964, and of Foreign 39,532.

The falling off in 1874 was in the emigration to North America, the number of emigrants being 96,670 less than in 1873, viz., 84,912 less to the United States and 11,758 less to British North America.

This large decrease, so far as regards natives of this country, is attributed partly to the rise in the rates of wages here, and partly to the general commercial depression and the unprofitable state of the labour markets in the United States. The latter reasons probably account for the large decrease in the number of foreigners who passed through this country during the year.

Number of Emigrants to the United States and to the North American Colonies in 1873–74.

Years.	English.	Scotch.	Irish.	Foreign.	Total.
1873	100,397	17,988	81,438	70,458	270,281
1874	73,269	12,288	52,281	35,773	173,611
Decrease in 1874	27,128	5,700	29,157	34,685	96,670

The following results show the most noteworthy feature in the emigration returns of 1874, viz., the large increase in the number of emigrants to the Australian Colonies.

NUMBER of EMIGRANTS to the AUSTRALIAN COLONIES in 1873–74.

YEARS.	English.	Scotch.	Irish.	Foreign.	Total.
1873	19,002	2,881	3,506	1,039	26,428
1874	36,593	7,057	8,985	1,323	53,958
Increase in 1874 -	17,591	4,176	5,479	284	27,530

This large increase is mainly due to free and assisted passages being now offered by the agents of several of the colonies to artisans and others. It is believed, however, that the numbers have been swelled by unsuccessful emigrants who have returned from the United States.

The number of returning emigrants is not distinguished in the returns, but it was shown in the Census Report of 1871 that large numbers of emigrants to the Colonies and to the United States do return to England, and the average annual number in the ten years 1861–70 was estimated to be about 25,000.

The number of persons *who landed* in this country from passenger vessels in 1874 was 118,129 being the largest number on record. The results in each of the years 1870–74 were as follows :—

Years.	Number of persons landed in this country from passenger vessels.
1870	49,157
1871	53,827
1872	70,181
1873	86,416
1874	118,129

It would be instructive to know how many of these consisted of persons who had previously left these shores as emigrants.

100,527 or more than 85 per cent. of the immigrants in 1874 came from the United States, and it is believed that the greater part of these were artisans unable to obtain remunerative employment there owing to the depressed state of the markets.

The growth of the population in England and Wales in 1874 occasioned by the excess of births over deaths was 328,324 but this does not represent the true increase ; emigration, immigration, and unregistered births are elements which have to be taken into consideration in arriving at a correct estimate of the increase. The estimated population at the middle of the year 1874, based on the actual rate of increase during the 30 years 1841–71 was 23,648,609.

Meteorology.—The principal meteorological features of the year 1874 were the deficient rain-fall all over the country, and the extraordinary period of cold weather during the last six weeks of the year. Only 20 inches of rain fell at Greenwich during the whole twelve months. This quantity was 10 inches less than that in 1872 and 5·4 inches below the average annual fall. The mean temperature of the air was 49°·3, or nearly the same as the average.

The mean temperature of January was remarkably high being 5°·4 above the average of 103 years. In May, three weeks of low temperature succeeded seven weeks of warm weather, and the excesses of temperature

towards the end of April were as much as 10° and 13°. From 21st November to the 1st January 1875, the cold was severe, on some days in December the temperature was as much as 14° in defect of the average. On the 31st December it was painfully cold, being as much as 16½° in defect.

The meteorology of this year 1874 is fully described by Mr. Glaisher, F.R.S., in his remarks on pp. xxxii–iv, who also shows in his tables the meteorological variations at different places. See pp. civ.–vii.

Prices.—Strikes and disputes between masters and men during the year 1874 brought various important industries to a stand-still. Wages in the mining, iron and steel trades fell. The price of commodities and the wages of labour generally declined. The excessive prices of previous years retarded and in some cases prohibited consumption.

The harvest was the best and most abundant since that of 1868. The quantity of wheat imported for home consumption was 41,527,638 cwts., or 2,335,460 cwts. less than in 1873, and the price of wheat was lower: a reduction in the quantity imported for home consumption generally indicating a plentiful harvest.

Years.	Quantities of Wheat imported for Home Consumption.	Average Price of Wheat per Quarter in England and Wales.
	Cwts.	*s.* *d.*
1865 - -	20,962,963	41 9
1866 - -	23,156,329	49 11
1867 - -	34,645,569	64 5
1868 - -	32,639,768	63 9
1869 - -	37,695,828	48 2
1870 - -	30,901,229	46 10
1871 - -	39,389,803	56 10
1872 - -	42,127,726	57 1
1873 - -	43,863,098	58 8
1874 - -	41,527,638	55 9

The autumn and winter of 1873 were very favourable for sowing the wheat crop of 1874, and the extent of land under wheat in England and Wales amounted to 3,509,309 acres: more by 139,655 acres than in 1873.

Both beef and mutton were somewhat cheaper in 1874 than in the previous year.

The average price of beef by the carcase at the Metropolitan meat market ranged from 5⅛*d.* to 8⅛*d.* per lb. The prices of mutton ranged from 5⅛*d.* to 8*d.* per lb. Best potatoes at the waterside market were much cheaper than in 1873, being 111*s.* per ton instead of 158*s.* 6*d.* per ton.

Pauperism.— The returns of pauperism were lighter. The average number of paupers relieved on the last day of each week was 137,197 in-door, and 609,328 out-door, against 137,775 in-door, and 656,843 out-door in the previous year.

The annexed statement shows the results of four Censuses of paupers on the 31st December 1871–4 exclusive of lunatics in asylums and vagrants.

	In-door.	Out-door.	Total.
1871 - -	150,093	780,809	930,902
1872 - -	147,657	690,979	838,636
1873 - -	144,201	637,269	781,470
1874 - -	146,947	603,468	750,415

The decrease from 1873 to 1874 was 31,055, or 4·0 per cent.

Marriages.

The state of trade and national industry is strikingly exhibited in the fluctuations in the marriage-rate (persons married to 1000 population) of the last nine years, 1866–74.

The period of commercial distress which began about the middle of 1866 did not diminish the number of marriages to any extent in that year, for the rate was high, 17·5; but this period of depression continued during five years, 1867–71, and influenced the marriage-rates of those years, which were 16·5, 16·1, 15·9, 16·1, and 16·7 respectively.

In 1872 and 1873 the working classes became excited under the rapid advance of wages and diminution in the hours of labour, and the marriage-rates rose to 17·5 and 17·6 respectively.

In 1874, a year of commercial difficulties, a re-action set in; the great trades of iron, coal, hardware, and shipbuilding were somewhat depressed: there were contests between masters and men, and reduced demand for labour brought down wages, so the marriages in the year 1874 were 202,010, or 3605 below the number in 1873, and the rate was 17·1.

The number of marriages in proportion to population varies in the different counties. High rates prevailed in the metropolitan and manufacturing counties—the great centres of commercial industry—where the skilled artizan and the industrial classes have opportunities of earning high wages, while in the agricultural counties, where the wages of the labouring population were comparatively low, the marriage rate was also low.

Forms of Marriage.—Of the 202,010 marriages in the year, 150,819, or 75 per cent., were solemnized according to the rites of the Establishment, and 51,191 or 25 per cent. not according to the rites of the Establishment.

The marriages by licence were 17,659; these have decreased more or less during the last 15 or 20 years, while the marriages after banns, which were 128,462 in 1874, have increased during the same period. The number by Superintendent Registrars' certificates was 3808, while in 860 cases the clergy omitted to state under which of the foregoing heads the marriages should be recorded; the number of such omissions is gradually decreasing, but it is to be regretted that they are still to be counted by hundreds.

The marriages among Roman Catholics in 1874 were 8179, the numbers during the last ten years fluctuated from 7231 to 8911. In some cases of mixed marriages between Protestants and Roman Catholics the couples were married twice, and were counted twice in the registers. The number of marriages among other Christian denominations was 21,253, about the same number as that performed at the Superintendent Registrar's office, 21,256. The marriages according to Quaker rites were 47 against 79 in the previous year. The marriages among Jews are increasing; the number in 1874 was 456.

Of 100 couples who married in 1874 according to the rites of the Established Church ·02 married by special license, 11·71 by license, 85·18 after banns, and 2·52 by Superintendent Registrar's certificate, while in ·57 per cent. it was omitted to be stated under which heads the marriages should be classed. Of 100 weddings not according to the rites of the Established Church there were 15·98 in Roman Catholic chapels, 41·52 in registered places belonging to various other Christian denominations, ·09 among Quakers, ·89 among Jews, and 41·52 at Superintendent Registrars' Offices.

First Marriages; Re-marriages.—202,010 marriages were contracted in 1874. Of the bachelors who married, 165,018 chose spinsters, while

9295 selected widows. The number of widowers who married spinsters was 16,459, while 11,238 widowers married widows, so 27,697 widowers, re-married, and 20,533 widows re-married. The number of persons, therefore, who married a second time in 1874, was 48,230. There is but little fluctuation in the proportions from year to year.

The number of marriages of divorced persons in 1874 was 61, viz., 59 in which one or other of the contracting parties is stated to have been previously divorced, and 2 in which divorced men married divorced women. Of 34 divorced men who re-married, 27 married spinsters, 5 married widows, and 2 married divorced women. Of 29 divorced women who re-married, 18 were married to bachelors, 9 were married to widowers, and 2 were married to divorced men.*

The number of these marriages is increasing. Only 29 were registered in the year 1862, whereas in 1868 there were 40, and in 1873, 62. In the 14 years 1861–74, there were 537, viz., 524 in which one or other of the contracting parties had been previously divorced, and 13 in which divorced men married divorced women.

Ages at Marriage.—The marriage registers are imperfect; the precise ages of the married not being returned in a considerable number of cases. Of the 202,010 marriages registered in 1874, the ages of *both* parties were stated in 149,848 instances only, so that in 52,162 cases the Officiating Minister, or Registrar of marriages, returned the words "of full age," "minor," or "under age," as the case might be.

This is to be regretted, for if all the ages were returned, it would afford the means of determining with greater accuracy the mean age at marriage in England, the probable duration of the joint lives of husband and wife, the annual rate of marriage at different ages, and many other important social questions.

The returns are less imperfect now than they were in 1855, when the ages of both parties were not returned in 42 per cent. of the total marriages, whereas in 1874, 26 per cent. was the proportional number of cases of imperfect returns.

The gradual improvement which has taken place in England during the last 20 years is shown in the subjoined table :—

Years.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.	Years.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.
1855	42·3	1865	35·1
1856	42·1	1866	33·6
1857	40·9	1867	33·5
1858	40·6	1868	33·0
1859	38·9	1869	31·2
1860	37·5	1870	30·1
1861	36·7	1871	29·0
1862	36·4	1872	27·7
1863	35·3	1873	27·0
1864	34·9	1874	25·8

* The number of decrees of divorce pronounced by Her Majesty's Court for Divorce and Matrimonial Causes in the year 1874 was, nisi 284, absolute 194.

The annexed table shows the proportion of imperfect returns in the year 1874 in each registration division of England and Wales :—

Groups of Counties.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.	Groups of Counties.	To every 100 Marriages the number of cases in which the ages of both parties were not returned.
Yorkshire - - -	10·7	South Eastern Counties -	28·2
Northern Counties -	14·6	Eastern Counties - -	28·3
Monmouthshire and Wales	14·6	South Western Counties -	28·2
North Western Counties -	18·1	South Midland Counties -	31·3
West Midland Counties -	21·6	London - - - -	52·8
North Midland Counties -	24·7		

Yorkshire supplied the greatest proportional number of perfect returns, but even in this county the ages of both parties were not stated in the marriage register in 11 instances out of every 100 marriages. In Wales, and in the Northern counties of Durham, Northumberland, Cumberland, and Westmorland, the proportion per cent. of imperfect returns was 15, in Lancashire and Cheshire 18 per cent. The groups of counties furnishing very imperfect returns were the South Midland, 31 per cent., the South-eastern, Eastern, and South-western, 28 per cent. But it is in London that the returns were most imperfect, for there the ages were omitted by the Officiating Minister, or Registrar of marriages, to the extent of 53 per cent.

The mean age at marriage as determined from the 149,848 persons whose ages were stated in the year 1874, including the re-married, was 27·9 years for men, and 25·7 years for women. For 130,965 bachelors it was 25·7 years, and for 135,458 spinsters 24·3 years. The mean age of the widowers who re-married was 43·0 years, and of widows 39·4 years. A comparison of these results with those in 1867 shows that the mean age at marriage is slightly lower than it was.

The number of men who married in 1874 under 21 years of age was 16,919, and the number of women not of full age was 45,859; so that of every 100 men married 8·4 were not of full age, and of every 100 women who were married 22·7 were not of full age.

The proportions differ but little from those of the previous year, but are nearly double those of the year 1844, when they were 4·2 and 13·2 per cent. respectively.

Two girls were married, at the early ages of 14 years, by widowers whose ages were 24 and 40 years respectively. Of 6576 widows who were married to bachelors in 1874, and whose ages at marriage were stated, 12 were under 20 years of age.

Signature in Marriage Registers.—The marriage register abstracts show a gradual improvement in the state of the elementary education of the people, especially of women whose education has been unhappily neglected. In the year 1874 now under review, 36,117 men and 48,903 women were

obliged to sign the marriage register with marks, so 82·1 per cent. of the men, and 75·8 per cent. of the women, were able to write. Although these proportions are much larger than they were 30 years ago, when only 66·8 of the men and 50·4 of the women were able to write, still it is a deplorable fact, that 17·9 per cent. of men and 24·2 per cent of the women of England were unable to sign their names in writing.

The counties, &c. where education has been greatly neglected, and which have so frequently been referred to in previous reports as claiming most attention, are Monmouth, Bedford, Wales, Stafford, Hertford, Suffolk, and Norfolk, where from 26 to 32 per cent. of the men, and from 19 to 41 per cent. of the women were unable to write. The education of women has also been much neglected in the counties, &c. of Salop, Warwick, Nottingham, Chester, Lancaster, West Riding of York, and Durham.

It has been stated that proportionally more women could write in Scotland than men in England, and such was the case in the year 1862, when 79·7 per cent. of the women in Scotland, and 76·3 per cent. of the men in England signed in writing, and the respective proportions in the ten years 1862–71 were 79·1 for women in Scotland, and 78·5 for men in England, but this is no longer the case. More satisfactory progress has been made in recent years in England, and the results of educational efforts show now that proportionally more men can write in England than women in Scotland.

Elementary national education is now only beginning to make satisfactory progress, for it is estimated that at least 3,224,580 children in England and Wales should attend public elementary schools, but the average daily attendance at the 12,167 aided day schools in 1874 was only 1,678,759, while accommodation was provided for 2,871,826 scholars.

It appears, therefore, that all that is now wanting to complete the educational efforts of recent years is the adoption of some means to insure a better attendance at school, and this question is now receiving the attention of the Legislature.

The average *day and night* attendance has risen from 1,225,764 in 1870 to 1,727,449 in 1874.*

Buildings registered for Marriages.—The number of these buildings registered in 1874 was 239, bringing up the total number on the register at the end of the year to 7375. Of the 239 registered during the year 2 belonged to Presbyterians, 38 to Independents, 45 to Baptists, 1 to the United Brethren or Moravians, 15 to Roman Catholics, 5 to Unitarians, 105 to the various sects of Wesleyan Methodists, 16 to Calvinistic Methodists, 1 to the New Jerusalem Church, 2 to the Catholic and Apostolic Church, and 9 to other places of worship.†

Certified Places of Worship.—The number of places of meeting certified for religious worship during the year 1874 not being churches or chapels of the Established Church was 487. The number on the register on 31st December 1874 was 20,033. The following is a list of the various titles by which religious denominations have been certified to the Registrar General. The name printed in italics has been added since the publication of the list in my last Report.

* See Report of the Committee of Council on Education, 1874–5, pp. ix. and xiv.

† For the distribution of the 7375 buildings now on the register, under the various denominations, see Table 9, p. lxxiv.

Births.

The number of births registered in 1874 was 854,956, or 25,178 more than in the previous year. The rate was as high as 36·2 per 1000, while the annual average rate in the 10 years 1864–73, was 35·4 per 1000. The rate in 1874 in England was, of course, exceeded in the counties having the highest proportions of married women at the childbearing ages, such as Durham, where it was 46·7, Stafford 43·8, Monmouth 40·3, Lancaster 40·2, Northumberland 39·9, Derby 39·9, West Riding of York 39·7, Nottingham 39·2, South Wales 39·0, and Warwick 38·3.

Sex.—The number of male children born in 1874 was 435,179, of female 419,777, so 104 males were born to every 100 females: the proportions fluctuate considerably in the several counties in different years.

Births to a marriage.—Assuming that the interval between the mean age of marriage and the mean age of the mothers in England is 6 years, then the legitimate births in 1874 divided by the average number of marriages in the three years 1867–9 will give the average number of births to a marriage—4·57. In the year 1864 the proportional number was 4·30, so to every 100 marriages in England there are now 457 births, whereas ten years ago there were 430, or 27 less. This is no doubt owing to some improvement in the registration of births. The annual number of legitimate births to every 100 married women aged 15 and under 55, in the 10 years 1861–70, was 22·35.

Children born out of Wedlock.—The rate of illegitimacy in England is declining. Of the 854,956 children whose births were registered in 1874 43,103 were born out of wedlock, so 5 per cent. of the total births registered were illegitimate. Since the year 1845 when the per-centage was 7, the proportional number of illegitimate births has gradually declined. No doubt many of the births that escape registration are those of illegitimate children, still there is no reason to believe that a greater proportion escape registration now, than formerly, especially as the registrars have an interest in recording every birth, but the results of 1875, the first year of compulsory registration of births, will supply fuller information on this subject. The proportional number of illegitimate births, annually, to every 100 spinsters and widows, aged 15 and under 55, in England, was 1·66 in the ten years 1851–60 and 1·64 in the following decade 1861–70.

Deaths.

526,632 deaths were registered in England in the year 1874, or 34,112 more than in the previous year. The rate of mortality for the year was 22·3 per 1000 of population, exactly the same as the mean rate in 1838–74. but 1·2 per 1000 above the rate of the previous year. Nearly one half of the above excess was specially attributable to scarlet fever and measles, while atmospheric and other agencies raised the deaths from many causes.

An inquiry into the *causes* of the deaths of the year, by Dr. Farr, —showing which of these have prevailed with mitigated severity—will be found in the Appendix to this Report, pp. 219–224.

Certain zymotic diseases have a tendency to return in cycles of longer or shorter periods, and communities generally suffer from such epidemics in proportion to their sanitary condition. One after another the defects in the sanitary laws of the country are being removed and it is impossible to overrate the importance of the sanitary inquiries and inspection now carried on through the agency of the Medical Department of the Local Government Board.

The information relating to the local prevalence of any disease, obtained from my Quarterly Returns, from the Registrars of Births and Deaths, from the Medical Officers of Health, and from other authorities, enables special local inquiries to be immediately instituted by personal medical inspection, or by correspondence, and this must result, sooner or later, in an improved state of the health of the people inhabiting the urban and rural sanitary districts: it is in this way that the greater part of the country will in process of time come under sanitary surveillance.

The number of sanitary jurisdictions in England in 1874 was 1558. In about 900 of these the Local Government Board pays part of the local salaries and is consequently entitled to receive copies of the reports of the Medical Officers of Health, but with respect to about 658 jurisdictions, in which no such assistance is afforded, the Board is not entitled to receive the reports. The precise number of Medical Officers of Health is unknown.

Sex and Age.—Of the 526,632 deaths registered in the year under review 272,178 were males and 254,454 were females. The male death-rate was 23·6 per 1000, the female 21·0 per 1000. These rates at all ages differed but little from the average in the 25 years 1848–72,* but a comparison of the mortality of children and adults, at the *different ages*, with the average annual rates in the 25 years shows that for both males and females the mortality at each period of age up to 35 was comparatively low. At and after that age the mortality was higher. The average rate observed in the 25 years includes periods when great epi-

* See Preliminary Tables, No. 27.

demics were prevalent. In the subjoined table the death-rate of the year is compared with the average in the ten years 1856–65 which was less disturbed by serious epidemics; but the general results are nearly the same.

There is a close connection between the climatic conditions of the atmosphere and the mortality. Temperature is one of the most important elements in regulating the death-rate, especially at the adult ages, and the excess or defect, in certain years, in the rates at the middle and advanced ages is greatly due to this cause.

The years in which the mortality, after the age of 35, was above the average, are generally those in which the meteorological elements have been very variable—a very low temperature of a few weeks duration perceptibly increasing the mortality from diseases of the respiratory organs. This is probably the cause of the excess in the death-rate after the age of 35 in the year 1874 when the mortality from this class of diseases was unusually high.

England and Wales.

Ages.	Annual Rate of Mortality per 1000 living.			
	In the 10 Years 1856–65.		In the Year 1874.	
	Males.	Females.	Males.	Females.
All Ages -	23·2	21·3	23·6	21·0
0—	73·0	63·3	72·0	61·7
5—	8·4	8·3	7·5	7·2
10—	4·7	4·8	4·0	4·0
15—	7·4	7·7	6·4	6·5
25—	9·5	9·7	9·7	9·2
35—	12·9	11·8	14·4	12·2
45—	17·9	15·1	20·6	15·8
55—	31·3	27·6	35·7	29·4
65—	66·4	56·4	70·7	61·6
75—	144·2	132·4	144·5	132·9
85—	306·8	279·5	307·5	273·7
95 and upwards	444·8	436·1	446·4	425·0

A comparison of the mortality of the two sexes shows that under 5 years of age the excess of mortality among boys is about one per cent., at the next age the excess is very slight, but from the periods of age 10 to 35 females die in greater proportion than males. At the ages 35–55, and at each subsequent period, the female is lower than the male rate.

It is believed that the expectation of life, at the different ages, among the married is greater than among the unmarried, but no abstracts showing the ages at death of the married and of the unmarried, have been made for England similar to those published for two years for Scotland. Such results would be interesting and instructive, and would enable me to show the difference between the mean age at death of the married, and of the single at marriageable ages; but such abstracts could only be made for married women and spinsters for England, as the deaths of *married men* are not yet distinguished from the deaths of unmarried men in the English registration schedule.

Seasons.—It is to be regretted that no means have been taken to trace the varied influences which meteorological phenomena exert on the laws of health or sickness. Little more is known at present than that low tem-

perature and cold north and east winds increase the fatality of certain diseases, but how far the other various meteorological elements of the year disturbed the ordinary death-rate is unknown.

The mortality is generally highest in the three months of January, February, and March, when the temperature is lowest, but it was not so in 1874. The mortality in the first three months of the year was 23·4, or 1·4 per 1000 below the average, with a mean temperature (41°·4) 1°·4 above the average of 26 years, and a rain-fall of 2·4 inches, which is less than one half the usual amount. In the second quarter of the year the mortality was at the annual rate of 21·0 per 1000, the average being 22·0 per 1000; the mean temperature was the same as the average 52°·8, but the rain-fall was deficient, being only 4·2 inches against an average fall of 5·7 inches. In the third quarter of the year the mortality (20·8) was about the average, and the temperature (60°·9) deviated but little from the average: the rain-fall was 6·2 inches or 1·1 inch below the average. The mortality is not regulated so much by the mean temperature of the quarter, as by the extremes of temperature: an extraordinary period of cold weather prevailed from the middle of November till the end of the year, hence the mortality in the fourth quarter was 23·8 per 1000, or nearly 2 per 1000 in excess of the average. The mean temperature was indeed low, being 42°·3, or 2° less than usual; the rain-fall, 7·2 inches, was near the average.

Full information respecting the meteorology of the year will be found in Mr. Glaisher's remarks on pages xxxii–iv.

Locality.—As previously stated, the mortality of England in the year 1874 was 22·3 per 1000. In ten English counties and in South Wales it was higher than this, but the mortality ranged from 17·0 in Dorsetshire to 28·3 in Lancashire.

In three Counties and one Riding of England,* the mortality is invariably very high, and their death-rate, in the year now under review, was higher than usual. If the sanitary laws had been administered in these places as well as they have been in London, no less than 26,400 lives would have been saved during the year, and if the mortality in 1874, in these three Counties and in the West Riding, had been at the same rate as that of London, the effect would have been to reduce the rate in England 1 per 1000; thus it is owing to the high rates continually prevailing in three or four counties, that the death-rate of the entire country is never below 20 per 1000.

Previously to the year 1865 the death-rates were computed for *counties* only, and the results exhibited a very wide range of mortality, but it was observed that all the highest rates occurred in those counties containing the great centres of the mining and manufacturing industries—where children abounded—so that it became necessary to ascertain the mortality in the large towns. These results are now published in a comparative form for each of the five years 1870–74.†

These large towns owing to their importance naturally attracted the early attention of the authorities, and in many of them the sanitary laws are, for the most part, now well administered, but it is to the sanitary supervision of the smaller town populations—represented by the urban and rural sanitary districts all over the country—especially in Lancashire and in the West Riding of York—that we must look for any reduction in the general death-rate of the country; and this great sanitary work is now ably carried out under the directions of the medical staff of the Local Government Board.

The annexed table shows the annual rate of mortality, (1) from all causes, and (2) from seven zymotic diseases in fifty *town districts*, in each of the years 1871–4.

---

* Lancashire, Durham, Northumberland, and the West Riding of York.

† See Preliminary Tables, No. 36.

Annual Rate of Mortality in each of the Years 1871-74, in Fifty Town Districts of England and Wales.

NOTE.—The mean rates of mortality in these Town Districts have been calculated from the numbers supplied by the local Registrars in their Quarterly Returns, which served as the basis of the annual rates published from time to time in the Registrar General's Quarterly Returns and Annual Summaries.

The letter M or P affixed to the name of each Town denotes whether the limits, which the District or Sub-districts in the last column approximately represent, are Municipal or Parliamentary.

* The area taken to represent the boroughs of Brighton, Rochdale, Huddersfield, and Halifax, was not co-extensive throughout the four years.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospital and Lunatic Asylums, situate within the Districts or Sub-districts here taken as representing the town, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where a portion of the Union only is embraced by the area taken, or where the Workhouse is situated outside that area.

There are many districts in England where the good effects of the sanitary administration of the last 20 or 30 years can be traced. Those in the annexed table may be cited as examples of such improvement.

Districts of England and Wales showing some Improvement in the Annual Rate of Mortality in the Three Decades 1841–50, 1851–60, and 1861–70.

* The District of Salisbury was abolished, and the sub-district of Salisbury transferred to the District of Alderbury, in the year 1869.

The district of North Witchford affords a striking instance of the important results that can be attained through health administration. The average annual mortality fell from 27 per 1000 in 1841–50, to 21 in 1851–60, and to 20 in 1861–70: in the four years 1871–4, the results are still more remarkable, the mortality being reduced to 17 per 1000.

In Whittlesey, a steady improvement in the mortality is also discernable from 25 per 1000 in 1841–50, and 23 per 1000 in 1851–60, to 21 per 1000 in 1861–70; in 1871–4 the rate fell to 19 per 1000.

In Wisbech sanitary supervision commenced soon after the cholera epidemic of 1854. In 1866 the town was supplied with pure water, and extensive sewerage works are now completed. The annual death-rate of this district has been reduced from 25 per 1000 in 1841–50 to 19 per 1000 in 1871–4.

The great land drainage works have had great influence in improving the health of the inhabitants of the Isle of Ely. By their means the atmosphere has been purified and dried, and the returns for Wisbech show a marked diminution in the death-rate from phthisis, the average annual mortality per 1000 living in the 10 years 1851-60, being 2·0, whereas in the ten years 1861–70 it was reduced to 1·6.

In Orsett the remarkable reduction in the death-rate during the 30 years 1841–70 is partly due to sanitary improvements, but mainly to the drainage of the land and consequent dryness of the soil. In the four years 1871–4 the mortality was only 17 per 1000. The annual rate of mortality from phthisis decreased from 2·8 per 1000 in 1851–60, to 1·9 per 1000 in 1861–70.

Reference has already been made in some of my previous reports to the good effects of drainage and water supply in the district of Salisbury. Before any improvements were made, the annual death-rate in 1841–50 was 28 per 1000, but by the year 1855 an excellent system of drainage was in operation, and the district was supplied with pure water, so the annual rate was reduced in 1851–60 to 24 per 1000, and in the following decade it was still further reduced to 20 per 1000. The *city* of Salisbury, with a

population in 1871 of 12,903, appears to be in a good sanitary condition, the annual mortality in the four years 1871–4 being at the rate of 21 per 1000.

In Wolverhampton the annual mortality has fallen from 28 per cent. in the 10 years 1851–60 to 24 in the four years 1871–4. Dr. Love, the Medical Officer of Health, attributes this reduction to various sanitary improvements carried out since 1858. In 1865 the town was entirely re-sewered, and a more wholesome water supply obtained, but much still remains to be done to put Wolverhampton in a good hygienic state.

The cause of the great improvement in the health of Coventry is attributed by Dr. Fenton to the progress of sanitary works. Such improvements have been the means of reducing the annual death-rate from 27 per 1000 in the 10 years 1841–50, to 25 per 1000 in the 10 years 1851–60, and to 21 per 1000 in the 10 years 1861–70. In the four years 1871–4 the mortality rose to 24 per 1000. This was owing to an epidemic of small-pox in 1871–2, and of scarlet fever among children in 1873–4.

Previously to any sanitary improvements in Macclesfield the mortality of this district, in 1841–50, was at the annual rate of 26 per 1000. In 1853–6, sewerage works were executed; in 1851–2, the town was provided with an improved water supply, and various other sanitary measures were adopted, but the condition of Macclesfield was far from satisfactory, for the mortality of the district, in 1851–60, was 25 per 1000. In the following decade however, 1861–70, it fell to 23 per 1000.

Kingston-upon-Hull presents another example of the good effects of sanitary measures. Mr. Holden, the Medical Officer of Health, states that cholera was appallingly fatal in 1849; in proportion to population, it suffered more from cholera than any district in the kingdom.* The annual rate of mortality, from all causes, in the 10 years 1841–50, was 31 per 1000. An investigation showed that the drainage was bad, and the water—derived entirely from the river Hull—received the sewage of such places as Driffield and Beverley. The Local Board of Health, incorporated in 1851, began to carry out sanitary improvements, and in the 10 years 1851–60, the mortality was reduced to 25 per 1000. In 1864 the river water was abandoned, and the town received a constant supply of pure water from the springs rising out of the chalk wolds at Derringham. What has been effected is encouraging, but the mortality of Hull may be still further diminished, for in the 10 years 1861–70 the mortality was 26 per 1000, and during the four years 1871–4 it was 25 per 1000.

The improvement in the health of Newport is attributed by Dr. Davies to the extensive and complete system of drainage executed chiefly between 1851 and 1860, by means of which the sewage was swept into a tidal river about three miles from its mouth. The effect of the drainage has also been attended with the beneficial result of lowering the subsoil water. The town now receives a constant supply of good water. The mortality declined from 24 in 1841–50, and 22 in 1851–60, to 21 in 1861–70.

The mortality of the district of Merthyr Tydfil—the great centre of the iron manufactures of South Wales—in 1841–50, and in 1851–60, was at the high average annual rates of 28 and 29 per 1000 respectively. This was attributed by Mr. Dyke, the medical officer of health, to deficient drainage, to the absence of any system of scavenging, and to a scanty and impure water supply. In the year 1866 the drainage was completed, and a plentiful supply of pure water obtained, so that the annual rate in 1861–70 averaged only 25 per 1000. The sanitary state of the town, however, was not satisfactory, for the mortality in the four years 1871–4

* See Report on the Mortality of Cholera in England, 1848–9. By Dr. Farr, F.R.S., D.C.L., &c., pp. xxxvi—viii.

rose to 27 per 1000, owing to the prevalence of small-pox in 1872, of enteric fever in 1873, and of contagious fevers in 1874.*

The improvement in Crickhowell is mainly due to sanitary arrangements in the urban district of Brymnaur, which has been thoroughly drained and provided with an ample supply of pure water. Sanitary improvements are in progress, however, in various parts of Crickhowell. The mortality in the 10 years 1841–50 was at the annual rate of 27 per 1000; in the following decade, 1851–60, it fell to 25 per 1000, and in 1861–70 there was a further reduction to 23 per 1000, at which rate it continued during the four years 1871–4.

There are two districts in England exceptionally healthy; Glendale and Rothbury.† Their annual mortality during the 30 years 1840–71 was at the low average rate of 15 per 1000.

In Rothbury, a third of the population is employed in healthy occupations connected with agriculture. The remarkable low death-rates, ruling at the different ages, are shown in the subjoined table, where they are compared with the rates in the healthiest parts of England:—

Ages.	Rothbury District.			Healthy Districts of England.	Division II. South Eastern Counties.
	Mean Population, 1861–71.	Deaths in the 10 Years 1861–70.	Annual Mortality. Deaths to 1000 living.	Annual Mortality. Deaths to 1000 living.

* The results of sanitary work in the *parish* of Merthyr Tydfil are thus recorded by Mr. Dyke:—

	Death-rate.
1. Before any works of sanitary improvements were begun; in the 11 years 1845–55 - - - -	33 per 1000
2. During works of paving, inspection, and nuisance removal; in the 6 years 1856–61 - - -	28 „
3. After the addition of the water supply, and during the formation of main drainage; in the 4 years 1862–65 -	26 „
4. While drainage of houses was being effected; in the 7 years 1866–72 - - - - -	25 „

† In the Rothbury district the village of Harbottle has 120 inhabitants, and Dr. Frank Richardson states that among them are 37 children under 14 years of age. During the last 20 years no child has died. He gives another instance of the vitality of children in the parish. "A farmer and his three shepherds, who have occupied their present "situations nearly 30 years, have among them 47 children, and not a single death has "occurred in these families. The inhabitants have abundance of plain substantial "food, excellent water, good residences as a rule, and regular but not severe work in a "pure bracing atmosphere; they are highly intelligent and generally abstemious. I am "indebted to the Rev. A. Procter, who has been upwards of 40 years the esteemed vicar, "for the corroboration of the statistics of this parish which I have now given you."

Such exceptional cases are well worthy of study; and our young Health officers may learn a useful lesson of hygiene from these farmers and shepherds living on the southern slopes of the Cheviot Hills. Dr. Benjamin Richardson can scarcely hope that the mothers of his Hygiea will be more successful in rearing children—their lambs—than these shepherds' wives.

The district of Rothbury contains several very large ancient parishes. That of Alwinton on the southern slopes of the Cheviots extends over 46,681 acres, and comprises 16 townships. The population of this parish decreased from 1325 in 1861, to 1205 in 1871, when 39 births and only 9 deaths were registered, so the birth-rate of the parish in 1871 was 32·4 per 1000 of population, whereas the death-rate was but 7·5 per 1000.

The nine deaths registered during that year included two of infants under one of age, one of a person 25 years, three aged 50 and under 60, one aged 68 years, and another aged 92 years.

In the year 1874 only six deaths were registered, and assuming the population to have been stationary since 1871, the mortality was at the rate of only 5 per 1000.

Death-rates of Children.—The high rate of infant mortality in our large towns is attracting serious attention. It will be seen in the subjoined Table (No. 1) that a much larger proportion of infants under one year of age died in some towns than in others. In Liverpool, for instance, out of every 1000 births registered, the lamentably large number of 239 perished annually in the 5 years 1870–74, whereas the proportional number in London was 161, and in Portsmouth 148. In towns where a considerable proportion of the mothers were employed at factories, the results differed from those above: thus in Oldham the proportional number was 179, in Salford 192, and in Leicester 226. There were exceptional causes in operation in Leicester which have been reported on at the instance of the authorities. Among others the river was dammed up by mills, and the subsoil was consequently saturated: and it is suspected that infants were fed with milk from cows which drank water contaminated by sewage.

TABLE No. 1.—MORTALITY of CHILDREN under ONE YEAR of AGE from ALL CAUSES in EIGHTEEN LARGE TOWNS, 1870–74.

BOROUGHS, &c.	PROPORTIONAL NUMBER of DEATHS under One Year to every 1000 Births registered in 52 or 53 Weeks in each Year.					Average Number in the 5 Years 1870-74.

Leicester	235	241	228	213	215	226
Liverpool	259	269	222	213	233	239

The principal causes which contributed to keep up these high rates of mortality among infants were teething, diarrhœa, convulsions, lung diseases, tubercular diseases, atrophy and debility, premature birth, and suffocation, and to these may be added the three epidemic diseases incidental to childhood, viz., measles, scarlet fever, and whooping-cough. The relative proportion of the fatality of these diseases in these six different towns is shown in the annexed Table (No. 2).

TABLE No. 2.—MORTALITY of CHILDREN under ONE YEAR of AGE from different causes, in SIX large TOWNS, 1873–74.*

Boroughs, &c.	Number of Deaths under One Year of Age annually in the Two Years 1873-74 to every 1000 Births registered.												
	All Causes.	The subjoined Eleven Causes.	Measles.	Scarlet Fever.	Whooping-cough.	Teething.	Diarrhœa.	Convulsions.	Lung Diseases.	Tubercular Diseases.	Atrophy.	Premature Birth.	Suffocation.
Portsmouth -	152	136	2·7	0·3	8·4	2·2	34·7	23·0	25·8	8·4	21·7	7·0	1·6

Liverpool -	224	196	8·0	6·1	8·3	2·4	32·7	29·4	40·0	12·3	38·4	10·1	8·2

* The results in this Table are deduced from the returns published in the Annual Reports of the Medical Officers of Health.

Thus in Liverpool where the highest mortality of infants prevailed, the proportional number of deaths from diarrhœa, convulsions, lung diseases, atrophy, and suffocation, was considerably higher than it was in London. The large number of infants suffocated in Liverpool demands special inquiry.

In the factory towns of Oldham, Salford, and Leicester the proportional numbers who died from convulsions were much larger than the number who died from this cause in London. It is not improbable that this is partly owing to maternal neglect. Dr. Tatham, the Medical Officer of Health for Salford suggests some legislative enactment for the greater protection of infant life in this class of towns, so as to check the employment of mothers in factories within a certain period after their confinement. Dr. Sutton the Medical Officer of Health for Oldham, also states that the high rate of mortality among infants was mainly owing to the absence of the mothers, who were occupied at the mills. The children suffer from indigestible food, and are pacified with soothing syrups containing narcotics, which engender convulsions, and combined with other causes rapidly destroy life.

The mortality from teething, lung diseases, atrophy, and premature birth was high in Oldham.

Summer diarrhœa—one of the most fatal maladies of infants in the large towns—appears to be brought about by heat in conjunction with certain local conditions of insalubrity. The question as to what those precise conditions are is now engaging the earnest attention of medical statists. The mortality from diarrhœa was excessive in Leicester, and so was the mortality from congenital atrophy.

The mortality from premature birth was highest in the factory towns.

In my last report attention was directed to the high rate of mortality in 1873 among children under five years of age which was stated to be 61·5 per 1000: this year, 1874, it was 66·9. A review of the different counties, &c. shows that the mortality of children at this age was highest in Lancaster 95·7, Durham 87·8, West Riding of York 82·9, Northumberland 78·0, Monmouth 77·6, Warwick 77·2, Stafford 75·8, Nottingham 74·7, South Wales 74·5, and London 71·3.

In the large towns these rates were exceeded, and through the courtesy of the Medical Officers of Health, who have furnished me with the number of deaths of children under five years of age for the year 1874, I am enabled to show the mortality in fourteen of these towns. The rate was

highest in Liverpool, 119·1 per 1000, Oldham 105·3, and Salford 100·9, then follow Leeds 99·2, Newcastle-on-Tyne 93·6, Manchester 93·2, Sheffield 91·7, Nottingham 91·5, Birmingham 90·5, and Leicester 86·7: the lowest rates were in Sunderland 77·8, Wolverhampton 76·6, London 71·2, Norwich 67·3, and Portsmouth 63·7.

In Liverpool more children, of this age, died from lung diseases than from diarrhœa, or diseases of the brain, and the high rate of mortality there was mainly due to those three causes; the proportional numbers dying from the usual epidemics of children—measles, scarlatina, and whooping-cough, not being so great.

Deaths in Public Institutions.—The tables relating to the number of deaths registered in Public Institutions of England and Wales* show that 45,865 or 8·7 per cent. of the total deaths in the year 1874 occurred in 1338 of the principal public institutions in England and Wales. Of these 45,865 deaths 29,415, or 64 per cent. occurred in 715 workhouses, 11,963, or 26 per cent. in 544 hospitals, and 4487, or 10 per cent. in 79 lunatic asylums. Only those deaths registered in workhouses, hospitals, infirmaries, and public lunatic asylums are returned, inasmuch as the mortality of the respective sub-districts in which they are situated is disturbed principally by the three classes of institutions. The increase in the total number of hospitals (44) during the year 1874 is mainly owing to a further extension of the system of cottage hospitals.

An introductory note on page 99 explains that the Table of Deaths registered in the Principal Public Institutions situate in the several districts and and sub-districts (pp. 102–118) affords the means of correcting the mortality, which in some districts is unduly raised, owing to the number of deaths registered in hospitals and other large institutions within their limits.

A reprint of the table published in my annual summary for 1874 showing the number of Deaths registered in all public institutions of London is appended to this report.† In the 52 weeks of that year 13,359 deaths were registered in 152 public institutions. Of every 1000 of these deaths, 571 occurred in fifty-two workhouses, 5 occurred in twelve prisons, 6 in two military asylums, 323 in thirty-seven general hospitals, 29 in twenty-eight hospitals for special diseases, 6, viz., 1 woman and 5 children, in five lying-in hospitals, 15 in four naval and military hospitals, 9 in three hospitals for foreigners, and 36 in nine lunatic asylums.

Progress of Registration.

Names on the Registers, and Searches.—The names of the 1,785,608 persons, whose marriages, births, and deaths were recorded in the registers during the year 1874, have been inscribed in printed alphabetical Indexes deposited at this office.

These records, for the convenience of public reference, extend from the middle of the year 1837 to the end of 1874, and comprehend an aggregate number of names amounting to 52,278,834.

The annexed results show how rapidly the annual number of searches at this office is increasing. They are exclusive of searches in non-parochial registers, and of searches for purposes connected with the Factory Acts.

Years.	Total Number of Searches.	Average Annual Number.
1845–9	4,758	952
1850–4	8,344	1,669
1855–9	17,425	3,485
1860–4	35,127	7,025
1865–9	56,544	11,309
1870–4	91,458	18,292

* See pp. 99–118. † See Preliminary Tables No. 37.

A considerable number of applications for birth certificates are made by candidates for civil service clerkships, for boys about to be apprenticed, and for boys about to be employed as messengers, &c. for post office purposes.

Of the 21,518 searches in 1874, certificates were granted in 17,190 instances. Registration certificates of 7539 births, 7046 deaths, and 2605 marriages were issued.

The total number of searches in 1874 (including those relating to the non-parochial and other records) was 22,354 and the number of certificates granted was 17,730.

The amount received as fees and paid into Her Majesty's Exchequer for searches and certificates in the year 1874 was 3,364*l.* 7*s.*

For a complete list of all the various public registers and records in my custody, I refer to my 34th Annual Report (pp. xxi–ii).

United Kingdom.

The estimated population of the United Kingdom at the middle of the year 1874 was 32,426,369. The emigration statistics of Ireland show that 73,184 natives left that country during the year, against 90,149 in the year 1873.

The number of births registered in Ireland in 1874, was only 141,288, or 26·6 per 1000 of population, the number of deaths registered was 91,961, or 17·3 per 1000. The excess of births over deaths registered was 49,327. The number of marriages returned was only 24,481, the marriage-rate being 9·2 per 1000. The above numbers are considerably understated, and the Registrar General of Ireland, in his last report, continues to direct attention to the defective state of civil registration.*

The estimated population of Scotland in 1874 was 3,462,916. The birth-rate of Scotland was lower than that of England, its death-rate was higher—23·3 against 22·3 per 1000 of population. The marriage-rate (persons married to 1000 persons living) in England was, as usual, considerably higher than that in Scotland—17·1 against 15·2.

The Army.

The particulars of the deaths in the Army abroad are not returned to this office, but His Royal Highness the Field Marshal Commanding-in-Chief has favoured me with returns, distinguishing the numbers who died in Great Britain, Ireland, and abroad. The average strength of the army at home and abroad in the year 1874, was 186,389, and the number of deaths was 2136; the rate of mortality was therefore 11·5 per 1000 of mean strength; nearly the same as that in 1873.

At home, the average strength was 97,635, the deaths were 1007, and the rate of mortality per 1000 of mean strength was 16·1 among officers, and 10·0 among non-commissioned officers and men, against an annual average of 9·2 and 11·4 respectively in the twelve years 1861–72, so the mortality of officers was considerably above the average, while the mortality of the non-commissioned officers and men was below the average. The mortality in the year 1874 was higher than that of the previous year. This—according to the Army Medical Department Report—was chiefly attributable to the unfavourable causes affecting the health of the general population in England as shown in a higher death-rate. The mortality of the army at home was also somewhat unduly raised by "*accidents*," and by many invalids from abroad joining their depôts instead of going to

* See Eleventh detailed Annual Report of the Registrar General of Ireland, abstracts of 1874, p. 15.

Netley, the result being that more deaths were attributed to the force serving at home than were due to illness contracted there.

Abroad the mortality of the army was below the average during the year 1874. The strength was 88,754, the deaths were 1129, and the rate of mortality per 1000 was 13·8 among officers, and 12·7 among non-commissioned officers and men, against an annual average in the twelve years 1861–72 of 14·0 and 19·3 respectively.

The Navy.

Dr. Mackay, the Deputy Inspector General of the Royal Navy in his Report to Sir A. Armstrong, the Director-General of the Medical Department, says that the general sanitary condition of the service afloat was very satisfactory during the year 1874.

The total force was 44,530, and the deaths were 422, so the rate of mortality was 9·4 per 1000 against 8·3 in the previous year.

This increase of 1·1 per 1000 was mainly due to an outbreak of yellow fever in the receiving ship permanently stationed at Rio de Janeiro. The highest rate of sickness occurred in the China Station.

The operations in connection with the Ashantee Campaign on the West Coast of Africa raised the ratio from invaliding, but the mortality there was lower than in the preceding year.

The number of deaths in the total force from disease was 301, and from wounds, injuries, and drowning 121. The death-rate from disease was 6·7 per 1000, and from violence 2·7 per 1000, against 6·0 and 2·3 respectively in 1873.

Of the 301 deaths from disease 20 were referred to enteric fever, 13 to yellow fever, 18 to remittent fever, 63 to consumption, 21 to heart disease, 12 to aneurism, 33 to pneumonia, 10 to dysentry, 14 to stomach disease, 9 to kidney disease, and 3 to delirium tremens. In every 100 deaths 28·7 were from wounds, injuries, or drowning.

The mean force employed on the *home* station was 22,500, and the deaths were 175, being in the proportion of 7·7 per 1000, against 6·1 in the previous year.

The annexed Table shows the mortality at the different Stations during the years 1873 and 1874:—

Stations.	Deaths per 1,000 Force.

* Including the deaths by the loss of Her Majesty's ship "Captain."
† Including the deaths by the loss of Her Majesty's ship "Bombay."

Births and Deaths of British Subjects at Sea.

Marine Register Book.—The number of returns relating to births and deaths of British subjects at sea transmitted to me by captains or commanding officers of British vessels, previously to the passing of the new Registration Act is very imperfect. Particulars of only 111 of such births, and 301 of such deaths, were reported to me in 1874, whereas the number of births and deaths of British subjects at sea reported to the Registrar-General of Merchant Shipping and Seamen was 510 and 1733 respectively. These records will be more complete now that the Registration Act of 1874 is in operation, for by the 37th section of that Act every captain or master, or other person having charge of a ship and failing to forward the necessary particulars, is liable to a penalty not exceeding 5*l.* for each offence.

Compared with the previous year there is an increase in the number of births and deaths reported to the Registrar-General of Merchant Shipping and Seamen in 1874 of 201, and 532, respectively, so, although the Registration Act did not come into operation until January 1875, it is probable that more care has already been exercised to secure correct returns.

Mercantile Marine.—The number of mariners at sea, exclusive of masters, in the year 1874, as reported by the Registrar-General of Shipping and Seamen, was 203,606. The deaths were 4602, and the rate of mortality was 22·6 per 1000 strength : this rate was above the average (21·5) of 23 years.

The number of mariners in the merchant service, exclusive of masters, whose deaths were referred to drowning, together with the mortality by drowning in the Royal Navy in each of the years 1866–74, are shown in the annexed Table.

Deaths by Drowning in the Nine Years 1866–74.

Years.	Merchant Service.							Royal Navy.		
	Strength.	Deaths.			Mortality per 1000 Strength.			Strength.	Deaths.	Mortality per 1000 Strength.

1868 -	197,502	1785	1141	2926	9·0	5·8	14·8	51,220	78	1·5
1869 -	195,490	1770	1069	2839	9·0	5·5	14·5	48,820	75	1·5
1870 -	195,962	1655	989	2644	8·5	5·0	13·5	46,710	564*	12·1
1871 -	199,738	1500	976	2476	7·5	4·9	12·4	47,460	49	1·0
1872 -	203,720	1324	973	2297	6·5	4·8	11·3	46,830	67	1·4
1873 -	202,239	2231	1032	3263	11·0	5·1	16·1	45,440	48	1·1
Average in the 8 Years 1866-73 -	198,420	1656	1063	2719	8·3	5·4	13·7	48,369	129	2·7
1874 -	203,606	1819	1040	2859	8·9	5·1	14·0	44,530	78	1·8

* Including the deaths by the loss of Her Majesty's ships "Captain" and "Slaney."

In the 8 years 1866–73, 21,748 lives were lost in the merchant service by drowning, 13,244 by wreck, and 8504 by accident : the average annual number drowned in those years was 2719 or 13·7 per 1000 strength. The proportional number lost by wreck was 8·3 and by accident 5·4 per 1000.

The total loss in 1874 was 2859 lives, or 404 less than in the previous year, and as there was a decrease of 412 in the number of lives lost by *wreck*, it may be assumed that greater precautions were taken by the owners or masters of vessels to ensure the seaworthiness of their ships.

The average annual rate of mortality by drowning in the eight years 1866–73 in the Royal Navy was 2·7 per 1000 strength, so the risk of death by drowning in the merchant service was about *five times* as great as it was in the Royal Navy.

Wills.

Mr. Leslie in his annual report of Judicial Statistics for 1874, publishes a return from the Senior Registrar of the Court of Probate, showing that the number of probates and administrations granted at the Principal Registry during the year was 17,029. The value of the effects was sworn under 67,027,730*l.*

The returns furnished by the district Probate Registrars record the number of probates and letters of administration granted in the 40 district registries during the year as 25,972. The value of the property under which these probates and administrations were sworn was 52,343,775*l.*

The results for the Principal and District Registries combined were—probates and administrations 43,001—value of effects sworn under 119,371,505*l.* The average value of each being 2776*l.* against 2894*l.* in the previous year. The proportion of the cases in which people above the age of 21 left wills, or left estates on which letters of administration were taken was 1 in 6, or 16·1 per cent.

Printed Calendars of all grants of probates and administrations from the year 1858 to the present time, showing the names and descriptions of the testators and intestates alphabetically arranged, together with other particulars, are deposited for public reference at this Office.

EUROPEAN STATES.

The details relating to vital statistics in Foreign States will be found in a series of tables on pages cxxiii–cxxviii. The annexed Table shows the annual rates, per 1000 of population, of persons married, births, and deaths in the various States from which returns have been received.

European States.

Countries.	Average Annual Rates per 1000 Population in the Years 1853–74.								
	Persons Married.			Births.			Deaths.		
	In the 20 Years 1853–72.	In the Years 1873.	1874.	In the 20 Years 1853–72.	In the Years 1873.	1874.	In the 20 Years 1853–72.	In the Years 1873.	1874.
England and Wales	16·9	17·6	17·1	34·8	35·5	36·2	22·4	21·1	22·3
Denmark - -	15·9	16·2	16·4	31·6	30·7	30·8	20·3	18·6	19·9
Sweden - - -	14·1	14·6	14·5	32·0	30·8	30·9	20·4	17·2	20·3

Spain* - - -	15·1	—	—	37·2	—	—	29·7	—	—
Italy* - - -	15·4	15·8	15·2	37·4	36·3	34·9	30·2	30·0	30·3

* The mean annual rates for Spain are for the ten years 1861–70, those for Italy are for the ten years 1863–72.

In comparing the average annual results in the 20 years 1853–72, with those for the years 1873 and 1874, it must be borne in mind that deaths in war contributed to raise the mortality unduly in Austria in 1866; in Prussia in 1866, 1870, and 1871, and in France in 1870 and 1871. For explanation as to any remarkable increase in the respective rates from epidemics, see notes at foot of Tables, pp. cxxiv-cxxviii.

A comparison of the results of civil registration in the year 1874, in the several European States, with those in the previous year (see table on preceding page), shows that the marriage-rate (persons married to 1000 living) fluctuated but little except in Prussia, and in France, in each of which Countries it fell about 1 per 1000; but the rates in each Country, except Italy, were higher than the average observed in the 20 years 1853–72.

The marriage-rate was highest in Prussia and Austria, and lowest in Sweden and Italy.

The birth-rates were nearly the same as those of the previous year, except in Italy, where there was a fall of 1·4 per 1000. The highest birth-rates were in Prussia and Austria, where the marriage-rates were highest.

The death-rates in Austria, Prussia, the Netherlands, and France were considerably lower than in 1873, and also lower than the average of 20 years. In the other States the mortality was near the average.

Density and Proximity.

A comparison of the inhabitants of a country with the area on which they dwell, shows the density and proximity of population, and these differ considerably in different countries.

Density and Proximity of Population in different European States in 1874.

European States.	Area in Square Kilometers.*	Estimated Population in 1874.	Hectars to a Person.†	Persons to a Square Kilometer.	Proximity or nearness of Person to Person in Meters.‡
England and Wales -	151,020	23,648,609	·6386	156·594	85·87
The Netherlands - -	32,811	3,767,263	·8710	114·817	100·29
Italy - - - -	291,821	27,289,958	1·0693	93·516	111·12
Prussia - - - -	347,004	25,185,522	1·3778	72·580	126·13
Austria - - - -	300,169	21,169,341	1·4179	70·525	127·96
France - - - -	528,333	36,397,000	1·4516	68·890	129·47
Denmark - - -	34,649	1,860,600	1·8623	53·697	146·64
Spain (1870) - - -	512,958	16,935,613	3·0289	33·016	187·02
Sweden - - - -	405,773	4,341,559	9·3462	10·700	328·51

Note.—The areas of Sweden, Prussia, and the Netherlands are exclusive of lakes and rivers; the area of Denmark is exclusive of lakes,

The areas in the above Table are those which were recently supplied by the Statistical Departments of the respective countries to the Board of Trade. They are here given in square kilometers, and the density and proximity in hectars and meters, in conformity with a resolution of the International Statistical Congress.

England has many cities, and there the density of population was greatest, for on an average the number of inhabitants to a square kilometer was 157. The Netherlands are second on the list 115, Italy is third 94; then follow Prussia 73, Austria 71, France 69, Denmark 54, Spain 33. In Sweden, where the population is sparse, there were only 11 persons to a square kilometer.

* A square kilometer equals ·3861162 of a square mile, or a square of 1000 meters to the side; a square kilometer also equals 100 hectars.

† A hectar contains nearly 2½ or 2·4711436 acres.

‡ A meter is a little longer than a yard; it equals 1·093633 yard.

The proximity or nearness of person to person was, therefore, closest in England, where, on the hypothesis of equal distribution, the people were 86 meters apart, in the Netherlands 100, Italy 111, Prussia 126, Austria 128, France 129, Denmark 147, Spain 187, and Sweden 329.

In the rural districts of a country, wages are comparatively low, skilled labour is at a discount, means are not afforded for earning large sums, and this is generally expressed in a low marriage-rate. The same argument holds good, though not to the same extent, with reference to small town districts, but in the principal towns, and large manufacturing and mining districts, skilled labour is at a premium, high wages are earned, commercial prosperity reigns, large numbers of women at childbearing ages congregate, and the people marry in high proportions; so, although the marriage and birth-rates of a country are invariably highest where the population is dense, still it cannot be said that density is the chief cause.

AREA and DENSITY in 1874, in different EUROPEAN CITIES (*arranged according to Area*).

CITIES.	AREA in Square Miles.	PERSONS to an Acre.
London - - -	122·0	43·6
Paris - - - -	30·1	96·0
Berlin - - -	22·9	56·6
Vienna - - -	21·3	47·2
Munich - - -	19·9	14·5
The Hague - -	8·6	17·3
Turin - - - -	6·9	48·8
Amsterdam - -	5·5	79·6
Rome - - - -	5·4	71·2
Brussels - - -	3·5	83·5

Density of population, however, does greatly influence the mortality of a country, and it is instructive to compare the relative degree of density in different European cities with the death-rate. This has been done in the annexed table for the year 1874, but no conclusions can be drawn from such comparison until the average annual rate of mortality can be ascertained for a series of years, for prevailing epidemics greatly interfere with the results for a single year.

DENSITY, PROXIMITY, and MORTALITY in different EUROPEAN CITIES in 1874 (*arranged according to Density*).

CITIES.	AREA. Square Kilometers.	Estimated Population in 1874.	DENSITY of POPULATION. Persons to a Hectar.	Persons to a Square Kilometer.	Proximity or nearness of Person to Person in Meters.	Mortality to 1000 Persons living.
Paris - - - -	78·02	1,851,792	237·3	23,734·8	6·97	22·4
Brussels - - -	8·97	185,000	206·3	20,630·1	7·48	23·9
Amsterdam - -	14·34	282,000	196·7	19,665·3	7·66	26·7
Rome - - -	14·11	248,307	175·9	17,594·0	8·10	27·5
Berlin - - -	59·20	828,000	139·9	13,986·7	9·09	32·9
Turin - - -	17·79	214,425	120·5	12,053·1	9·79	26·7
Vienna - - -	55·25	644,356	116·6	11,662·6	9·95	24·6
London - - -	315·97	3,400,701	107·6	10,762·8	10·36	22·5
The Hague - -	22·23	94,895	42·7	4,268·8	16·45	26·5
Munich - - -	51·56	185,000	35·9	3,588·3	17·94	(1875.) 37·4

Arranging the cities in their order of density, it appears that Paris is the most populous, with 237 persons to a hectar, Brussels stands next in order of density with 206 persons to a hectar, then follow Amsterdam with 197, Rome 176, Berlin 140, Turin 121, and Vienna 117. London is low down on the list with 108 persons to a hectar, but the Hague and Munich have the lowest densities, viz. 43 and 36 persons to a hectar respectively.

The proximity or nearness of person to person in Paris was 7·0 meters, in Brussels it was 7·5 meters, Amsterdam 7·7, Rome 8·1, Berlin 9·1, Turin 9·8, Vienna 10·0, London 10·4, the Hague 16·4, Munich 17·9.

I have the honour to be,
Sir,
Your faithful servant,
GEORGE GRAHAM,
Registrar-General.

Remarks on the Meteorology of 1874.

By James Glaisher, Esq., F.R.S., &c.

The year 1874 was remarkable first for the extraordinary period of cold weather from the middle of November till the end of the year, and for the deficiency of rain during the whole year.

The following remarks with regard to excess or deficiency of atmospheric pressure, temperature, and rain-fall, are primarily derived from the observations at the Royal Observatory, Greenwich, but they may be taken as applying generally to the whole country.

Atmospheric Pressure.—The reading of the barometer decreased from 30·0 in., on January 1st, to 29·12 in. on the 3rd; increased to 30·2 in. on the 6th; was generally about 29·7 in. and 29·8 in., from the 8th to the 15th; decreased to 29·17 in. on the 16th, passed above 30·0 in. on the 21st, and continued at or above 30·0 in. till the end of the month. In February the readings continued high till the 13th, and after this day they were alternately above and below their averages till the end of the month. In March the readings were somewhat below their averages on the 8th, 9th, 10th, and 11th; again on the 19th, 29th, and 31st, on all other days they were above. During the month of April the barometer readings were variable, but generally below their averages from the 1st to the 14th; from the 15th to the 28th, a steady increase was experienced, and the maximum reading for the month 30·2 in., was attained on the last mentioned day. Throughout the month of May the readings were alternately above and below their averages. In June the barometer readings were above their averages from the 1st to the 23rd, below from the 24th to the 29th, and again above on the 30th, the highest reading in this month was 30·4 in., and the lowest 29·4 in., thus the range was 1·0 in. From the 1st to the 19th of July, the readings were variable, and generally above their averages, from the 20th to the 29th, they were below their averages, on the 30th and 31st the values were again in excess, but only to a small amount. From the 1st to the 14th of August, the readings were generally below their averages, the minimum occurring on the last-named day, viz., 29·3 in.; they were above their averages from the 15th to the 26th, the maximum value occurring during this period, 30·3 in., on the 21st; and they were again below from the 27th to the end of the month. During the period comprising the 1st to the 12th of September the values were all below their averages, from the 13th to the end of the month they were alternately above and below their average readings for short periods; the readings of the barometer from the 1st to the 16th of October were alternately above and below their averages, and from the 17th to the last day of the month, they were above (with the exception of two days, viz., 21st and 22nd, which were 0·33 in., and 0·19 in. below). From the 1st to the 11th of November the values were all above their averages, from the 12th to the 30th, below and above for short periods. From 1st to the 25th of December the readings were below their averages, except on a very few days, and from the 26th to the end of the year they were above.

Temperature.—The warm period which set in on 15th of December 1873, continued with very few and slight exceptions throughout the whole of January 1874, and until the 3rd day of February; the average daily excess of mean temperature for this period of 51 days was 4°·6, and for the 34 days from 1st of January to 3rd of February was 4°·7; during this lengthened warm period, the direction of the wind was usually a compound of the S. and W. On the 4th of February the wind was N.E., and a cold

period began, which continued till the 12th day, the average daily deficiency was $6\frac{1}{2}^{\circ}$. On the 12th day of February the direction of the wind changed to S.W., and the temperature passed above the average, and continued above for 19 days, its average daily excess was $3^{\circ}\cdot1$; this was followed by 10 days cold weather, from 4th of March to the 13th, and during this time snow fell generally over the country; from March 14th to the end of the month the weather was warm, the excess of daily temperature was $5\frac{1}{4}^{\circ}$ nearly.

The mean temperature of January was remarkably high, being $41^{\circ}\cdot7$, or $5^{\circ}\cdot4$ *above* the average of 103 years, and during this period there have been only 9 Januaries of similar warmth, viz., 1796, $45^{\circ}\cdot3$; 1804, $43^{\circ}\cdot2$; 1834, $44^{\circ}\cdot4$; 1846, $43^{\circ}\cdot7$; 1851, $42^{\circ}\cdot9$; 1852, $42^{\circ}\cdot0$; 1853, $42^{\circ}\cdot4$; 1863, $41^{\circ}\cdot8$; and 1866, $42^{\circ}\cdot6$. The warm period which began on 13th March continued with very slight exceptions throughout April, the average daily excess of temperature for this month being 4°. On several days towards the end of the month the days were warm, the excesses being as large as 10° and 13°. On 1st May a cold period set in, and continued without exception till the 21st; these three weeks of low temperature were very painful, following so immediately the heat of the preceding seven weeks. A period of warm weather occurred from the 22nd May to 11th June, the average daily excess was $4\frac{1}{2}^{\circ}$, and from this time to the end of the month low temperatures prevailed, the deficiency of daily temperature for this period being $4\frac{1}{2}^{\circ}$.

The mean temperature of April was $50^{\circ}\cdot0$, and on travelling back 103 years we find that there have been but five Aprils of so high a temperature as in the year 1874.

The year 1779,	$50^{\circ}\cdot7$	The year 1865,	$52^{\circ}\cdot3$
„ 1821,	$50^{\circ}\cdot4$	„ 1869,	$50^{\circ}\cdot3$
„ 1844,	$51^{\circ}\cdot7$		

The cold weather which prevailed during the last three weeks of June, was succeeded at the beginning of July by weather which was generally warm, but frequently cold; the average daily excess over the average daily temperature till 2nd of August was $2\frac{1}{2}^{\circ}$. A period of moderately cold weather followed, (and with the exception of a few warm days), lasted till 19th September, the average daily deficiency for the 48 days ending September 19th was 1°; and from the 20th to the end of the month the weather was warm, the daily excess being 5°. From the 10th October to 20th November the weather was warm, with the exception of a very few days which were somewhat cold; but on November 21st a severe cold period set in and lasted with but few exceptions till 1st January 1875, the average daily temperature of the 42 days ending this day was $33^{\circ}\cdot5$, being $6^{\circ}\cdot6$ below the average; the temperature was on some days in December as much as 14° in defect of the average, and on December 31st it was as much as $16\frac{1}{2}^{\circ}$ in defect, the mean temperature of this day was only $21^{\circ}\cdot1$, the day being painfully cold.

Since the year 1771, there have been only 7 instances of so low a mean temperature as in December 1874, which was $33^{\circ}\cdot2$. In the year

1874, $31^{\circ}\cdot0$	1799, $32^{\circ}\cdot8$	1844, $33^{\circ}\cdot0$
1788, $29^{\circ}\cdot0$	1840, $33^{\circ}\cdot3$	1846, $32^{\circ}\cdot9$
1796, $30^{\circ}\cdot4$		

Rain-fall.—The fall of rain in January was 1 in., being only one half of the average fall; in February it was 0·94 in., being about two thirds of the average, and in March it was 0·45 in. only, being less than one third of the average. The total fall in the three months ending March 31st was 2·39 in.; the average fall for these three months is 5·0 in., so that the fall is less than one half of its usual amount; back to the year

1815 the instances of falls in these three months, not exceeding 3 in., were as follow :—

1820 it was	3·0 in.	1829 it was	2·4 in.
1854 „	2·9 in.	1874 „	2·4 in.

So that the only instance of so small a fall in these months was in the year 1829.

In April the fall was 1·4 in., being 0·3 in. below the average ; in May it was 0·4 in. only, being 1·7 in. below the average ; and in June it was 2·4 in., or 0·5 in. above the average. Of the remarkable deficiency in May there have been only 9 instances of falls of rain of less than one inch back to 1815, viz. :—the fall in the year

1823 was	0·8 in.	1844 was	0·4 in.	1857 was	0·6 in.
1829 „	0·6 in.	1848 „	0·4 in.	1870 „	0·5 in.
1833 „	0·2 in.	1851 „	0·8 in.	1871 „	0·6 in.

In July the fall of rain was 2·6 in., being 0·1 in. above the average ; in August it was 1·4 in., being 1·0 in. below the average ; and in September it was 2·2 in., being 0·2 in. below the average. The fall of rain in the last three months of the year was 7·2 in., being 0·2 in. in excess of the average ; the total fall in the year was 20·0 in., being 5·4 in. below the average annual fall, and, therefore, the fall of rain during the whole year was remarkably deficient, this deficiency having prevailed all over the country.

The total falls of rain in the year ranged from 51·29 in. at Stonyhurst, to 17·78 in. at Royston.

PRELIMINARY TABLES.

TABLE 1.—Estimated **Population,** and Number of **Marriages, Births,** and **Deaths** registered in **England** in each of the Thirty-seven Years **1838-74.**

YEARS ended Dec. 31st	Estimated POPULATION in ENGLAND in the Middle of each Year.*	MARRIAGES.	PERSONS MARRIED.	BIRTHS (exclusive of Still-born).	DEATHS	EXCESS OF BIRTHS OVER DEATHS.
1838	15,287,899	118,067	236,134	463,787	342,760	121,027

Mean in 37 years	16·5	33·9	22·3	61	30	45

NOTE.—The Table may be read thus:—In the year 1838 to every 10,000 persons living there were 154 persons married, 303 births, and 224 deaths; the number of persons living to every person married, birth or death, was 65, 33, and 45 respectively. The rates in this Table have been calculated upon the estimated populations given in Table 62, but no corrections have been made for the difference between an ordinary year of 365 days and leap year.

TABLE 3.—**Marriages** in **England** in each of the Thirty-four Years **1841-74**; those solemnized according to, and not according to, the Rites of the Established Church; with other details respecting the Marriages in the Churches of the Established Church.

Mean Annual Rate per 1000 in each quarter during the 37 years					13·7	16·9	15·9	19·6

Note.—The three months January, February, and March contain 90 days, and in leap year 91 days; the three months April, May, and June 91 days; and each of the last two quarters of the year 92 days. For this inequality a correction has been made in the above calculations.

* These rates may thus be read without reference to the decimal points:—In the March quarter of 1838, to 10,000 persons living, 124 persons were married.

TABLE 6.—**Marriages** in **England**. The Proportion per Cent. of **Minors** of each Sex, of Males and Females who **signed the Register with Marks,** and of Persons who were **Widowers** or **Widows,** in each of the Thirty-four Years **1841–74.**

Mean Annual Rate per 1000 in each Quarter during the 37 years					35·6	35·2	32·7	32·5

* These rates may thus be read without reference to the decimal points:—In the March quarter of 1838, to 10,000 persons living 303 births were registered. In the calculation of these rates a correction has been made for the varying number of days in the different quarters, *see* note to Table 5.

TABLE **14.—Proportional** Number of **Births** in **England** in each **Quarter** to **1000 Births** in the **Average Quarter*** of each of the Thirty-seven Years **1838–74.**

YEARS.	NUMBER OF BIRTHS IN THE AVERAGE QUARTER.	PROPORTIONAL NUMBER OF BIRTHS.				
		In the AVERAGE QUARTER (assumed to be 1000).	FIRST QUARTER ending March 31.	SECOND QUARTER ending June 30.	THIRD QUARTER ending Sept. 30.	FOURTH QUARTER ending Dec. 31.

Average proportion in 37 years, 1838–74 –			23·3	21·4	104	109

The Table may be read thus:—In the year 1838 to every 1000 males living there were 23·4 deaths; to every 1000 females living there were 21·5 deaths; and to each 100 females who died there were 105 deaths of males. The last column shows the *relative* mortality of *males* and *females;* and that out of equal *numbers living* the deaths of males were as 109 to every 100 deaths of females in 1838.

TABLE 19.—**Deaths of 69 Persons** (16 Males and 53 Females) RETURNED as **Aged 100 Years and upwards** in ENGLAND and WALES during the Year **1874**.

District Numb.	DISTRICT.	DATE OF DEATH.	PLACE OF DEATH.	SEX.	STATED AGE.	OCCUPATION.	CAUSE OF DEATH.
1	Kensington	14 Jan.	16, Thomas Street	F.	102	Wid. labourer	Age.
5	Marylebone	12 May	14, Carlisle-mews	F.	100	Wid. fishmonger	Obstn. of bowels.
7	Pancras	1 Dec.	11, Little Drummond Street	F.	102	Wid. weaver	Age.
9	Hackney	17 March	16, Shaft Road	F.	100	Wid. painter	Age.
,,	,,	24 Dec.	1, Tryons Terrace	M.	102	Builder	Age.
13	London City	7 July	1, Saddlers Hall Court	F.	102	Wid. general dealer	Age.
21	St. Saviour Sthwrk.	15 Sept.	Workhouse	F.	103	Servant	Bronchitis.

1866–70	23·7	73·0	7·9	4·3	7·1	10·1	13·6	19·6	33·5	68·2	148·7	308·8	419·0

Note.—The Table may thus be read:—Of each 1000 male children living under five years of age, 72·3 died in each of the 37 years 1838-74; in the five years 1841-45 this proportion averaged 69·0 per 1000; and in the five years 1866-70 it was 73·0.

* The population used in these calculations is deduced from the ascertained rates of increase observed in the 30 years 1841-71 (*see* Table 62, pp. xc-i), distributed in the several groups of ages according to the proportions found to prevail at the last four Censuses.

TABLE 23.—ENGLAND.—**Annual Rate** of **Mortality** per 1000 of **Males** living at Twelve groups of Ages in each of the Thirty-seven Years **1838–74.***

Note.—The Table may thus be read :—Of each 1000 female children living under five years of age, 62·4 died in each of the 37 years 1838–74; in the five years 1841–45 this proportion averaged 58·8 per 1000; and in the five years 1866–70 it was 63·4.

* The population used in these calculations is deduced from the ascertained rates of increase observed in the 30 years 1841–71 (*see* Table 62, pp. xc-i), distributed in the several groups of ages according to the proportions found to prevail at the last four Censuses.

TABLE 25.—ENGLAND.—**Annual Rate** of **Mortality** per **1000** of **Females** living at Twelve groups of Ages in each of the Thirty-seven Years **1838–74.***

Mean Annual Rate per 1000 in each Quarter during the 37 years					24·8	22·0	20·6	21·9

* These rates may thus be read, without reference to the decimal points:—In the March quarter of the year 1838, in 10,000 of the population 262 deaths were registered. A correction has been made in these calculations for the inequality in the number of days in the different quarters, *see* note to Table 5.

TABLE 29.—**Proportional Number** of **Deaths** in **England** in each **Quarter** to **1000 Deaths** in the **Average Quarter*** of each of the Thirty-seven Years **1838–74.**

E.—The letter M or P affixed to the name of each Town denotes whether the limits, which the District or Sub-districts in the last n approximately represent, are Municipal or Parliamentary.

he figures in this column are the numbers enumerated at the Census in April 1871, raised to the middle of 1874 by the addition of es the annual rate of increase which prevailed between 1861 and 1871. A decrease of population between 1861 and 1871 was shown in t, Devonport, Dudley, Coventry, Macclesfield, and Ashton-under-Lyne; in these instances the enumerated population has been proper- y depressed on the same principle.

he rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County als and Lunatic Asylums, situated within the Districts or Sub-districts here taken as representing the town, or by the exclusion or n of a proportion of the deaths in Union Workhouses in cases where a portion of the Union only is embraced by the area taken, re the Workhouse is situated outside that area.

NOTE.—The deaths in Birmingham, Manchester, and Bristol include paupers belonging to those cities who died in Workhouses situat outside the Municipal boundaries.

* The figures in this column, excepting those for Dublin, are the numbers enumerated at the Census in April 1871, raised to the mid of 1874 by the addition of 3¼ times the annual rate of increase which prevailed between 1861 and 1871. The population of Dublin is tak as stationary at the number enumerated in 1871.

Average Number living to One Annual Death in 35 years	41	44	44	40	38	41

NOTE.—The populations upon which these rates of mortality have been calculated are deduced from the numbers enumerated at the four Censuses of 1841, 1851, 1861, and 1871. The deaths used are those registered during the natural years from 1st January to 31st December.

Hampstead and Lewisham did not form part of London prior to 1847. Certain alterations affecting the West and Central groups of districts were made in the year 1868, but no corrections have been made in the results given in this Table for any year prior to 1861.

TABLE 40.—LONDON.—**Deaths** and **Meteorology** in the Thirty-five Years **1840-74.**

Total	1,519,305	5,286,496	1,096,912	210,198	8,112,911

Average annual emigration from the United Kingdom — From 1815 to 1874 - 135,215; For the 10 years ending 1874 - 242,120

* The Customs' returns do not distinguish the emigration to Australia during the 10 years 1815–24, but it appears from other sources that the emigrants who went to this country were in 1821, 320; in 1822, 875; in 1823, 543; in 1824, 780; and in 1825, 458 persons. These numbers are not included in the totals of this Table.

TABLE 49.—**Emigration** in **1874.**

* The deaths of soldiers, marines, and seamen from the Royal Navy, who were passengers in British Merchant Ships, were 33 in 1856, 59 in 1857, 156 in 1858, 196 in 1859, 196 in 1860, 69 in 1861, 122 in 1862, 116 in 1863, 96 in 1864, 140 in 1865, 184 in 1866, 97 in 1867, 81 in 1868, 51 in 1869, 27 in 1870, 24 in 1871, 1 in 1872, 6 in 1873, and 11 in 1874. The number is 1,665 in nineteen years, which, if added to the 12,374 above, makes 14,039, the total number of deaths of British subjects at sea in 1856-74, exclusive of those of merchant seamen. The Entries in the "Marine Register" of Births occurring in 1874 were but 111, and of Deaths 301.

* Deduced from a return of the number of accounts of wages and effects of seamen (exclusive of masters) dying before the termination of the voyage, received by the Registrar General of Shipping and Seamen. Since 1867 the return *includes seamen dying ashore in foreign parts*, whose wages and effects are delivered to the consuls or officers of the hospitals on their discharge from their ships.

If a *seaman* die on the passage from Sunderland to Calcutta, his death is reported at Calcutta, and his wages and effects are accounted for and transmitted home, if the vessel be not to return direct to the United Kingdom. But if a *passenger* die on board a ship which does not return to a British port immediately, but trades for a time in foreign parts, considerable delay may occur before his death is reported. In all cases, however, the date is given, and in the accompanying tables the births and deaths are classed according to the years in which they occurred. In some passenger-ships women are employed as stewardesses, and are counted as part of the crew. They therefore form part of the strength in this Table, and if the death of a stewardess occur in the course of a voyage, it is included in the column of Deaths.

When a ship is lost with all persons on board, the owners return the number and names of the crew, and the names of the passengers, when known, to the Registrar General of Shipping and Seamen.

TABLE **61.**—RETURN of the AGES, RATING, and CAUSES of DEATHS of **4,602 Seamen** reported to the BOARD OF TRADE as having died in the **British Merchant Service** in the Year 1874. (*Parliamentary Return, No.* 312, *Session of* 1875.)

RATING OF THE SEAMEN WHO DIED.

Mates	366	Surgeons	13	Firemen	225
Midshipmen	1	Stewards	353	Stowaways	25
Quartermasters	18	Cooks		Unknown	780
Boatswains	127	Carpenters	128		
Able seamen	1,642	Sailmakers	41	TOTAL	4,602
Ordinary seamen	425	Minor capacities	64		
Apprentices and boys	303	Engineers	91		

AGES OF SEAMEN AT DEATH.

Under 21 years	901	Over 60 years	13
21—30 years	1,818	Unknown	631
31—40 years	815		
41—50 years	329	TOTAL	4,602
51—60 years	95		

CAUSES OF DEATH OF SEAMEN.

	Deaths.
Class I.	
ORDER 1.	
Small-pox	20
Measles	—
Quinsy (*included with diseases of Respiratory Organs, Class III., Order* 3.)	
Fever	180
Erysipelas (*included with diseases of Integumentary System, Class III., Order* 8.)	
Dysentery	92
Diarrhœa	90
Cholera	93
Ague	6
Yellow fever	193
Rheumatism	7
ORDER 2.	
Syphilis, Stricture of Urethra (*included with diseases of Urinary Organs, Class III., Order* 5.)	
ORDER 3.

TABLE 63.

ESTIMATED POPULATION OF THE UNITED KINGDOM,

(including ISLANDS in the BRITISH SEAS)

with Army, Navy, and Merchant Seamen abroad belonging thereto.*

Middle of the Census Years.	PERSONS.	MALES.	FEMALES.
1801 -	16,302,410	8,096,082	8,206,328
1811 -	18,532,522	9,194,348	9,338,174
1821 -	21,300,573	10,519,256	10,781,317
1831 -	24,423,588	12,004,025	12,419,563
1841 -	27,077,095	13,325,889	13,751,206
1851 -	27,764,034	13,656,998	14,107,036
1861 -	29,358,927	14,397,427	14,961,500
1871 -	31,914,985	15,622,725	16,292,260

* In estimating the number of men in the Army, Navy, and Merchant Service abroad, the proportion belonging to foreign countries and the colonies has been excluded. In 1811 the troops and seamen were 640,500, but as this number included natives of colonies and foreign parts, only 502,536 were taken.

The above numbers have been deduced by adding to the estimated population of the United Kingdom, as given in Table 62, the enumerated population of the Islands in the British Seas, and the Army, Navy, and Merchant Service abroad (*see* p. vii. of Vol. I. Census of England and Wales, 1871).

TABLE 64.—Logarithms of the above Populations of the UNITED KINGDOM.

NOTE.—Cholera is given as being chiefly the cause of the high rate of mortality in Denmark in 1853; in Sweden in 1853, 1857, and 1866; in Austria in 1866 and 1873; in Prussia in 1866; in the Netherlands in 1859 and 1866, where also small-pox prevailed in 1871; and in France in 1865 and 1866. War contributed to the same end in Denmark in 1850 and 1864; in Austria in 1866; in Prussia in 1866, 1870, and 1871; and in France in 1870 and 1871.

M. V. Falbe-Hansen remarks that an addition of territory containing a population of about 8000 was made in 1864, and the facts relating to these are shown in this Table from 1860.

* The populations for these years were enumerated at the respective Censuses.

† Cholera was epidemic in the year 1853, and war raged in the years 1850 and 1864.

NOTE.—Previous to 1st January 1860, children who died within 24 hours after birth were counted as still born.

TABLE **68.**—SWEDEN. **Population ; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1850** to **1874.**

(Supplied by Dr. Berg, Chief of the Statistical Department of Sweden.)

* The populations for these years were enumerated at the respective Censuses. Dr. Berg attributes the decrease observable in the population in the years 1868 and 1869 to failure of crops and consequent emigration.

† Cholera was epidemic in the years 1853, 1857, and 1866. In 1874 small-pox caused 4063 deaths (the highest number in any year since 1801), scarlet fever 2418 deaths, and typhus and typhoid fever 2149 deaths.

TABLE **69.**—AUSTRIA. **Population ; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1853** to **1874.**

NOTE.—The Returns for Austria include Hungary, Croatia, Slavonia, and Transylvania from 1853 to 1862 inclusive ; since 1862 the returns exclude those portions of the empire. Until 1864 the States of Italy were included ; since 1864, however, they are excluded.

* Census years.

† Dr. Ficker attributes the excessive mortality in the year 1866 to cholera and the war.

‡ Cholera caused the deaths of 107,007 persons in the year 1873.

TABLE 70.—PRUSSIA. **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1853** to **1874.**

NOTE.—The population in the four years 1862-65 and in the years 1867-69 was estimated by means of the average annual rate of increase observed between the two enumerations of 1861 and 1866. The returns since the year 1860 include the three newly annexed departments. The deaths of Frenchmen abroad, civil or military, are registered in the books of the Commune in which they were last domiciled.

* Census years. † Cholera was prevalent in 1865-66, and war raged in 1870 and 1871.

TABLE **73.**—SPAIN. **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Ten Years **1861** to **1870.**

1873*	—	—	—	—	—	—	—	—
1874*	—	—	—	—	—	—	—	—

NOTE.—The Population enumerated at the Census of 1860 was 15,673,536. The estimated Population for the Years subsequent to 1861 has been deduced from the Excess of Births over Deaths in each Year. The decline of registered marriages in 1870 is believed to be due to the introduction of civil registration, which occurred during that year.

* No figures have been received for years subsequent to 1870, in consequence of the disturbed condition of the country.

TABLE **74.**—ITALY (inclusive of VENETIA). **Population; Number,** and **Proportion** per 1000, of **Persons Married, Births,** and **Deaths,** in each of the Years **1863** to **1874.**

1874	27,289,958	207,997	415,994	951,658	827,253	15·2	34·9	30·8

NOTE.—The Population was estimated in the following manner: To the population of Italy, exclusive of Venetia, according to the census on 31st December 1861, was added the population of Venetia, according to the Austrian census in 1858, and also the excess of Births over Deaths in each year. No correction was made either for immigration or emigration. The population for 1871 is that enumerated at the census on the last day of December 1871. The population of Rome was first included with that of the kingdom of Italy in 1872.

* Census year.

† The decrease of marriages in 1866 may be attributed to the law, which then came into operation, introducing civil marriage and rendering the church marriages of no legal effect. There had been a marked increase in 1865 resulting from a wish to evade the law about to come into operation. After the 1st of January 1866 the marriages solemnized only in the churches, not being legally recognized, escaped registration; their number, which was very great in 1866 and the following year, is happily decreasing.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the District, or the greater part of the therefore differ more or less from the boundaries of Counties (proper).

† These figures have been furnished to the Registrar General by the Ordnance Survey Department. They do not include space occupied by foreshore or tidal water of rivers and creeks.

he Act of 6 and 7 Wm. IV. c. 86, in the Year ending December 31st, 1874.

‡ Where the parties to a marriage are of different religious persuasions it sometimes happens that the ceremony is performed according to the rites of both persuasions: in these cases the two ceremonies are entered as two marriages. This column also includes 61 cases of marriage after divorce, viz., 27 *divorced men* who married spinsters, 18 bachelors who married *divorced women*, 5 *divorced men* who married widows, 9 widowers who married *divorced women*, and 2 *divorced men* who married *divorced women*. For the districts in which these marriages took place, see Table 10, p. xlv, of Report.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with the Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the District, or the greater part of the population, is located. The boundaries of the Registration Counties therefore differ more or less from the boundaries of the Counties (proper).

† These figures have been furnished to the Registrar General by the Ordnance Survey Department. They do not include space occupied by foreshore or tidal water or rivers and creeks.

‡ Some of the births—especially of illegitimate children in London and large towns—escape registration.

* The *Districts* are collections of contiguous Parishes or Places combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are arranged according to their local position under the Registration Counties. The presence of Institutions in any District is indicated in this column of the Table by *H* for Hospital or Infirmary, *L* for Lunatic Asylum, and *w* for Workhouse Establishment receiving inmates from other Districts than the one in which it stands; and repetitions of these letters show the number of such Institutions in any District.

† Wherever the minus sign is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the District, instead of exceeding the Deaths, were, in fact, *less than the Deaths* to the extent stated.

II.—SOUTH EASTERN COUNTIES.—MARRIAGES, BIRTHS, AND DEATHS, 1874—DISTRICTS—*continued*.

* The Sub-districts are sub-divisions of Districts, and comprise the Parishes or Places in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse Establishment belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates a Hospital or Infirmary; *L* a Lunatic Asylum; and repetitions of any of these letters show the number of such Institutions in each Registration Sub-district.

† Wherever the minus sign (−) is prefixed to the numbers given in the Column headed "Excess of Births over Deaths," it denotes that the Births in the Sub-district, instead of exceeding the Deaths, were, in fact, *less than the Deaths* to the extent stated. The Excess of *Deaths* over Births is often attributable to the mortality in Institutions. The Deaths in the principal Institutions of England in 1874 are given on pages 99–118.

* The Sub-districts of Newton, Cheetham, Failsworth, Blackley, and Prestwich (467 *a*, 1-5) which on 1st October 1874 were constituted a Superintendent Registrar's District, were prior to that date part of Manchester District (467). In this table of Births and Deaths the facts are inserted as if the alteration had taken place on 1st January 1874.

VIII.—NORTH WESTERN COUNTIES.—BIRTHS AND DEATHS, 1874–SUB-DISTRICTS–*continued.*

No.	SUB-DISTRICTS.	Area in Statute Acres.	Population, 1871.	TOTAL		Births.				Deaths.		Excess of Births over Deaths.
						Including Illegitimate Births.		Illegitimate Births.				
				BIRTHS.	DEATHS.	Males.	Females.	Males.	Females.	Males.	Females.

DEATHS IN PUBLIC INSTITUTIONS,

1874.

THE FOLLOWING PAGES contain the numbers of deaths registered during 1874 in most of the public institutions of England. These figures will afford the means of correcting the mortality of districts and sub-districts where affected by the situation therein of these institutions, through the deaths recorded in them. The following list includes Workhouses, Hospitals, Infirmaries, and public Lunatic Asylums, while prisons, almshouses, schools, private lunatic asylums and benevolent asylums, are excluded. The list, as settled, includes 1338 institutions; of which 715 are Workhouses, Workhouse Infirmaries, or Workhouse Schools; 544 Hospitals or Infirmaries; and 79 Lunatic Asylums. The Lunatic Asylums are mostly County Asylums, but a few private Asylums which receive pauper patients are also included. In these 1338 institutions 45,865 deaths were registered during the year, or 8·7 per cent. of the total deaths in England and Wales, against 9·0 per cent. in the preceding year; 29,415 occurred in Workhouses, 11,963 in Hospitals, and 4487 in Lunatic Asylums. Each of these totals exceeded the corresponding numbers in 1873, and the proportion to total deaths was 5·5 in Workhouses, 2·3 in Hospitals, and 0·9 in Lunatic Asylums.

Deaths registered in **Public Institutions** of **England** in the **Year 1874.**

* The daughter of a labourer aged 14.

ENGLAND.—Supplementary Table of the

[The principles upon which the Causes of Death are tabled have been explained in previous Annual Reports. It will be sufficient to state now that all Diseases are classified in the Tables of Causes of Death, pp. 146–149, under 116 heads; some of these heads, however, include groups of diseases which are very distinct from one another, but which either are fatal to only a *few persons*, or are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous, that the additional numbers

(*continued at page* 152.)

Causes of Death at different Periods of Life, in the Year 1874.

would not materially interfere with the calculated proportions. Where it is desired, partial correction, however, can be made by means of the following Supplementary Table, containing the deaths from many distinct diseases, such as chicken-pox, mumps, &c. &c., which in the preceding Tables, have no separate classification, and also many of the deaths from various *forms* of disease (such as softening of the brain, *necrencephalus*, deaths from which are included under "*Brain Disease, &c.*") which in some cases are returned under other heads.]

LETTER to the REGISTRAR GENERAL on the CAUSES of DEATH in ENGLAND in 1874, by WILLIAM FARR, Esq., M.D., F.R.S. 219

TABLES (MISCELLANEOUS) 225

TABLE of CAUSES OF DEATH in ENGLAND in 1874, classified in accordance with the NOMENCLATURE drawn up by a COMMITTEE appointed by the ROYAL COLLEGE OF PHYSICIANS OF LONDON . . . 254

APPENDIX.

Letter to the Registrar General on the Causes of Death in England, by W. Farr, Esq., M.D., F.R.S.

Year 1874.

Sir,

The causes of death recur in these ages with great constancy. None of those great plagues which once swept away so many thousands of the people of England have been recently observed. At the same time, in modified forms, all the diseases that have been recorded in medical history remain; they are not easily stamped out; they are fatal year after year to certain numbers, and have to be kept under constant observation. The increase of population, the extension of navigation, the new industries, the marvellous chemical operations going on, the explosive forces, the machines, and the power of steam, every year in increased activity, have developed dangers unknown in other days; and have to be encountered by new remedies. Then nations are now so associated by intercourse that a disease generated among the lowest races in unfavourable conditions may spread to every other race, and carry off many victims.

I.—Zymotic Diseases.

Diphtheria, which first appeared in the Tables under a separate heading in 1855, was fatal to 3560 persons. It attacks children, but after the age of 45 it is more fatal than scarlet fever. This disease has a distinct character; and has existed, Dr. W. Squire asserts, from the earliest ages of medical history.* He finds the first recorded case in Hippocrates (Epid. lib. v.). Aretæus describes it. Fothergill calls it, in his remarkable Essay, sore throat with ulcers. Bretonneau investigated the epidemic at Tours in 1818; and it has since that been well known. Before the publication of his book it had not found so distinct a place in the nosology. The severe epidemic of France in 1855–7 reached England apparently through Boulogne. The disease afterwards appeared in the returns under the name of diphtheria, which Bretonneau had given it. Before it had been called putrid sore throat, or *cynanche maligna;* and it had no doubt often been confounded with scarlet fever, or croup. Cynanche maligna still occurs in the returns; but cases so returned are classed under diphtheria, with which it is really synonymous.

It is a remarkable fact that of diphtheria, out of the same number born more die in the healthy districts of England than in Liverpool:† the proportions are 1029 in the healthy districts and 442 in Liverpool out of 100,000 born.

The deaths from scarlet fever are 2140 in the healthy districts to 3830 in Liverpool; thus reversing the other proportions.‡ The population of

* See the able article of Dr. W. Squire, L.R.C.P., in Reynolds' System of Medicine (vol. I., p. 370), for an excellent summary of all that is known of this disease.

† For years 1861–70, see Supplement to Registrar-General's 35th Report, p. cxii.

‡ See Tables in Supplement to 35th Report.

the South Eastern Division is not more than two-thirds of the population of London; and yet the deaths from diphtheria (456) exceeded the deaths from that disease (419) in London. In Wales the deaths from diphtheria (340), in proportion to population, exceed the average. Generally it is more fatal where there are offensive privies than in towns with waterclosets; but cases are found in the year in variable numbers in every county, and almost in every district. Diphtheria is one of the diseases that should be carefully investigated. Sometimes it sweeps away several children of the same family.

Scarlet fever, alike in its mild and malignant forms as in its various complications, is now one of the zymotic diseases very fatal to young children. It is most fatal during the second, third, and fourth years; it pursues them relentlessly up to the tenth year; and fatal cases occur afterwards through life. The corrected mean age at death is 5·8 years; that from fatal measles being only 2·7, from whooping-cough 1·8 years.* In the year before us the deaths from scarlet fever were 24,922. Deaths occurred in the greater part of the districts of the kingdom: they can be traced in the tables, pp. 184–195. London suffered severely: the deaths were 2648. The Southern and Eastern Divisions had not many deaths. In the West Midland Division, Birmingham and parts of Staffordshire were the most conspicuous sufferers. Lancashire lost 6404 lives by this single disease, the West Riding of York 3779, Durham 1942, and South Wales 1388. The visitation was severe in the mining districts. The mean rate of mortality by scarlet fever was 1062 deaths to 1,000,000 of the population of the whole country; which is slightly above the average of the 25 years 1850–74: it was below the mortality (1461) in 1870, and was as high as the mortality of the two previous years.

Measles was more fatal than it is on the average; it was the cause of 12,255 deaths, a number rather in excess of the deaths by whooping-cough, 10,362. But the two diseases together are less fatal than scarlet fever.

Fever is now distinguished under its three forms of typhus, enteric, and simple continued. It has been proved beyond doubt that enteric fever (typhia), often called typhoid fever, is a distinct disease from typhus, with which it was confounded not only in the early history of medicine but late in the present century: the labors of the accurate Louis, of Dr. A. Patrick Stewart, Sir W. Jenner, and Dr. Murchison, have now distinguished enteric fever. No case of relapsing or famine fever has been returned in the year. The deaths by fever of the three forms were 13,735; by typhus 1762, by enteric fever 8861, and by simple continued fever 3112. The mortality to 1,000,000 living by fever in 1850–4 was at the rate of 995; and gradually fell to 657 in the five years 1870–4. The rate of mortality by typhus in the year 1869, when the three forms were first distinguished, was 197, 148 in 1870, 122 in 1871, and only 81, 71, 75 in the three years following. Thus typhus has declined; so has simple continued fever. Enteric fever, evidently due to a distinct cause, shows no symptom of decline in the corresponding years. Diarrhœa, in some points allied to enteric fever, is now more fatal than it was 20 years ago. It prevails chiefly in the heat of summer when the temperature of air and water rises above 60° Fahrenheit. It is not improbable that the mixture of sewage in water tends to spread this disease among children, to whom it is most fatal. Of the 21,204 deaths by diarrhœa, 18,024 occurred among children under 5 years of age. Cholera has only prevailed in the simple form, and has been fatal to few.

Rheumatic fever is a very serious disease in itself, and the consequential effects it leaves behind it in affections of the heart are of the most serious character. Unlike other zymotic diseases, it occurs chiefly in adults, and one attack leaves an increased liability to a second. Of the 3203 persons

* See Supplement to Registrar-General's 35th Report, p. xxxvii.

whose deaths were referred to rheumatism, 2981 were over 10 years of age; 1510 were males, 1471 females; at the ages 10 to 15, 20 to 25, rheumatism is the most fatal. It has most affinity to ague and remittent fever.

Enthetic diseases are produced by inoculation of specific matter. Those of most frequent occurrence are syphilis, gonorrhœa (and its consequence stricture,) hydrophobia, and glanders. Glanders is communicated by the horse, hydrophobia by the dog, to man. Glanders was fatal to four men; the deaths from this cause we may hope will be diminished as the men employed about horses grow more cautious. Hydrophobia was fatal to 61 persons; namely, to 49 males and 12 females; four were children under 5 years of age, eight were boys of 5–10; three were boys, three were girls, of 10–20; six were young men, one a young woman, of 20–25; 29 were men, seven women, of 25 and upwards. Hydrophobia, notwithstanding police regulations, is twice as fatal as it was 20 years ago.

Syphilis is communicated not by animals, but by men and women themselves afflicted by disease; and it was, as far as it was recorded, twice as fatal in the five years 1870–74 as it was 20 years ago. Its most fatal recorded forms occur in children under one year of age. Thus, of nearly 2000 deaths ascribed to syphilis, 1484 were babies under one year of age; of whom 770 were boys, 714 girls.

Special provision is required to prevent the diffusion of this disease; and there can be no doubt that the only effectual provision is reclusion of the sources of infection in infirmaries under well considered regulations.

Alcoholism became less fatal year by year until 1873. The deaths to 1,000,000 living by delirium tremens in the successive quinquenniads, from 1850 to 1874, were 29, 26, 24, 22, 16: the last year, 1874, delirium tremens broke out again with renewed violence, and the rate reverted to 21; while the deaths ascribed to intemperance, which had on an average been 17, rose to 24. The death-rate from alcoholism in both forms was higher than it had been for some years.

II.—Constitutional Diseases.

84,119 deaths were ascribed to constitutional diseases; namely, 17,791 to diseases of the diathetic order, and 66,328 to tubercular diseases, including scrofula, mesenteric disease, hydrocephalus, and phthisis. Among the diathetic diseases gout still holds its own: to it 542 deaths are directly referred. The proportion to 1,000,000 living that died of gout annually ranged from 12 to 13 in the three quinquenniads 1850–64. In 1865–69 the proportion rose to 18; in the five years 1870–74 to 21, 20, 20, 20, and 23. As is usual, the men suffer more than the women from gout; and the greatest number of deaths from gout in any decenniad of age occur at 65–75.

Cancer, one of the longest and most painful diseases to which mankind is subject, is growing more fatal. To it 4586 deaths were referred in 1847, 5826 in 1854, 8117 in 1864, and 11,011 in 1874. The proportion of annual deaths to 1,000,000 living was 302 in 1850–54, and 443 in 1870–74. The diagnosis of internal cancer has no doubt made considerable progress, and some cases which were formerly vaguely returned as tumors are now recognized as cancer in some of its forms; but the increase of cancer demands all the attention of pathologists. Great will be the merit of the physician who discovers how its attacks can be warded off, or its ravages arrested. It is worthy of note that of its victims 3470 are males, 7541 are females; and that the young are spared; most of the deaths occurring at ages above 45, when the reproductive forces have subsided. Under 45 years of age the number of deaths of males by cancer was 479, slightly in excess of the 427 deaths of females. At ages over 45 the deaths of males were 2991, of females 7114. The forces that

had been expended, especially in the female, in building up normal organizations were diverted towards heterologous structures. The breasts, the uterus, the glands are the most common seats of scirrhus disease. The hæmatoid disease is most frequent in children.

The tubercular diseases show some signs of subsidence. The mortality from this order of diseases is sensibly declining; while consumption, the most fatal of the diseases of the prime of life, destroyed in 1,000,000 living 2811 a year in the years 1850–54, it destroyed 2283 a year in 1870–74. During these last five years the decrease has still been going on; it was at the rate of 2435 in 1870, and 2104 in 1875.

III.—Local Diseases.

226,617 persons died of local diseases; including 68,014 of diseases of the nervous system; 29,956 of diseases of the organs of circulation; 90,612 of diseases of the respiratory organs; and 23,917 of diseases of the digestive organs. There is a general increase in the deaths from all these orders of diseases. The increase in the fatal diseases of the circulatory organs is the greatest; next come diseases of the respiratory organs; the fatal diseases of the nervous system increased to some extent; those of the digestive organs declined in 1870–74.

While the rate of mortality from consumption and pneumonia declined, the mortality from bronchitis rapidly increased.

IV.—Developmental Diseases.

These diseases are incidental to the stages of development, nutrition, growth, and decay. To them 78,874 deaths were referred. They include 10,527 deaths of children prematurely born; 1496 of children malformed; 4317 of children dying in the process of teething; all of them under 5 years of age, and nearly all of them under 2 years of age, the boys dying in greater numbers than the girls.

Of the second order only women died: 116 died of paramenia; 2819 of diseases incidental to child-bearing: the greater part of them at the ages 25–45. One girl, the daughter of a laborer, died of childbirth at the age of 14. The case is well authenticated.

If we add the 3108 deaths from puerperal fever (metria) the total deaths referable to child-bearing was 5927. This implies 1 death of the mother to every 140 children born alive.

Of old age 12,495 men, and 16,109 women died, all over 65 years, and some over 100 years. Thus of 526,632 deaths no less than 498,028 were referred to injuries, diseases, and evident organic imperfections; 28,604 to old age.

A rather greater number, or 30,995 deaths, chiefly of young children, were referred to atrophy and debility.

V.—Violent Deaths.

17,920 persons died violent deaths in the year 1874. Happily in England none died in battle. 15,667 deaths were referred to accident or negligence; 409 to homicide: 1592 to suicide; and 18 to execution. The number of executions registered in the year is double the average. We have to go back to the years 1863–4 to find greater numbers.

13,414 males and 4506 females died violent deaths; so to one female three males are killed. 3978 of the number were children under 5 years of age: 2,232 were boys, 1746 were girls. As age advances the excess of deaths of males over deaths of females increases. Thus at the age 5–10 the deaths of boys by violence are 742, of girls 391, while at the

age 25–35 the deaths of men by violence are 1758, of women 233. At this stage of civilisation the men bear the brunt of the battle.

The causes of violent deaths are analysed in the Tables (pp. 196–216), which are in continuation of the Tables in previous Reports. Thus 1165 males and 84 females were killed on railways in some way or other. Of the males 743 are returned as having been run over on the line; 26 were killed by collision; 175 were crushed by carriages or engines. These deaths are now returned more accurately and completely than they were formerly to the Board of Trade; but it may be of use to give here the total deaths on railways from the time when they were distinguished in the annual reports of this office.

The following Table shows how rapidly the deaths on railways have increased since 1863. It is right to state that the number of miles of railway opened were 7,001 in 1858, 10,850 in 1871, and 11,622 in 1874. The receipts from passengers were 8,789,181*l.*, 15,476,126*l.*, and 18,774,836*l.* in the corresponding years.

Deaths connected with Railways.

Years.	Males.	Females.	Total.
1863	607	40	647
1864	745	51	796
1865	885	62	947
1866	837	71	908
1867	822	55	877
1868	714	83	797
1869	735	56	791
1870	861	69	930
1871	1,042	84	1,126
1872	1,068	92	1,160
1873	1,185	105	1,290
1874	1,165	84	1,249
Total in 12 years, 1863–74	10,666	852	11,518
Annual Average	888·8	71·0	959·8

Thus, if we take the receipts as an indication, it is probable that the passenger traffic has increased faster than the deaths of passengers, railway workmen, and strangers to the line. It is none the less true that there has been an absolute increase of violent deaths to the extent of 1249 in a year; deaths which would not have happened had no railways existed.

1313 persons were killed by horse conveyances, namely, 1113 males and 200 females. Carts, vans, and waggons are the great offenders. The tram-cars evidently require great care in their management; although they are not in such general use, they killed more people (62) than omnibuses (55). By cabs 61 persons were killed; by carriages 82; and this limitation of the numbers implies great skill on the part of the drivers in streets often crowded.

The deaths of males from injuries of various kinds in coal mines were 938, of females 4. From injuries connected with copper, tin, iron, and other mines 118 men died.

The total deaths referred directly to mechanical violence were 6,464, which have been classified, as far as the returns admitted of it, under several heads.

To chemical injuries the deaths of 1568 males and 1432 females are referred. By burns 610 males, 888 females died; the manner not being

stated in the great majority of cases. Still, it is evident that more women than men die by the clothes taking fire; for 300 deaths of females against 163 deaths of males are explicitly referred to this cause. Under five years of age the deaths of boys by burns are 338, of girls 298. At that age when the dress of many boys is as combustible as the dress of girls, the more daring sex die in greater numbers than girls.

Children in some numbers are killed every year by drinking scalding water too carelessly left in their way; 20 boys and 13 girls so died in 1874. The boys and girls, 33 in number, were thus distributed as to age; 8 were 1–2; 13 were 2–3; 5 were 3–4; 4 were 4–5; 2 were 5–10; and 1 was 10–15. The age of 2 and under 3 is that at which the young ones are just able to go about without help, and are yet uninstructed by experience how to avoid dangers.

395 males, including 305 under five years of age; and 297 females, including 263 under five years of age, were scalded to death under circumstances not defined.

86 persons, 73 males and 13 females, were destroyed by burns, scalds, and shocks of explosion; 30 by gunpowder, 3 by fireworks, 14 by gases, 1 by dynamite, 26 by steam, and 12 by ways not described. This is exclusive of 24 deaths directly referred to explosion of steam boilers.

25 boys and men were killed by lightning; nearly all following out-of-door occupations. No woman was killed by lightning.

Sunstroke was fatal to 71 males and to 19 females.

Cold on the other hand was fatal to many. 90 deaths of males and 24 of females were ascribed to "gelatio and exposure to cold." There were 17 of the number under five years of age; but the majority (48) were fifty-five years of age and upwards.

Deaths by poisoning increased in 1874; of 461 cases of such deaths 149 were suicides, and 312 were deaths by accident or negligence, murder or manslaughter. Thus, about one case in three deaths by poisoning were ascertained suicides.

2891 deaths by drowning inland or on the coast are recorded. This is exclusive of the cases of drowning out at sea and abroad.

I have previously noted the rapid increase of deaths by suffocation, to which 1560 deaths were ascribed in the year. The mode of suffocation is not stated in 346 cases; 73 persons were choked by food; 586 were smothered under the bed clothing, and 240 were overlaid.

The fact is certain; and the cause of the increase requires thorough investigation. The coroner of Newcastle-upon-Tyne, Mr. John T. Hoyle, thus writes to the Registrar General: "During the past six months I have held "twenty inquests where medical witnesses proved deaths by suffocation." He calls the Registrar General's attention "to the circumstances which "usually attend the sudden deaths of children, which have been very "frequent of late years in the borough." "In a great many cases it turns "out, on an inquest being held, that the children have been accidentally "suffocated in bed by the parents, very frequently either one or both of "them, going to bed in a state of intoxication." Here is another evil to be referred to the evil effects of excessive drinking.

I have the honor to be,
Sir,
Your obedient servant,
WILLIAM FARR.

To
The Registrar General.

APPENDIX TABLES,

1874.

NOTE.—For the causes of death in the 5 years 1838-42, see Table 7 in the Appendix to the Thirty-fourth Annual Report. The causes death were not abstracted for the 4 years 1843-46.

* Order 2, comprising Violent Deaths in Battle, is inapplicable to the civil population.

† The number of persons executed in the several years will not necessarily correspond with that returned for the same years in "Criminal Returns," inasmuch as the executions therein recorded in each year are classed according to the *dates of conviction*, wh the numbers in this Table are placed under the years in which the deaths are *registered*.

* The rates given in this Table for the various groups of years are the means of the calculated rates in the several years. Under some of the separate headings the means cannot be given for the entire period, as the classification in full detail has not been made during the whole 25 years. In a certain number of cases in each year the cause of death is not stated; in calculating the proportional numbers since 1855 these have been distributed rateably over all the causes in the Table.

† Order 2, comprising Violent Deaths in Battle, is omitted, as inapplicable to the civil population. ‡ Average in 10 years.

BLE 4.* (*continued.*)—**Mean Annual Rate of Mortality in England from each CLASS of CAUSES and from each CAUSE of DEATH during the 25 Years 1850–74, and in each Quinquenniad of that Period; also the Rate of Mortality in the Years 1870, 1871, 1872, 1873, and 1874.**

TABLE 5.—**Causes of Death in England in the Year 1874,** arranged in the order of their fatality.

CAUSES OF DEATH.	Number of Deaths registered in the Year 1874.	*Proportional Number* from each Cause to 1,000,000 Deaths from All Causes.*
Bronchitis	53,022	101,422
Phthisis	49,379	94,422
Atrophy and Debility	30,995	59,288
Old Age	28,604	54,715
Heart Disease	28,513	54,541
Convulsions	27,139	51,912
Pneumonia	25,927	49,594
Scarlet Fever	24,922	47,761
Diarrhœa	21,204	40,559
Apoplexy	12,848	24,576
Paralysis	12,572	24,048
Measles	12,255	23,442
Cancer	11,011	21,062
Premature Birth	10,527	20,136
Whooping-cough	10,362	19,821
Enteric Fever	8,861	16,949
Fractures and Contusions (Accident)	7,374	14,105
Hydrocephalus	7,286	13,937
Tabes Mesenterica	6,911	13,220
Liver Disease	6,689	12,795
Brain Disease	6,129	11,724
Cephalitis	5,763	11,024
Lung Disease	5,397	10,323
Croup	5,010	9,583
Dropsy	4,688	8,967
Teething	4,317	8,258
Diphtheria	3,560	6,810
Sudden Deaths	3,421	6,544
Erysipelas	3,387	6,479
Bright's Disease (Nephria)	3,312	6,393
Rheumatism	3,203	6,127
Simple Continued Fever	3,112	5,953
Puerperal Fever (Metria)	3,108	5,945
Enteritis	3,091	5,912
Asthma	3,053	5,840
Kidney Disease	2,999	5,736
Childbirth	2,819	5,392
Scrofula	2,752	5,264
Stomach Disease	2,728	5,218
Drowning (Accident)	2,611	4,994
Epilepsy	2,587	4,948
Burns and Scalds (Accident)	2,559	4,895
Peritonitis	2,407	4,604
Small-pox	2,162	4,136
Syphilis	1,997	3,820
Joint Disease	1,928	3,688
Laryngitis	1,926	3,684
Typhus Fever	1,762	3,370
Jaundice	1,628	3,114
Suffocation (Accident)	1,560	2,984
Want of Breast-milk	1,440	2,754
Mortification	1,439	2,753
Ileus	1,424	2,724
Hepatitis	1,419	2,714
Pleurisy	1,287	2,462
Thrush	1,234	2,360
Uterus Disease	1,123	2,148
Ulceration of Intestines	1,037	1,984
Hernia	1,012	1,936
Accident (not classed)	1,012	1,936
Phlegmon	942	1,802
Gastritis	923	1,766
Insanity	906	1,733
Diabetes	882	1,687
Nephritis	864	1,653
Pericarditis	758	1,450
Aneurism	685	1,310
Dysentery	684	1,306
Ascites	600	1,148
Hanging (Suicide)	597	1,142
Cholera (Simple)	596	1,140
Cyanosis	573	1,096
Intemperance	568	1,086
Gout	542	1,037
Cystitis	531	1,016
Delirium Tremens	485	928
Malformations (not classed)	465	890
Skin Disease	459	878
Ulcer	458	876
Spina Bifida	458	876
Intussusception	454	868
Purpura and Scurvy	440	842
Murder and Manslaughter	409	782
Cut, Stab (Suicide)	340	650
Stricture of Intestines	312	597
Poison (Accident)	312	597
Drowning (Suicide)	280	536
Influenza	245	469
Violent Deaths (not classed)	234	448
Stricture of Urethra	228	436
Calculus (Stone)	207	396
Carbuncle	198	379
Worms	188	360
Quinsy	173	331
Ovarian Dropsy	168	321
Poison (Suicide)	149	285
Cut, Stab (Accident)	141	270
Suicide (not classed)	133	254
Zymotic Diseases (not classed)	121	231
Paramenia	116	222
Ague	114	218
Cancrum Oris (Noma)	111	212
Synovitis (Arthritis)	111	212
Ischuria	104	199
Fistula	101	193
Gunshot Wounds (Accident)	98	187
Gunshot Wounds (Suicide)	93	178
Spleen Disease	81	155
Remittent Fever	79	151
Privation	73	140
Chorea	70	134
Hydrophobia	61	116
Hanging (Execution)	18	34
Pancreas Disease	11	21
Glanders	4	8

* The causes of 3,845 deaths in 1874 were not specified. In calculating the proportional numbers in this column these deaths have been distributed proportionally among the specified causes.

TABLE 6.—ENGLAND. **Death-rates** per **1000 Persons living,** from certain **Causes,** in each of the **Registration Counties** in the Year **1874.**

REGISTRATION COUNTIES.	Estimated Population in the middle of 1874.*	ANNUAL DEATH-RATE PER 1000 PERSONS LIVING FROM CERTAIN DISEASES.

* The populations of these counties have been estimated to the middle of 1874 on the assumption that the rate of increase or decrease which prevailed between the two census enumerations in 1861 and 1871 was maintained up to the middle of 1874; the county totals were then adjusted in order to cast to the estimated total population of England and Wales.

Nomenclature drawn up by a COMMITTEE appointed by the ROYAL COLLEGE OF PHYSICIANS of LONDO

No.	NAME.	Persons.	Males.	Females.
VI.	INJURIES (INCLUDING OTHER POISONS).			
	GENERAL INJURIES.			
	Accident or Negligence.			
	1. Fractures and Contusions	7374	6181	1193
	2. Gunshot	98	88	10
	3. Cut, Stab	141	117	24
	4. Burns and Scalds	2559	1349	1210
	992. Blister	–	–	–
	5. Poison	312	190	122
	6. Drowning	2911	2197	414
	7. Suffocation	1580	891	689
	8. Otherwise	1012	759	253
	Suicide.			
	1. Gunshot Wounds	93	91	2
	2. Cut, Stab	340	266	74
	3. Poison	149	93	56
	4. Drowning	280	179	101
	5. Hanging	597	472	125
	6. Otherwise	133	103	30
VII.	SURGICAL OPERATIONS.			
	Cataract (Operation)	–	–	–
	Ovariotomy	56	–	56
	Cæsarean Section	5	–	5
	Instrumental Delivery	–	–	–
	Craniotomy	–	–	–
VIII.	HUMAN PARASITES.			
	CLASS B. STERELMINTHA.			
	Tænia (Tape Worm)	5	4	1
	Hydatid in Liver	29	13	16

No.	NAME.	Persons.	Males.
IX.	CONGENITAL MALFORMATIONS.		
	Malformations	262	14
	Nævus on Neck	–	–
X.	MURDER, MANSLAUGHTER, HANGING (EXECUTION), AND OTHER VIOLENT DEATHS NOT CLASSED.		
	HOMICIDE.		
	Murder and Manslaughter	409	24
	EXECUTION.		
	Hanging	18	1
	996. Privation	73	4
	Want of Breast Milk	404	23
	Inanition of Infancy	1036	53
	Other Violent Deaths (not classed)	234	17
	SUDDEN DEATHS, CAUSE UNASCERTAINED	3421	208
	CAUSES NOT SPECIFIED	3271	180
	Abscess, Tumour	578	28

INDEX OF DISTRICTS.

[The following Index furnishes a reference to the *Number* of each REGISTRATION DISTRICT in the topographical arrangement adopted in the Tables of Abstracts contained in the Report. The alphabetical arrangement places compound names in the order in which they are pronounced: thus, East Ashford will be found under the letter E, and *not* under A.]

In consequence of numerous alterations (amalgamations of districts and formations of new districts) since the numerical arrangement, 1 to 623, was adopted in the Abstracts for the year 1847, the districts were re-numbered consecutively from 1 to 627 in the Abstracts for the year 1871.*

For names of Towns, such as Leamington, Torquay, &c., which are not found in this "Index of Districts," see the "Index of Sub-districts" (page 271) *and "Index of certain Towns"* (page 281).

A

Aberayron, 600.
Abergavenny, 579.
Aberystwith, 601.
Abingdon, 114.
Alcester, 398.
Alderbury (Salisbury), 254.
Alnwick, 560.
Alresford, 104.
Alston, 565.
Alton, 105.
Altrincham, 447.
Alverstoke, 88.
Amersham, 139.
Amesbury, 253.
Ampthill, 172.
Andover, 109.
Anglesey, 627.
Ashborne, 440.
Ashby-de-la-Zouch, 407.
Ashton-under-Lyne, 468.
Aston, 388.
Atcham (Shrewsbury) 351.
Atherstone, 390.
Auckland, 543.
Axbridge, 315.
Axminster, 269.
Aylesbury, 142.
Aylsham, 223.
Aysgarth, 537.

B

Bakewell, 442.
Bala, 620.
Banbury, 154.
Bangor, 625.
Barnet, 127.
Barnsley, 505.
Barnstaple, 285.
Barrow-upon-Soar, 409.
Barton-upon-Irwell, 464.
Basford, 431.
Basingstoke, 107.
Bath, 317.
Battle, 68.
Beaminster, 267.
Bedale, 535.
Bedford, 170.
Bedminster, 319.
Bedwelty, 580.
Belford, 561.
Bellingham, 558.
Belper, 439.
Berkhampstead, 138.
Berwick, 562.
Bethnal Green, 15.
Beverley, 518.
Bicester, 150.
Bideford, 287.
Biggleswade, 171.
Billericay, 190.
Billesdon, 403.
Bingham, 436.
Birkenhead, 454.
Birmingham, 387.
Bishop Stortford, 130.
Blaby, 404.
Blackburn, 474.
Blandford, 260.
Blean, 57.
Blofield, 228.
Blything, 216.
Bodmin, 294.
Bolton, 462.
Bootle, 573.
Bosmere, 211.
Boston, 418.
Bourn, 415.
Brackley, 155.
Bradfield, 117.
Bradford-on-Avon, 249.
Bradford (Yorkshire), 496.
Braintree, 199.
Bramley, 499.
Brampton, 567.
Brecknock, 604.
Brentford, 125.
Bridge, 55.
Bridgend, 586.
Bridgnorth, 348.
Bridgwater, 307.
Bridlington, 524.
Bridport, 268.
Brighton, 76.
Bristol, 320.
Brixworth, 161.
Bromley, 40.
Bromsgrove, 385.
Bromyard, 341.
Buckingham, 145.
Builth, 603.
Burnley, 472.
Burton-upon-Trent, 368.
Bury, 463.
Bury St. Edmunds, 206.

C

Caistor, 425.
Calne, 245.
Camberwell, 25.
Cambridge, 178.
Camelford, 290.
Canterbury, 56.
Cardiff, 583.
Cardigan, 597.
Carlisle, 569.
Carmarthen, 593.
Carnarvon, 624.
Castle Ward, 555.
Catherington, 102.
Caxton, 176.
Chapel-en-le-Frith, 443.
Chard, 309.
Cheadle, 366.
Chelmsford, 191.
Chelsea, 2.
Cheltenham, 335.
Chepstow, 577.
Chertsey, 30.
Chester, 452.
Chesterfield, 441.
Chester-le-Street, 549.
Chesterton, 177.
Chichester, 83.
Chippenham, 244.
Chipping Norton, 153.
Chipping Sodbury, 322.
Chorley, 475.
Chorlton, 465.
Christchurch, 92.
Church Stretton, 346.
Cirencester, 331.
Cleobury Mortimer, 347.
Clifton, 321.
Clitheroe, 473.

* Thus, the number of Marriages in the Aberayron District may at once be ascertained by referring to the "*Abstract of Marriages*," District number 600 (see page 24); and the numbers of Births and Deaths, of Deaths at different Ages, &c. will be found by referring to the same district number in the respective Tables.

Clun, 345.
Clutton, 316.
Cockermouth, 571.
Colchester, 195.
Congleton, 450.
Conway, 626.
Cookham, 120.
Corwen, 619.
Cosford, 204.
Coventry, 393.
Cranbrook, 51.
Crediton, 282.
Crickhowell, 605.
Cricklade, 242.
Croydon, 37.
Cuckfield, 74.

D

Darlington, 540.
Dartford, 41.
Daventry, 160.
Depwade, 230.
Derby, 438.
Devizes, 247.
Dewsbury, 501.
Docking, 235.
Dolgelly, 621.
Doncaster, 510.
Dorchester, 265.
Dorking, 34.
Dover, 63.
Downham, 238.
Driffield, 523.
Droitwich, 384.
Droxford, 101.
Dudley, 375.
Dulverton, 304.
Dunmow, 200.
Durham, 546.
Dursley, 324.

E

Easington, 547.
Easingwold, 527.
East Ashford, 54.
Eastbourne, 69.
East Grinstead, 73.
Easthampstead, 121.
East Preston (Worthing), 81.
East Retford, 428.
Eastry, 62.
East Stonehouse, 278.
East Ward, 574.
Ecclesall Bierlow, 507.
Edmonton, 128.
Elham, 64.
Ellesmere, 354.
Ely, 181.
Epping, 186.
Epsom, 29.
Erpingham, 222.
Eton, 140.
Evesham, 382.
Exeter, 272.

F

Falmouth, 298.

INDEX OF SUB-DISTRICTS.

This alphabetical arrangement places the Registration Sub-Districts (or Registrars' Districts) having *compound names* in the order indicated by the usual pronunciation of those names; thus, East Grinstead will be found under the letter E, and not under G; St. James under the letter S, and not as "James, St." The number against each Sub-District, in the third column, refers to its numerical place in the Tables of Abstracts; thus, Abbey Holme (570; 2) is the 2d Sub-District of the Wigton District, No. 570.]

Sub-District.	District.	No.
A		
bbey . . .	Bath . . .	317; 3

REGISTRAR-GENERAL'S THIRTY-SEVENTH ANNUAL REPORT AND APPENDIX.

PAGES

ACT, new Registration v

AGES; Returns of Ages at Marriage and of Parents at the births of Children in all cases requisite vi

of Persons married in 1874 . . . . . xi–xii

Mean Age at Marriage xii

at Marriage; improvement in the Returns, 1855–1874 . . xi

at Marriage; imperfect returns of, in groups of Counties in 1874 (Table) xii

Deaths of Males and Females registered at different Ages in England in each of the Years 1838–74. (Tables 20, 21, pp. lv, lvi.) . xv–xvi

Mortality of Males and Females at different Ages in England in the Year 1874, and the average in 10 Years, 1856–65 . . xv–xvi

Mortality of Males and Females at 12 groups of Ages in England, 1838–74. (Tables 22–25.) . . . . . lvii–lx

Mortality of Persons, Males and Females, at 12 groups of Ages in Divisions and Counties. (Tables 26, 27.) . . . . lxi–lxii

of 299,696 Persons married in 1874, distinguishing Bachelors, Spinsters, Widowers, Widows 26–28

at Death of Males and Females registered in 1874 in Divisions, Counties, and Districts 120–141

at Death of Males and Females in England registered from different Causes, in 1874 144–149

at Death of Males and Females in England registered from different Supplemental Causes, in 1874 150–153

at Death of Males and Females in London registered from different Causes, in 1874 154–159

(*See also* MARRIAGES, BIRTHS, and DEATHS.)

ALCOHOLISM. (*See* INTEMPERANCE and DELIRIUM TREMENS.)

APPENDIX TABLES 226–258

AREA in Statute Acres of each Division, County, District, and Sub-district . 30–84

European States and large Cities (Tables) . . . . . xxix–xxx

in Acres and Hectares of the United Kingdom in 1874. (Table 45.) . lxxix

of the Islands in the British Seas. (Table 47.) lxxx

ARMY; Strength and Mortality of the Army at Home and Abroad. (Tables 51–58, pp. lxxxiv–lxxxvi.) . . . . . xxv–xxvi

Average Strength of the British Army at Home in 1874. (Table 51, p. lxxxiv.) xxv

Average Strength and Proportion per cent. of the British Army at Home and Abroad in each of the Years 1861–74. (Table 52, p. lxxxiv.) xxv

Mortality of the Army at Home in 1874. (Table 53, p. lxxxiv.) . xxv

Average Strength of the British Army Abroad in each of the Years 1871–74. (Table 54.) lxxxv

PAGES

ARMY—*continued.*

Number of Deaths in the British Army at Home and Abroad, 1871–74. (Table 55.) lxxxv

Annual Rate of Mortality per 1000 amongst Officers and Men in the Army at Home and Abroad, 1858–74. (Table 56.) . . lxxxv

Strength at Home and Abroad in 1861 and 1871, showing the Numbers and Proportion per cent. born in the different parts of the United Kingdom and elsewhere. (Table 57.) . . lxxxvi

Deaths in Army Abroad of Officers and Men belonging to Great Britain and to England and Wales, 1858–74. (Table 58.) . . lxxxvi

AUSTRIA; Average Annual Proportion to Population of Persons married, Births, and Deaths, 1853–72, and in 1873 and 1874 . . xxviii

Density and Proximity of Population in 1874 (Table) . . xxix

Marriage, Birth, and Death Rates compared with those of other European States. (Table 65.) xciii

Estimated Population; Number, and Proportion to Population, of Persons married, Births, and Deaths, in each of the Years 1853–74. (Table 69.) xcv

BIRTHS in 1874 xiv

to a Marriage xiv

Legitimate to every 100 Married Women, 1861–70 . . . xiv

out of Wedlock xv

registered in England, and excess over Deaths, in each Year, 1838–74. (Table 1.) xxxvi

Number of Persons living to one Birth (Table 2.) . . . xxxvii

Legitimate and Illegitimate in England in 1842 and in the Years 1845–74, and Proportion of Males to Females. (Table 11.) . xlvi

proportion of Illegitimate Children to every 100 Births in the several Counties of England in each of the Years 1864–74. (Table 12.) xlvii

registered in England in each Quarter of the Years 1838–74. (Table 13.) xlviii

proportional Number of Births in each Quarter to 1,000 Births in the average Quarter of the Years 1838–74. (Table 14.) . . xlix

in Counties, in 1874. Numbers, Sex, Legitimate and Illegitimate; Proportions of Male to Female Births, Legitimate and Illegitimate. (Table 15.) l

proportion of Male and Female Children born in the several Counties of England during each of the Years 1864–74. (Table 16.) li

in Fifty large Town Districts in 1874. (Table 35.) . . . lxix

in Twenty-one large Towns of the United Kingdom in 1874. (Table 36.) lxx

in London in the Years 1862–74, distinguishing Males and Females. (Table 38.) lxxi

excess over Deaths in London in each of the Years 1862–74. (Table 38.) lxxi

in the United Kingdom in 1874. (Table 45.) lxxix

in the Islands of the British Seas in the Years 1851–74. (Table 47.) lxxx

of British Subjects at Sea, in the Years 1856–74. (Table 59.) . lxxxvii

registered in each of the Divisions, Counties, Districts, and Sub-districts in 1874, distinguishing Males and Females and the Illegitimate 30–84

excess over Deaths in each of the Divisions, Counties, Districts, and Sub-districts in 1874 30–84

PAGES

BIRTHS—*continued.*

registered in the Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters of 1874 . . . 86–89

of Children born out of Wedlock registered in the Divisions and Counties (distinguishing Males and Females) in each of the Four Quarters of 1874 90–93

in Foreign States. (*See* FOREIGN STATES.)

illegitimate. (*See* ILLEGITIMATE BIRTHS.)

BIRTH-RATE in England in 1874 xiv

in certain Counties in 1874 xiv

in England in each of the Years 1838–74. (Table 2.) . . xxxvii

in England in each Quarter of the Years 1838–74. (Table 13.) . xlviii

in Counties in each of the Years 1864–74. (Table 17.) . . lii

in Fifty large Town Districts in 1874. (Table 35.) . . . lxix

in Twenty-one large Towns of the United Kingdom in 1874. (Table 36.) lxx

in London in each of the Years 1862–74. (Table 38.) . . lxxi

in the United Kingdom in 1874. (Table 46.) lxxix

in Foreign States. (*See* FOREIGN STATES.)

BRAIN DISEASES; Increased Fatality 222

BRONCHITIS; Mortality from, rapidly increasing 222

BUCHANAN, DR.; on the Results of Sanitary Works and Regulations . vi

BURNS AND SCALDS. (*See* VIOLENT DEATHS.)

CANCER; attention required to its increasing fatality 221

CAUSES of DEATH; of Seamen in the British Merchant Service in 1874. (Table 61.) lxxxix

of Males and Females in England, at different Periods of Life, in 1874 144–149

(Supplementary Table) of Males and Females in England, at different Periods of Life, in 1874 150–153

of Males and Females in London at different Periods of Life, in 1874 154–159

of Males and Females in England, and in each of the Divisions and Counties, in 1874 160–183

(from certain zymotic and other Causes) in 1874, in the Divisions, Counties, and Districts of England 184–195

Dr. Farr's Letter to the Registrar General thereon . . . 219–224

registered in England in each of the Years 1847–74. (Table 1.—App.) 226–231

rate of Mortality from, to a Million persons living in each of the Years 1859–74. (Table 2.—App.) 232–234

proportional Numbers dying from each Cause in 1874. (Table 3.—App.) 235

rate of Mortality from, during 25 Years, five periods of Five Years, and in 1870, 1871, 1872, 1873, and 1874. (Table 4.—App.) . 236–239

in England, in 1874, arranged in the order of their fatality. (Table 5.—App.) 240

of Persons, Males and Females, in 1874, classified according to the nomenclature recommended by the Committee appointed by the Royal College of Physicians of London. (Table 24.—App.) 254–258

CENTENARIANS; deaths of reputed, during 1874. (Table 19.) . . . liv

PAGES

CHILDBIRTH; excessive number of Deaths from 222

Deaths in 1874, at different Ages, of Women after Childbearing, classed under various Diseases, and neither referred to Childbirth nor to Metria in the Abstracts. (Table 11.—App.) . 245

Deaths of Women in 1874 who were returned as pregnant, classed under certain Diseases. (Table 12.—App.) 246

Deaths from Metria and Childbirth in each of the 28 Years, 1847–74, and proportional Deaths of Mothers to Children born alive. (Table 13.—App.) 246

Deaths of Women in, and Mortality per 1,000 Children in Counties in 1874. (Table 14.—App.) 247

CONSOLS; average price of, 1852 to 1874, and in each Quarter of 1865–74. (Table 33.) lxvii

CONSTITUTIONAL DISEASES 221

DEATHS in 1874 xv

at different Ages xv

in Public Institutions xxiv

in the British Army at home and abroad . . . . . xxv–xxvi

in the Royal Navy xxvi

registered in England in each of the Years 1838–74. (Table 1.) . xxxvi

excess of Births over, in each of the Years 1838–74. (Table 1.) . xxxvi

number of Persons living to one Death. (Table 2.) xxxvii

of reputed Centenarians. (Table 19.) liv

registered in England at different Ages (Males and Females) in each of the Years 1838–74. (Tables 20, 21.) . . . . lv–lvi

registered in England in each Quarter of the Years 1838–74. (Table 28.) lxiii

proportional Number in each Quarter to 1,000 Deaths in the average Quarter, 1838–74. (Table 29.) lxiv

in Fifty large Town Districts in 1874. (Table 35.) . . . lxix

in Twenty-one large Towns in 1874. (Table 36.) . . . lxx

in Public Institutions of London in each of the Years 1862–74. (Table 37.) lxx

in London of Males and Females in each of the Years 1862–74. (Table 38.) lxxi

and Meteorology in London in each of the Years 1840–74. (Table 40.) lxxiii

in the United Kingdom in 1874. (Table 45.) lxxix

in the Islands in the British Seas in each of the Years 1851–74. (Table 47.) lxxx

in the British Army at home in 1874. (Table 53.) . . . lxxxiv

in the British Army at home and abroad in each of the Years 1871–74. (Table 55.) lxxxv

of Officers and Men in the Army abroad belonging to Great Britain and to England and Wales in each of the Years 1858–74. (Table 58.) lxxxvi

of British Subjects at Sea in each of the Years 1856–74. (Table 59.) lxxxvii

of Merchant Seamen at Sea in each of the Years 1852–74. (Table 60.) lxxxviii

at different Ages of Merchant Seamen in 1874. (Table 61.) . lxxxix

registered in each of the Divisions, Counties, Districts, and Sub-districts in 1874 (distinguishing Males and Females) . . 30–84

excess of Births over, in each of the Divisions, Counties, Districts, and Sub-districts in 1874 30–84

registered in each of the Four Quarters of 1874 (distinguishing Males and Females), in Divisions and Counties 94–97

DEATHS—*continued.* PAGES

in 1874 in Public Institutions 100–118

of Males and Females at different Ages in 1874 in Divisions, Counties, and Districts 120–141

from different Classes of Disease (Dr. Farr's letter) . . . 219–224

from several Causes in 18 of the largest English Towns in 52 weeks (1874). (Table 16.—App.) 250

in large Towns in each Year 1870–74, from Small-pox, Measles, Scarlet Fever, Diphtheria, Fever, and Diarrhœa. (Tables 18–23.—App.) 251–253

of Persons, Males and Females, in 1874, classified according to the nomenclature recommended by the Committee appointed by the Royal College of Physicians of London. (Table 24.—App.) 254–258

REPORT

TO

His Grace, JAMES, DUKE OF ABERCORN, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49; the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Grace, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1873.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1873, was presented to Parliament in the Session of 1874. The Report now submitted contains detailed tables of the Ages and Condition of persons Married; of Births, distinguishing legitimate from illegitimate; and of Deaths, and their Causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 792 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1873 was 5,337,261; the persons whose marriages were registered during the year, amounted to 51,460, the number of marriages being 25,730; children born alive whose births were registered, amounted to 144,377; and the number of deaths registered was 97,537. The emigrants from Ireland during the year 1873 were 90,149. In the previous year—1872—there were *registered* 26,943 marriages, 149,278 births, and 97,294 deaths; the number of emigrants was 78,102.

MARRIAGES.

25,730 marriages were registered in Ireland during 1873, being in the proportion of 1 marriage to every 207 of the *estimated* population.

631 men and 3,128 women contracted marriage before they had

attained their twenty-first year. The proportion of males married under age was 2·45; of females, 12·16 per cent.

Of widowers, 2,996, and of widows, 1,557 were re-married; the proportion to the total marriages being 11·64 per cent. of widowers, and 6·05 per cent. of widows.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 51,460 persons married in 1873, 18,103 (8,155 men and 9,948 women) signed the registers with marks; being in the proportion of 35·18 per cent.—31·69 per cent. of the males, and 38·66 per cent. of the females married.

The marriage register was signed by mark by both parties in 6,396, and by one or other of the persons married in 5,311 instances—thus in 11,707, or 45·5 per cent. of the total number of marriages registered, one or both of the persons married signed by mark.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1873 the exact ages of both parties were given in 8,005 instances. Of these 7,163 were bachelors, and 7,564 spinsters; 842 were widowers, and 441 widows. The largest number of wives married between the ages of 21 and 30—the number being 4,870, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—4,559—also married between 21 and 30 years of age.

262 bachelors were married to widows, both of whose ages at the time of marriage are recorded. 145 of these widows and 126 of the bachelors married between 25 and 35 years of age. 663 of the marriages in which the ages of both parties were recorded, were between widowers and spinsters, 371 of the former being between the ages of 30 and 45, and 450 of the latter between 21 and 35.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 179 couples. Of these the largest number of widows were between 35 and 45, and of widowers between 55 and 65.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the

occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to the Act coming into operation.

The number of marriages registered in each of the ten years 1864–73; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Number of Marriages in the Eight Divisions of Ireland during the years* 1864–73, *and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.*

The extent and position of each of these divisions are specified at p. 122.

Of the total number of marriages (25,730) registered in 1873, 18,129 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 7,601 marriages were of members of the various Protestant persuasions. Of the latter marriages 4,210 were in churches and chapels of the late Established Church, 2,484 in Presbyterian Meeting-houses, 324 in "Registered Buildings," 566 in the Registrars'

offices, 16 according to the usages of the Society of Friends, and 1 marriage was between members of the Jewish persuasion.

Of the entire number of marriages in 1873 there were contracted in the quarter ending the last day of March, 10,243; of June, 5,029; of September, 5,017; of December, 5,441.

The following table gives a statement showing in continuation of the return in my report for 1872, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1873, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the late Established Church.						Not according to the Rites of the late Established Church.						Total Marriages registered under 7 & 8 Vic., cap. 81.

There is not any return made to me of the places of worship belonging to Roman Catholics, in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting

* The 7 and 8 Vic., c. 81, came into operation 1st April, 1845.

† The increase in the number of marriages by Special Licence and in those on Registrar's Certificate in 1871 is caused by the provisions of sections 36 and 38 of "The Matrimonial Causes and Marriage Law (Ireland) Amendment Act, 1870," and the decrease of Marriages on Registrar's Certificate, in 1872 and 1873 by the operation of sections 25, 26, and 27 of 34 & 35 Vic., cap. 49.

other religious persuasions, that there were 1,509 Churches and Chapels of the late Established Church, 590 registered Presbyterian Meeting-houses, and 266 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1873. During the year 1873 there was an increase of 7 such places in the late Established Church; an increase of 4 in the Presbyterian Church; and an increase of 16 in other religious communities. The "Registered Buildings" belong to the following denominations:

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	149	Covenanters,	1
Reformed Presbyterians,	35	Evangelical Union,	1
Independents,	21	United Original Seceders,	1
Baptists,	17	Protestant Dissenters,	1
Seceders,	11	Christians,	1
United Presbyterians,	9	Non-Subscribing Unitarians,	1
Methodists New Connexion,	6	"The Catholic Apostolic Church,"	1
Moravians, or United Brethren,	5	Jews,	1
Primitive Wesleyan Methodists,	4		
Church Methodists,	1	Total,	266

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages under the 7 & 8 Vic., cap. 81, and Acts amending same,* may be solemnized in each District or Union, distinguishing the religious denominations:—

TABLE III.—*The Number of Churches and Chapels of the late Established Church, of Registered Presbyterian Meeting Houses, and of Registered Buildings, by Divisions and Registrars' Districts:—*

During the year 1873 there were issued by the Registrars, 653 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1873.	Number of Registered Meeting-houses on 31st December, 1873.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	127	551	2,396
2. Remonstrant Synod of Ulster,	8	21	48
3. Presbytery of Antrim,	4	9	33
4. United Presbytery or Synod of Munster,	3	4	1
5. Northern Presbytery of Antrim,	1	5	14
Total,	143	590	2,492

BIRTHS.

The births registered in Ireland during 1873, amounted to 144,377. Of these, 74,229 were males, and 70,148 females, being in the proportion of 106 boys to every 100 girls.

The rate per cent. of births to the *estimated* population was 2·71, or 1 in 37 of the population.

There were 3,489 illegitimate births, of which 1,809 were those of males, and 1,680 females; the proportion to the total number of births being 2·4 in every 100. The highest rates, 4·9 and 3·0, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively,

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in the years 1869–73.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1869–73, *by Divisions.*

38,825 births were registered during the quarter ended 31st March; 39,565 in that ended 30th June; 33,513 during that ended 30th September; and 32,474 in that ended 31st December.

DEATHS.

The deaths registered in 1873 amounted to 97,537—48,956 males, and 48,581 females—being in the proportion of 1·83 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 55 persons.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Per-centage of the Total Deaths which occurred at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864–1873, *by Sexes.*

Of the persons whose deaths were registered during the year 24·99 in every 100 were children under 5 years old—26·42 per cent. of the males and 23·54 per cent. of the females. 17·57 per cent. of the males, and 18·75 per cent. of the females, whose deaths were registered had passed their 75th year. 80 of the males and 105 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

30,799 deaths were registered during the first quarter of the year; 26,112 during the second; 19,196 during the third; and 21,430 during the fourth quarter.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several seaports, the number of emigrants who left Ireland during the year 1873 amounted to 90,149; of these 51,930 were males and 38,219 females. Of the whole number, 18,191 were from Leinster; 22,159 from Munster; 33,967 from Ulster; and 15,726 from Connaught: 106 persons did not state the county or province to which they belonged.

Of the emigrants in 1873, 13·1 per cent. were under 15 years of age; 76·7 per cent. were 15 to 35 years old; and 10·2 per cent. were 35 and upwards.

METEOROLOGY.

The following is an abstract of the Meteorological Observations taken during the year 1873 at the Ordnance Survey Office,* Phœnix Park, Dublin, furnished by Lieutenant-Colonel Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year at 9.30 A.M. on 21st February, when it stood at 30·744 inches, air calm; it was lowest on 20th January, at 3.30 P.M., air calm, when it registered 28·470 inches.

The highest temperature in the air was 81·6°, on 20th July, and the lowest was 23·0°, on 2nd February, 2nd November, and 11th December.

Rain or snow fell on 203 days during the year. The total amount registered during this period was 25·528 inches. The greatest rain-fall in twenty-four hours was 1·350 inches, on 13th September, wind W.

The prevailing wind was the W., from which point it blew on 89 days; the wind blew from S.W. on 81 days; from E. on 40 days; from N.W. on 38 days; from S. on 25 days; from N. on 22 days; from N.E. on 21 days; from S.E. on 18 days; and the air was calm on 31 days, at 9.30 A.M. The average pressure of W. wind was 2·47 lbs. per square foot. The strongest wind was from S.W., on 21st December, when the pressure was 25 lbs. per square foot.

* Latitude 53° 21′ 44·65″, north; longitude 6° 21′ 0·35″, west. Height above the sea 158·8 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

I beg here to repeat the observations made in my former Reports, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1873 do not show much improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in the years 1865–73]:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	1 „ 39	1 „ 61	1 „ 183
IRELAND [in 1866],	1 „ 38	1 „ 60	1 „ 185
IRELAND [in 1867],	1 „ 38	1 „ 59	1 „ 187
IRELAND [in 1868],	1 „ 38	1 „ 64	1 „ 200
IRELAND [in 1869],	1 „ 37	1 „ 61	1 „ 200
IRELAND [in 1870],	1 „ 36	1 „ 60	1 „ 189
IRELAND [in 1871],	1 „ 36	1 „ 61	1 „ 186
IRELAND [in 1872],	1 „ 36	1 „ 55	1 „ 199
IRELAND [in 1873],	1 „ 37	1 „ 55	1 „ 207
England [in 1864],	1 „ 28	1 „ 42	1 „ 116
Scotland [in 1864],	1 „ 28	1 „ 42	1 „ 137
Sweden [in 1864],	1 „ 30	1 „ 50	1 „ 145
Prussia (Old Provinces) [in 1864],	1 „ 24	1 „ 38	1 „ 116
Hanover [in 1864],	1 „ 30	1 „ 44	1 „ 124
Wurtemburg [in 1864],	1 „ 23	1 „ 31	—
Hanse Towns: Bremen [in 1864],	1 „ 28	1 „ 37	1 „ 105
Holland [in 1864],	1 „ 30	1 „ 42	1 „ 127
France [in 1864],	1 „ 38	1 „ 44	1 „ 127
Spain [in 1864],	1 „ 26	1 „ 32	1 „ 127
Austria (exclusive of Hungary) [in 1864],	1 „ 25	1 „ 31	1 „ 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

Registered	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.	1872.	1873.
Births,	136,414	144,970	146,090	144,388	146,951	145,659	149,846	151,355	149,278	144,377
Deaths,	93,144	93,154	93,027	93,503	86,185	89,593	90,462	88,348	97,294	97,537
Marriages,	27,406	30,802	30,121	29,742	27,699	27,277	28,667	28,960	26,943	25,730

Following this Report are summaries of the Quarterly Reports issued in 1873, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be
Your Grace's very faithful servant,
William Donnelly,
Registrar-General.

General Register Office,
Charlemont House,
Dublin, 30th October, 1875.

Quarterly Reports.

SUMMARY OF THE QUARTERLY REPORTS, 1873.

TABLE I.—Showing, by **Quarterly Periods,** the number of **Marriages** registered in Ireland in 1870, 1871, 1872, and 1873, distinguishing the number of Roman Catholic marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant under the 7 & 8 Vic., cap. 81 :—

QUARTERLY PERIODS.	Years and Number of **Marriages** Registered.							
	1870.		1871.		1872.		1873.	
	Roman Catholic.	Protestant.	Roman Catholic.	Protestant.	Roman Catholic.	Protestant.	Roman Catholic.	Protestant.
Quarter ending 31st March,	10,073	1,885	9,923	1,892	8,297	1,972	8,383	1,860
Quarter ending 30th June,	3,285	1,962	3,730	1,944	3,639	1,875	3,209	1,820
Quarter ending 30th September,	3,409	2,012	3,357	1,956	3,360	2,014	3,130	1,887
Quarter ending 31st December,	3,687	2,354	3,932	2,226	3,636	2,150	3,407	2,034

First Quarter.

First Quarter—January, February, March.

Marriages.—There were 10,243 marriages *registered* in Ireland during the first quarter of 1873, a number affording an annual ratio of 1 in every 130, or ·768 per cent., of the *estimated* population. The average number of marriages registered in the corresponding quarter of the years 1868–72 was 11,160.

Births.—The births registered during the first quarter of the year 1873 amounted to 38,825—19,987 boys and 18,838 girls—affording an annual ratio of 1 in every 34·4, or 2·91 per cent., of the *estimated* population. The average number of births registered during the corresponding quarter of the previous five years was 39,895.

Deaths.—There were 30,799 deaths—15,317 males and 15,482 females—*registered* during the quarter, affording an annual ratio of 1 in 43·3, or 2·31 per cent., of the *estimated* population. The average number *registered* during the first quarter of the preceding five years was 27,064.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 31st March 1873, amounted to 12,726—8,366 males and 4,360 females. The average number of emigrants during the corresponding quarter of the preceding five years was 11,759.

Diseases.

Small Pox.—One hundred and sixty-three deaths from small pox were registered in Ireland during the first three months of 1873, of which number as many as 100 occurred in the Province of Munster, (67 having taken place in the Superintendent Registrar's District of Tralee)—the Registrar of Castlemaine District, in that union drew attention, in his note, to the wretched state of the dwellings of the poor in his district. Twenty-one deaths from this disease occurred in the Province of Ulster (of which number 14 took place in Lurgan); 36 in Leinster; and none in Connaught.

Measles.—Deaths from this disease registered during the quarter amounted to 559; of which as many as 403 occurred in the Province of Munster; the deaths registered from this disease during the quarter in the county of Kerry were equal to 8·5 in every 10,000 of the population.* In Leinster the number of deaths registered from this disease amounted to 70; in Ulster to 54; and in Connaught to 32.

* According to the Census of 1871.

Scarlet Fever.—There were 435 deaths from this disease registered during the quarter. Of this number 107 occurred in Leinster; 179 in Munster; 82 in Ulster; and 67 in Connaught. *Quarterly Reports.* First Quarter.

Diphtheria.—Seventy-six of the deaths registered during the quarter were ascribed to this disease;—of which number 37 took place in Ulster; 17 in Leinster; 12 in Connaught; and 10 in Munster.

Whooping-cough.—The number of deaths from whooping-cough registered during the quarter amounted to 507, distributed as follows:—in Leinster 157; in Munster 175; in Ulster 120; and in Connaught 55.

Fever.—The various types of fever caused 905, or 1 in every 34, of the total deaths registered during the quarter. Of this number, 311, or 22·5 in every 100,000 of the estimated population, occurred in the Province of Munster; 295, or 16·1 in every 100,000, in Ulster; 198, or 15·4 in every 100,000 in Leinster; and 101, or 12·2 in every 100,000, in Connaught.

Diarrhœa.—This disease caused 525 of the deaths registered during the quarter. This number was distributed as follows:—in Leinster 124; in Munster 182; in Ulster 174; and in Connaught 45.

Simple Cholera.—Only 9 deaths were attributed to this disease.

Principal Zymotic or Epidemic Diseases.—The total number of deaths from the above-named zymotic or epidemic diseases registered during the first three months of 1873, amounted to 3,179, or 10·3 per cent. of the total deaths registered, this number being equal to 59·6 in every 100,000 of the estimated population. In Leinster 710 occurred, being equal to 8·8 per cent. of the total deaths registered, and 54·9 in every 100,000 of its estimated population; in Munster as many as 1,368, or 14·6 per cent. of the total deaths registered therein during the quarter, this number affording a ratio of 98·8 in every 100,000 of its estimated population; in Ulster 787 took place, or 8·3 per cent. of the deaths registered in that province, and being 42 9 in every 100,000 of the estimated population therein; in Connaught the number was but 314, or 8·2 per cent. of the total deaths registered therein, during the quarter, and equalling 37·9 in every 100,000 of its estimated population.

Inquests.—In 824 instances inquests were held, affording a ratio of 1 inquest to every 37 deaths registered. In Leinster there was one inquest to every 30 deaths registered; in Munster 1 to 37; in Ulster 1 to 43; and in Connaught 1 to every 49.

Deaths in Public Institutions.—Of the 30,799 deaths *registered* in Ireland during the first quarter of 1873, 4,897, or 16 per cent. of the total deaths registered, were recorded by the officers of Public Institutions; in Leinster the per-centage was 20; in Munster 19; in Ulster 11; and in Connaught 12.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf, for the quarter ending 31st March, 1873, was 8*d.*, which was also the price during the corresponding period of 1872; in the first quarter of 1864 the average price was 6*d.*

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 16*s.* 4*d.* per cwt.; during the first quarter of 1872 it was 15*s.* In the corresponding period of 1864 it was only 11*s.*

At the Dublin Potato Market the average prices of potatoes during the quarter ranged from 4*s.* 6*d.* to 9*s.* 6*d.* per cwt., against 3*s.* 5*d.* to 4*s.* 5*d.* in the corresponding quarter of 1872; the average prices for the first quarter of 1864 were only 2*s.* 6*d.* to 3*s.* 3*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 65*s.* to 80*s.* 6*d.* per cwt., against 59*s.* to 72*s.* 6*d.* in the corresponding quarter of 1872; for the first quarter of 1864 the average prices were 51*s.* 6*d.* to 64*s.* 6*d.*

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1873 was 52,916, against 50,700 for the corresponding period of 1872.

Quarterly Reports.

The following statement shows the average prices of the foregoing articles of food in Dublin *during the first quarter* of the years 1864–73 :—

First Quarter.

Years.	Bread (Messrs. Manders & Co.'s 4 lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s. d.*	*s. d.* to *s. d.*	*s. d.* to *s. d.*
1864 (1st quarter),	6	11 0	2 6 to 3 3	51 6 to 64 6
1865 „	5½	11 9	3 1 to 3 7	54 6 to 68 0
1866 „	6½	14 10	2 6 to 3 6	50 6 to 63 6
1867 „	8	16 1	4 5 to 5 7	53 0 to 70 0
1868 „	9	16 10	4 6 to 5 2	49 6 to 63 6
1869 „	7	15 8	3 5 to 4 10	54 6 to 70 0
1870 „	6	14 3	3 9 to 4 8	54 6 to 66 6
1871 „	7½	15 2	3 1 to 5 6	60 0 to 73 6
1872 „	8	15 0	3 5 to 4 5	59 0 to 72 6
1873 „	8	16 4	4 6 to 9 6	65 0 to 80 6

The average weekly number of persons receiving out-door relief during the quarter was 32,012, against 28,030 for the first quarter of 1872.

Of the persons receiving in-door relief during the first quarter of 1873 an average number of 566 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1872 the average weekly number was 543.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the first quarter of the year 1873 was 29·892 inches, against an average of 29·813 inches for the corresponding quarter of the previous five years; the highest reading (30·744 inches) was on the 18th February, at 9.30 A.M., air calm; and the lowest (28·370 inches) on the 19th January, at 9.30 P.M., wind S.W.

The mean temperature of the air during the quarter was 40·7°, against an average of 42·8° for the corresponding period of the preceding five years. The maximum temperature was 59·8°, and the minimum 23·0°.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 6·092 inches. The average amount for the first quarter of the previous five years was 6·768 inches. The greatest monthly rain-fall during the quarter was in January, when 2·853 inches were registered.

The wind blew on 22 days from S.W., on 13 days from E., on 12 days from N.W., on 10 days from W., on 6 days each from N. and S., on 5 days from S.E., on 2 days from N.E., and the air was calm on 14 days, at 9.30 A.M.

Second Quarter.

Second Quarter.—April, May, June.

Marriages.—The number of marriages *registered* in Ireland during the second quarter of 1873 amounted to 5,029, equal to an annual ratio of 1 in every 265, or ·377 per cent., of the *estimated* population. The average number *registered* in the corresponding period of the preceding five years was 5,427.

Births.—The births *registered* during the second quarter of 1873 amounted to 39,565—20,246 boys and 19,319 girls—affording an annual ratio of 1 in every 33·7, or 2·97 per cent., of the *estimated* population. The average number of births registered during the corresponding quarter of the preceding five years was 40,332.

Deaths.—There were 26,112 deaths—12,995 males and 13,117 females—*registered* during the quarter, affording an annual ratio of 1 in 51·1, or 1·96 per cent., of the *estimated* population. The average number *registered* during the second quarter of the previous five years was 23,590.

Quarterly Reports.

Second Quarter.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th June, 1873, amounted to 47,414—26,784 males and 20,630 females. The average number of emigrants during the corresponding quarter of the preceding five years was 32,138.

Diseases.

Small Pox.—Two hundred and thirty-three deaths from small pox were registered in Ireland during the second quarter of 1873, of which number no less than 149 occurred in the Province of Munster, the Superintendent Registrar's District of Tralee alone contributing 94, making a total registered in this union in the first six months of the year, of 161, or 3·3 in every 1,000 of the population.* Of the 94 registered in the second quarter, 52 occurred in Tralee, No. 1 District (in which the workhouse is situated), 30 in No. 2 District, and 10 in Castlemaine—the Registrar of which again drew attention, in his note, to the bad sanitary state of his district. Sixteen deaths from this disease occurred in the Province of Leinster, and 67 in Ulster (of which number 40 took place in the union of Lurgan). There was no death from small pox in the Province of Connaught.

Measles.—The number of deaths from this disease registered during the quarter was 351, of which number 148 occurred in the Province of Munster; in Leinster the number was 60; in Ulster 96 (of which 75 occurred in the county of Antrim); and in Connaught 47.

Scarlet Fever.—There were 388 deaths from this disease registered during the quarter. Of this number as many as 147 occurred in Munster (57 were registered in the county of Cork and 52 in Waterford); in Leinster the number was 67; in Ulster 100; and in Connaught 74.

Diphtheria.—Fifty-six of the registered deaths were caused by this disease, viz.:—13 in Leinster; 8 in Munster; 34 in Ulster; and 1 in Connaught.

Whooping cough.—The deaths registered from whooping-cough amounted to 445—163 in Leinster; 135 in Munster; 90 in Ulster; and 57 in Connaught.

Fever.—This disease caused 1,014, or 3·9 per cent., of the total deaths registered during the quarter. Of this number 338, or 24·4 in every 100,000 of the estimated population, occurred in the Province of Munster; 240, or 18·6 in every 100,000, in Leinster; 259, or 14·1 in every 100,000, in Ulster; and 177, or 21·4 in every 100,000, in Connaught. The Registrar of Athenry District, Loughrea Union, reported the prevalence of fever of a very bad type in his district, which he attributed to the very bad water which the inhabitants are obliged to drink.

Diarrhœa.—Five hundred and seven deaths were attributed to this disease; of which number 198 occurred in Munster; 122 in Leinster; 135 in Ulster; and 52 in Connaught.

Simple Cholera.—Sixteen deaths were referred to this disease, viz.:—9 in Munster; 2 in Leinster; 4 in Ulster and 1 in Connaught.

Principal Zymotic or Epidemic Diseases.—The total number of deaths from the above-named zymotic or epidemic diseases registered during the second quarter of 1873, amounted to 3,010, or 11·5 per cent. of the total deaths registered, this number being equal to 56·4 in every 100,000 of the estimated population. In Leinster 683 occurred, being equal to 10·1 per cent. of the total deaths registered therein, and 52·8 in every 100,000 of its estimated population; in Munster as many as 1,132, or 15·4 per cent. of the total deaths registered therein during the quarter, this number affording a ratio of 81·8 in every 100,000 of its estimated population; in Ulster 785 took place, or 9·3 per cent. of the deaths registered in that province, and being 42·8 in every 100,000 of the estimated population therein; in Connaught the number was 410, or 11·5 per cent. of the total deaths registered therein during the quarter, and equalling 49·5 in every 100,000 of its estimated population.

* According to the Census of 1871.

Quarterly Reports. — Second Quarter.

Inquests.—The Registrars reported 623 cases of inquests, affording a ratio of 1 inquest to every 42 deaths registered. In Leinster there was 1 inquest to every 32 deaths registered; in Munster 1 to 45; in Ulster 1 to 45; and in Connaught 1 to 58.

Deaths in Public Institutions.—Of the 26,112 deaths *registered* in Ireland during the second quarter of 1873, 3,958, or 15·1 per cent., of the total deaths registered, occurred in Public Institutions; in Leinster the per-centage was 19·7; in Munster 18·5; in Ulster 10·5; and in Connaught 10·5.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf, for the quarter ending 30th June, 1873, was 8*d.*, which was ½*d.* lower than the average price for the corresponding period of 1872; in the second quarter of 1864 the average price was 6*d.*

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 17*s.* 5*d.* per cwt.; during the second quarter of 1872 it was 15*s.* 7*d.*; in the corresponding period of 1864 it was only 10*s.* 6*d.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 4*s.* 8*d.* to 10*s.* 4*d.* per cwt., against 4*s.* 11*d.* to 6*s.* 8*d.* in the corresponding quarter of 1872; the average prices for the second quarter of 1864 were only 2*s.* 11*d.* to 3*s.* 8*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 67*s.* to 89*s.* per cwt., against 59*s.* 6*d.* to 76*s.* 6*d.* in the corresponding period of the previous year; for the second quarter of 1864 the average prices were 53*s.* to 65*s.* 6*d.*

The following statement shows the average prices of the foregoing articles of food, in Dublin, *during the second quarter* of the years 1864–73:—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* *s.* *d.*	*s.* *d.* *s.* *d.*
1864 (2nd quarter),	6	10 6	2 11 to 3 8	53 0 to 65 6
1865 "	6	14 1	3 2 to 3 11	55 0 to 67 6
1866 "	6½	15 8	3 1 to 3 11	58 0 to 72 6
1867 "	8	18 5	5 3 to 6 6	53 6 to 70 6
1868 "	9	18 3	4 8 to 5 6	54 6 to 67 0

1872 "	8½	15 7	4 11 to 6 8	59 6 to 76 6
1873 "	8	17 5	4 8 to 10 4	67 0 to 89 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of the year 1873 was 47,818, against 46,338 for the corresponding period of 1872.

The average weekly number of persons receiving out-door relief during the quarter was 31,452, against 27,592 during the second quarter of 1872.

Of the persons receiving in-door relief during the second quarter of 1873 an average number of 567 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1872 the average weekly number was 551.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, during the second quarter of 1873, was 30·029 inches, against an average of 29·917 inches for the corresponding quarter of the preceding five years; the highest reading (30·485 inches) was on the 9th April, at 9.30 A.M., wind N.E.; and the lowest (29·411 inches) was on the 5th May, at 3.30 P.M., wind N.W.

The mean temperature of the air during the quarter was 52·1°, against an average of 52·3° for the corresponding period of the previous five years. The maximum temperature was 79·9°, and the minimum 30·3°.

Quarterly Reports. Second Quarter.

Rain fell on 38 days during the quarter. The rain-fall measured 2·736 inches, the average amount for the second quarter of the years 1868–72 being 5·424 inches. The greatest monthly rain-fall during the second quarter of the year 1873 was in June, when 1·199 inches were registered.

The wind blew on 21 days from W., on 15 days from E., on 14 days from N.E., on 12 days from N.W., on 9 days from S.W., on 7 days from N., on 3 days from S.E., on 2 days from S., and the air was calm on 8 days, at 9.30 A.M.

Third Quarter.

Third Quarter.—July, August, September.

Marriages.—The number of marriages *registered* in Ireland during the third quarter of 1873 amounted to 5,017, equal to an annual ratio of 1 in every 266, or ·376 per cent., of the *estimated* population. The average number *registered* in the corresponding period of the preceding five years was 5,301.

Births.—There were 33,513 births *registered* in Ireland during the quarter ended 30th September, 1873—17,176 boys and 16,337 girls—representing an annual ratio of 1 in every 39·8, or 2·51 per cent., of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding five years was 34,182.

Deaths.—The deaths *registered* in Ireland during the third quarter of the year 1873 amounted to 19,196—9,798 males and 9,398 females—affording an annual ratio of 1 in every 69·5, or 1·44 per cent., of the *estimated* population. The average number *registered* during the corresponding quarter of the previous five years was 18,443.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1873, amounted to 19,432—10,712 males and 8,720 females. The average number who emigrated during the corresponding quarter of the previous five years was 16,250.

TABLE showing, for each **Registration County** in Ireland, the Annual Rate per 1,000 of the Population, represented by the number of **Marriages, Births,** and **Deaths** *registered* in the Quarter ended 30th September, 1873.

Quarterly Reports.
Third Quarter.

Diseases.

Very many of the Registrars remarked on the healthy state of their respective districts during the quarter; some, however, still complained of the contiguity of cesspools and manure heaps to the dwellings of the humbler classes, and justly pointed to this as a fertile source of zymotic diseases of all kinds, but more particularly of typhoid fever and scarlatina.

Small Pox.—This disease, which caused as many as 163 deaths during the first and 233 in the second quarter of the year, proved fatal in only 33 instances during the third quarter, of which 13 took place in the province of Ulster and 20 in Munster; of the latter number, 13 occurred in the union of Tralee, which contributed, respectively, 67 and 94 deaths from small pox in the first and second quarters. It is gratifying to observe that the Registrar of Castlemaine District, in this union, who, on the two former occasions, felt it his duty to call attention to the wretched state of the dwellings of the poor in his district, in which several of the deaths from small pox occurred, reported that his district had been very healthy during the third quarter, and was free from this disease.

Measles.—The number of deaths from this disease registered during the quarter was 235, showing a further decrease, the number in the first quarter of the year having amounted to 559, and in the second to 351. Of the 235 deaths, 76 occurred in Leinster, 64 in Munster, 71 in Ulster, and 24 in Connaught.

Scarlet Fever.—During the first quarter of the year the deaths from scarlet fever amounted to 435; in the second to 388; and in the third quarter to 425, of which 78 took place in Leinster, as many as 206 in Munster, 101 in Ulster, and 40 in Connaught. Thirty-seven deaths from this disease occurred in the union of Lurgan. The Registrar of Portadown district, in this union, reports that scarlatina of a malignant type was very prevalent, principally in the back streets and the districts of the town where "the sanitary arrangements are most imperfect." The Registrar of Tartaraghan district, in the same union, also reported the disease as very prevalent, the type being very malignant, most of the deaths having taken place after a few hours' illness. Six deaths from scarlet fever were registered in the union of Magherafelt, all of which occurred in the Bellaghy District, the Registrar of which stated that the disease prevailed there as an epidemic for the last two months of the quarter. In the union of Clonakilty, county of Cork, 30 deaths from scarlet fever were *registered*; of this number, 17 occurred in the Timoleague District, the Registrar of which stated that he never knew scarlatina to be so fatal, very few cases being of a mild type; 12 took place in the Clonakilty district, the sanitary arrangements in which the Registrar reported as very defective. The union of Waterford contributed 44 of the deaths from scarlet fever, 24 having occurred in the Ullid District, where, however, at the close of the quarter, the disease had abated, and 18 in the Waterford district, where, according to the Registrar's report, it was still prevalent.

Diphtheria.—This disease caused 72 deaths, viz.:—32 in Leinster; 9 in Munster; 25 in Ulster; and 6 in Connaught. Of the 26 deaths *registered* in the Kilmood District, Newtownards Union, county of Down, as many as 7 were caused by diphtheria.

Whooping-cough.—The deaths from whooping-cough *registered* in the first quarter of the year numbered 507; in the second 445; and in the quarter now under consideration, 420, of which 160 occurred in Leinster, 127 in Munster, 64 in Ulster, and 69 in Connaught.

Fever.—The *registered* deaths from fever, which amounted to 905 in the first quarter, and rose to 1,014 in the second, fell to 648, of which 136 took place in Leinster, 177 in Munster, 213 in Ulster, and 122 in Connaught. The decline was most marked in Munster, where the disease had been very fatal, the numbers for the three quarters being respectively 311, 338, and 177.

Diarrhœa.—Six hundred and fifteen of the registered deaths were ascribed to diarrhœa—174 in Leinster; 186 in Munster; 199 in Ulster; and 56 in Connaught.

Quarterly Reports.

Third Quarter.

Simple Cholera.—Forty-seven deaths were attributed to simple cholera, viz.:—14 in Leinster; 15 in Munster; 13 in Ulster; and 5 in Connaught.

Principal Zymotic or Epidemic Diseases.—The total number of deaths from the above-named zymotic or epidemic diseases *registered* during the quarter was 2,495, or 13·0 per cent. of the total deaths, this number being 515 less than in the second quarter, and 684 under the number registered during the first quarter. The deaths from these diseases in the first quarter were equal to 59·6 in every 100,000 of the estimated population; in the second to 56·4; and in the third quarter to 46·7 per 100,000. Those registered in the third quarter were distributed as follows:—In Leinster, 670, or 12·7 per cent. of the total deaths registered in the province, and equal to 51·8 in every 100,000 of its population; in Munster, 804, or 15·5 per cent. of the total deaths, and 58·1 per 100,000 of the population; in Ulster, 699, or 11·1 per cent. of the total deaths, and 38·1 per 100,000 of the population; and in Connaught, 322, or 13·1 per cent. of the total deaths, and 38·9 in every 100,000 of the estimated population.

Inquests.—Six hundred and one inquests were reported to the Registrars, this number giving 1 inquest to every 32 deaths registered. In Leinster there was 1 inquest to every 25 deaths registered; in Munster, 1 to 35; in Ulster, 1 to 33; and in Connaught, 1 to 52.

Deaths in Public Institutions.—Of the 19,196 deaths *registered* in Ireland during the third quarter of 1873, 2,647, or 13·7 per cent. occurred in Public Institutions; in Leinster the per-centage was 16·2; in Munster 17·4; in Ulster 10·0; and in Connaught 9·8.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders & Co.'s 4-lb. loaf, for the quarter ending 30th September, 1873, was 8*d.*, being the same as for the corresponding period of 1872, and 2*d.* dearer than in the third quarter of 1864.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 18*s.* 3*d.* per cwt.; in the third quarter of the previous year it was 16*s.* 3*d.*, while in the corresponding quarter of 1864 it was only 10*s.* 8*d.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 5*s.* 6*d.* to 7*s.* 4*d.* per cwt., against 5*s.* 1*d.* to 7*s.* 6*d.* in the corresponding period of 1872; the average prices for the third quarter of 1864 were only 2*s.* 7*d.* to 3*s.* 10*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 66*s.* 6*d.* to 84*s.* 6*d.* per cwt., against 58*s.* 6*d.* to 77*s.* 6*d.* in the corresponding period of 1872; for the third quarter of 1864 the prices were 51*s.* to 62*s.* 6*d.*

The following statement shows the average prices of the foregoing articles of food in Dublin, *during the third quarter* of the years 1864-73:—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.

1872 „	8	16 3	5 1 to 7 6	58 6 to 77 6
1873 „	8	18 3	5 6 to 7 4	66 6 to 84 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of the year 1873 was 42,607, against 41,420 for the corresponding period of 1872.

Quarterly Reports.

The average weekly number of persons receiving out-door relief during the quarter was 29,171, against 26,079 for the third quarter of 1872.

Third Quarter.

Of the persons receiving in-door relief during the third quarter of 1873, an average number of 557 in each week were located in Asylums for the Blind and the the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1872 the average weekly number was 566.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the third quarter of the year 1873, was 29·897 inches, against an average of 29·982 inches for the corresponding quarter of the preceding five years; the highest reading (30·584 inches) was on the 21st September, at 9.30 P.M., the air being calm; and the lowest (29·416 inches) on the 28th August, at 9.30 A.M., wind N.

The mean temperature of the air during the quarter was 57·5°, against an average of 58·9° for the corresponding period of the preceding five years; the maximum temperature was 81·6° and the minimum 30·0°.

Rain fell on 65 days during the quarter. The rain-fall measured 10·440 inches; being the greatest amount registered in the third quarter of any year since 1864, when the publication of the Quarterly Returns was commenced. The average amount for the third quarter of the years 1868–72 was 7·360 inches. The greatest monthly rain-fall during the quarter was in August, when 4·340 inches were registered.

The wind blew on 31 days from W., on 24 days from S.W., on 12 days from S., on 8 days from N.W., on 6 days each from N. and S.E., and on 5 days from E., at 9.30 A.M.

Fourth Quarter.

Fourth Quarter.—October, November, December.

Marriages.—There were 5,441 marriages *registered* in Ireland during the fourth quarter of 1873, a number affording an annual ratio of 1 in every 245, or ·408 per cent. of the *estimated* population. The average number of marriages *registered* in the corresponding quarter of the previous five years was 6,021.

Births.—There were 32,474 births *registered* in Ireland during the quarter ended 31st December, 1873—16,820 boys and 15,654 girls—representing an annual ratio of 1 in every 41·1, or 2·43 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding five years was 34,029.

Deaths.—The deaths *registered* in Ireland during the fourth quarter of the year 1873 amounted to 21,430—10,846 males and 10,584 females—a number affording an annual ratio of 1 in every 62·3, or 1·61 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous five years was 21,279.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 31st December, 1873, amounted to 10,577—6,068 males and 4,509 females. The average number of emigrants during the fourth quarter of the preceding five years was 10,210.

Diseases.

Very many of the Registrars remarked on the healthy state of their respective districts during the quarter; some, however, continued to complain of the contiguity of cesspools and manure heaps to the dwellings of the humbler classes, and justly point to this as a fertile source of zymotic diseases of all kinds, but more particularly of typhoid fever and scarlatina. The Registrar of Carney District, No. 2, Sligo Union, writes that "*in many instances, two cows, a donkey and fowl are kept in the same room in which the people sleep, while the cesspools and accumulations of filth in the yards emit the most noxious odours.*"

Small-pox.—From this disease there were registered during the quarter 75 deaths, of which 62 occurred in the province of Ulster, 24 having taken place in the union of Londonderry and 13 in Magherafelt. In many instances the Registrars stated that the disease was imported into their districts from England or Scotland. The total number of deaths from small-pox *registered* during the year 1873 was 504, viz., 163 in the first, 233 in the second, 33 in the third, and 75 in the fourth quarter.

Measles.—There was a gradual decrease in the number of deaths from this disease during the several quarters; 559 having been *registered* in the first, 351 during the second, 235 in the third, and only 158 in the fourth; the total for the year being 1,303.

Quarterly Reports.

Fourth Quarter.

Scarlet Fever.—This disease caused as many as 845 deaths in the fourth quarter, of which number 364 occurred in the province of Munster, 269 in Leinster, 169 in Ulster, and 43 in Connaught. The deaths from scarlet fever *registered* during the first quarter numbered 435, in the second 388, in the third 425; the total for the year being thus 2,093.

Diphtheria.—During the fourth quarter 122 deaths resulted from diphtheria; the number *registered* in the first quarter was 76, during the second 56, and in the third 72; the total for the year being 326.

Whooping-cough.—This disease caused 614 deaths during the fourth quarter, thus making the total for the year 1,986, the numbers for the first, second, and third quarters having been 507, 445, and 420, respectively.

Fever.—The deaths from fever were most numerous in the second quarter of the year, when they amounted to 1,014; in the first quarter they amounted to 905, in the third to 648, and during the last quarter to 671, making a total for the year of 3,238.

Diarrhœa.—This disease, as usual, proved most fatal in the third quarter of the year, during which period 615 deaths from it were registered; in the first quarter the number was 525, in the second 507, and in the last 448, the total for the year being 2,095.

Simple Cholera.—This disease caused 91 deaths during the year, of which number 9 were registered in the first, 16 during the second, 47 in the third, and 19 during the fourth quarter.

Principal Zymotic or Epidemic Diseases.—The deaths from all the above-named zymotic or epidemic diseases *registered* during the fourth quarter of the year 1873 amounted to 2,952, or 13·8 per cent. of the total deaths, and equal to 55·3 in every 100,000 of the estimated population. The following table shows by quarterly periods the number of deaths from these diseases *registered* during the year:—

1873. — Quarter Ending	Deaths from principal Zymotic Diseases.									
	Small Pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping Cough.	Fever.	Diarrhœa and Simple Cholera.	Total.	Percentage of Total Deaths.	Rate per 100,000 of the Population.
31st March, .	163	559	435	76	507	905	534	3,179	10·3	59·6
30th June, .	233	351	388	56	445	1,014	523	3,010	11·5	56·4
30th September,	33	235	425	72	420	648	662	2,495	13·0	46·7
31st December, .	75	158	845	122	614	671	467	2,952	13·8	55·3
Total, .	504	1,303	2,093	326	1,986	3,238	2,186	11,636	11·9	218·0

From the above table it will be seen that 11,636 deaths, or 11·9 per cent., of the total deaths *registered*, and 218 in 100,000 of the estimated population, were caused during the year 1873 by the diseases named, the most fatal of them having been fever, which caused 27·8 per cent. of the 11,636 deaths; diarrhœa caused 18·8 per cent., scarlet fever 18 per cent., whooping-cough 17·1 per cent., measles 11·2 per cent., small-pox 4·3 per cent., and diphtheria 2·8 per cent.

Inquests.—Two thousand seven hundred and fifty-seven deaths on which inquests were held were registered during the year, being equal to 1 in every 35 of the total deaths registered. Of this number 824 were in the first quarter, 623 in the second, 601 in the third, and 709 in the last.

Deaths in Public Institutions.—The deaths of 14,699 persons who died in public institutions were *registered* during the year, affording a ratio of 1 in every 6·6 of the total deaths *registered*. Of these deaths 4,897 were *registered* in the first quarter, 3,958 during the second, 2,647 in the third, and 3,197 during the fourth.

PRICES OF PROVISIONS, AND PAUPERISM.

During the whole of the fourth quarter of 1873 the price of Messrs. Manders and Co.'s 4-lb. loaf was 8½*d.*, being ½*d.* dearer than the average price in the corresponding quarter of 1872. In the fourth quarter of 1864, the price was only 5½*d.*

The average price of oatmeal in Dublin for the quarter was 16*s.* 7*d.* per cwt.; being the same as for the corresponding quarter of 1872. In the fourth quarter of 1864 the average price was 10*s.* 10*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato market for the fourth quarter of 1873 were 3*s.* 3*d.* to 4*s.* 9*d.* In the fourth quarter of 1872 the average prices were 5*s.* 4*d.* to 7*s.* 8*d.*, and in the corresponding quarter of 1864 they were 2*s.* 2*d.* to 3*s.* 4*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 57*s.* 6*d.* to 77*s.* per cwt., against 58*s.* to 73*s.* in the corresponding quarter of 1872, and 49*s.* 6*d.* to 65*s.* 6*d.* in the fourth quarter of 1864.

The following statement shows the average prices of the above-mentioned articles of food in Dublin *during the fourth quarter* of the years 1864–73:—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (4th quarter),	5½	10 10	2 2 to 3 4	49 6 to 65 6
1865 „ .	7	15 1	2 9 to 3 8	50 6 to 63 6
1866 „ .	7½	15 11	3 1 to 4 11	48 6 to 67 0
1867 „ .	9	17 4	3 10 to 4 7	45 6 to 62 0
1868 „ .	7½	16 4	2 11 to 4 7	49 6 to 65 0
1869 „ .	6½	15 1	2 11 to 4 0	52 6 to 67 0
1870 „ .	7	15 1	2 10 to 3 8	54 0 to 70 6
1871 „ .	8	15 0	2 6 to 4 4	58 0 to 70 6
1872 „ .	8	16 7	5 4 to 7 8	58 0 to 73 0
1873 „ .	8½	16 7	3 3 to 4 9	57 6 to 77 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1873 was 46,225, against 45,756 for the corresponding period of 1872.

The average weekly number of persons receiving out-door relief during the quarter was 28,211, against 26,516 for the fourth quarter of 1872.

Of the persons receiving in-door relief during the fourth quarter of 1873 an average number of 561 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1872 the average weekly number was 564.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park during the fourth quarter of the year 1873 was 29·971 inches, against an average of 29·825 inches for the corresponding quarter of the previous five years; the highest reading (30·607 inches) was on the 13th December, at 9.30 A.M., air calm; and the lowest (28·943 inches) on the 23rd October, at 3.30 P.M., wind W.

The mean temperature of the air during the quarter was 44·8°, against an average of 44·1° for the corresponding period of the preceding five years. The maximum temperature was 70·6°, and the minimum 23·0°.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 6·260 inches, being under the average for this period of the year, and only one-half of the amount registered in the fourth quarter of 1872. The greatest monthly rain-fall during the quarter was in October, when 3·198 inches were registered.

The wind blew on 26 days from W., on 17 days from S., on 16 days from S.W., on 7 days from E., on 6 days from N.W., on 5 days from N.E., on 4 days from S.E., on 2 days from N., and on 9 days the air was calm, at 9.30 A.M.

Population of Ireland (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1873, inclusive:—

1825	7,172,722	3,516,230	3,656,492	1850	6,877,549	3,361,009	3,516,540				

Note.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-3—The English birth and death rates have been employed, deducting the number of emigrants according to the returns obtained by the Registrar-General.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1873.

ABSTRACT OF MARRIAGES.—Marriages *registered* in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*	Area in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Population, 1871.	TOTAL MARRIAGES.	MARRIAGES Registered under the Act 7 & 8 Vic., c. 81. According to the Rites of the late Established Church. Special Licence.	Licence.	Banns.	Registrar's Certificate. * For remainder of Belfast see next page.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—**NORTH-EASTERN DIVISION.**—BIRTHS AND DEATHS, 1873—REGISTRARS' DISTRICTS—*continued.*

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† According to the Census of 1871.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I., The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II., The North-Western Division, is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III., The Eastern Division, is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV., The North Midland Division, is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V., The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI., The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlercagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII., The South-Eastern Division.—This division extends from its junction with the "Eastern" division, southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county

No. VIII., The South-Western Division, extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland, from William M. Burke, Esq., F.C.P.I.

Year 1873.

Sir,

I beg to bring under your notice some few observations on those causes which principally effected the mortality of the year 1873.

The causes of death are often very obscure, and many die who have not been visited for long periods prior to death by any medical man.

There has been a still further improvement in registration, and the returns are furnished with greater promptitude by the Registrars.

The total number of deaths registered in Ireland during the year 1873 was 97,537, against 97,294 in the year preceding, showing an increase of 243 as compared with the year 1872.

The year at present under review completes the first decade of the registration of deaths in Ireland, as the Act came into operation on the 1st of January, 1864. I accordingly give tables showing the yearly mortality by Registration Divisions from the most important diseases, the average annual number of deaths for the ten years, together with the annual average rate per 100,000 inhabitants in each division, and for the total of Ireland.

Table I.—Showing, by Divisions, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class *registered* in Ireland during the Ten Years 1863–74; the Average Annual Number; and the Average Annual Rate per 100,000 of the Estimated Population.

I. ZYMOTIC DISEASES.

The average annual number of deaths from zymotic diseases *registered* in Ireland for the ten years 1864–73 was 16,850, affording an average annual rate of 304·80 per 100,000 of the estimated population. The number of deaths from this class of diseases registered in 1873 amounted to 15,594.

In 1864 the deaths from zymotic diseases amounted to 19,064; in 1865 to 19,802, and in 1866 to 19,626; in 1867 and 1868 the numbers decreased to

16,066 and 16,487 respectively. Since the latter year the deaths from this class of diseases have not reached 16,000, with the exception of the year 1872, when small-pox was epidemic. The Eastern Division afforded the highest death-rate—410·01 per 100,000 of the inhabitants; the North-Eastern and South-Western afforded rates nearly similar to each other—335·12 and 335·56 respectively; while in the North Midland the rate was but 210·94, and in the North-Western 219·96.

Small-pox.—From the foregoing table No. 1 it will be learned that in the year 1872 this disease proved most fatal, numbering 3,248 victims; in the year 1864, 854 deaths from this cause were registered; 665 deaths from small-pox were registered in the year 1871; in 1873 the deaths numbered 504; in 1865 they were 461; and in 1866 they were but 194; for the remaining four years of the decade (1867–70) the average number of deaths from small-pox was only 24. The total deaths registered from this disease during the decade afforded an annual average of 602, or 10·89 in every 100,000 of the estimated population. The Eastern Division suffered most—the average annual number of deaths having amounted to 233, or 29·12 in every 100,000; in the South-Western Division the rate was 17·74; in the North-Eastern, 11·03; in the Western Division, but 4·9; in the North-Western, only 3·88; in the South-Eastern, 3·65; in the North Midland, 3·58; and in the South Midland Division the annual average rate per 100,000 of the estimated population was but 2·35.

Measles caused 1,303 deaths in 1873—the average annual number of deaths from this disease for the ten years 1864–73 amounted to 1,019, or an annual average rate of 18·43 per 100,000 of the estimated population. In 1871 there were but 547 deaths registered from this disease, little more than half the average number for the ten years.

Scarlet fever was the cause of 2,093 deaths—the annual average number for the decade 1864–73 having been 2,804, affording an annual average rate of 50·72 per 100,000 of the inhabitants. The year in which this disease proved most fatal was 1865, when 3,683 deaths were registered; next in order was the year 1869, when the deaths numbered 3,670, and in 1866 they were 3,501; in no other year of the decade did the deaths registered from scarlet fever amount to 3,000.

The North-Eastern Division suffered most from this disease, the deaths registered therein showing an annual average rate of 65·29 per 100,000 inhabitants; in the Eastern Division the rate was 61·87; in the South-Western, 57·47; in the South-Eastern, 54·04; in the South-Midland, 43·52; in the Western, 38·30; in the North-Western, 34·39; and in the North-Midland Division, 31·27 per 100,000 of the inhabitants.

Diphtheria.—The deaths from this disease registered in 1873 amounted to 326, the average for the ten years having been 309; more than double the average number of deaths from diphtheria were registered in the year 1864—the number contributed by the North-Eastern Division being proportionately in excess of any of the other divisions.

Quinsy.—300 deaths resulted from this disease in the year 1873, showing an increase of 54 as compared with the year preceding.

Croup.—The deaths from croup during 1873 amounted to 1,618—males 889, and females 729. The deaths from croup were greatest, in proportion to the population in the Western, and South-Western, Divisions.

Whooping-cough.—The number of persons (nearly all under five years of age) who were killed by whooping-cough in 1873 was 1,986—913 males, and 1,073 females. The average annual number of deaths from whooping-cough for the ten years 1864–73 was 1,756, which affords an annual average rate of 31·76 per 100,000 inhabitants.

In the years 1867 and '68 there were registered from this disease 2,144 and 2,380 deaths, respectively, while in 1870 and '71 there were but 1,319 and 1,388, respectively. In proportion to the population, the deaths from whooping-cough were greatest in the Eastern, North-Eastern, and South-Western Divisions, and lowest in the South-Midland, North-Western, and Western.

Fever.—3,238 deaths were registered from fever during the year 1873. Of this number 691 were ascribed to typhus, 1,048 to typhoid, or enteric, and the remaining 1,499 were returned as simple continued, or merely as "fever." The number of deaths registered from fever during the year 1873 was considerably below the average of the ten years, which amounted to 3,798, representing an annual average rate of 68·70 per 100,000 inhabitants. There were 5,152 registered in 1864, and 5,283 in 1865. In 1870 there were but 2,985 deaths registered from this disease. The average annual death-rate from fever (87·87) was greatest in the Eastern Division, next in order was the South Midland, with 77 65, and the North-Eastern ranked third, with 74·80. The North Midland Division showed the lowest average annual death-rate from fever, namely, 47·27 in every 100,000 inhabitants.

Erysipelas.—The deaths from erysipelas numbered 234, against an annual average of 291 for the decade. The death-rate from this disease was highest in the Eastern, and lowest in the Western Division.

Metria or Puerperal Fever.—275 women died in 1873 from child-bed fever; the annual average of deaths for the ten years from this cause was 309.

Influenza.—The deaths from this disease amounted to 100—44 males, and 56 females; the average annual number of deaths from influenza for the decade was 166.

Dysentery.—In 298 instances dysentery proved fatal, being much below the annual average for the ten years 1864–73, which was 456.

Diarrhœa.—The deaths from diarrhœa registered in 1873 amounted to 2,095; the average annual number of deaths from this disease during the decade was 1,937, showing an average annual rate of 35·04 per 100,000 of the inhabitants. The death-rates from diarrhœa in the Eastern and North-Eastern Divisions are represented by 55·50, and 42·42 respectively, being much higher than in any other of the divisions. In the Western Division the rate was 20·05; in the North-Western 19·60, and in the North-Midland Division 19·02 per 100,000 of the estimated population.

Cholera.—91 deaths were ascribed to simple cholera. An epidemic of malignant cholera prevailed in the year 1866, during which 2,501 deaths were registered therefrom. In the following year there were 387 deaths from this disease, nearly all of which were registered during the first quarter of the year, and it is more than probable that the greater number of these deaths, though registered in 1867, had occurred during the last quarter of the previous year.

Glanders.—Three men died from this disease.

II. Constitutional Diseases.

To that class of diseases termed "constitutional," 17,152 deaths were referred, of these, 8,367 were males, and 8,785 females.

Phthisis or Pulmonary Consumption.—The following table has been constructed, which shows the total deaths from phthisis registered during each of the ten years 1864–73 :—

Table II.—Showing, by Divisions, the Number of Deaths from Phthisis or Pulmonary Consumption *registered* in Ireland during the Ten Years 1863–74; the Average Annual Number; and the Average Annual Death-rate.

Disease.		Divisions.								Total, Ireland.
		North-Eastern.	North-Western.	Eastern.	North Midland.	South Midland.	Western.	South-Eastern.	South-Western.	
Phthisis, or Consumption,	1864,	2,564	886	1,933	699	833	726	865	1,229	9,735
	1865,	2,711	922	2,190	749	814	726	867	1,197	10,176
	1866,	2,802	921	2,072	753	809	630	906	1,226	10,119
	1867,	2,865	862	2,206	818	839	686	861	1,246	10,383
	1868,	2,590	839	1,970	732	792	647	781	1,089	9,440
	1869,	2,765	847	1,957	786	820	731	875	1,202	9,983
	1870,	2,681	908	2,023	775	821	730	806	1,245	9,989
	1871,	2,886	884	2,010	767	889	795	843	1,353	10,427
	1872,	2,825	860	2,191	731	833	805	826	1,359	10,430
	1873,	2,757	932	2,079	705	812	877	830	1,349	10,341
Average annual number, 1864–73, ...		2,745	886	2,063	752	826	735	846	1,249	10,102
Average annual rate per 100,000 Inhabitants, .		246·18	163·81	257·86	141·63	176·21	93·85	181·42	151·76	182·73

The average annual number of deaths from phthisis for the ten years was 10,102, or 182·73 per 100,000 of the estimated population. The number registered during the year 1873 was slightly over the average, viz., 10,341. From the table it will be observed, that the divisions lying along the Northern and Eastern coasts afford the highest death-rates. Thus, the number of deaths registered from this disease in the Eastern Division gives a death-rate of 257·86 per 100,000 of the population; the North-Eastern 246·18, and the South-Eastern 181·42, whereas in the Western Division the rate was only 93·85 per 100,000. The number of deaths from phthisis registered during each year of the decade was very uniform.

Mesenteric Disease.—To mesenteric disease 1,464 deaths were ascribed—the sexes being 751 males and 713 females. Marasmus, another term for this disease, occurs chiefly in children who are ill-fed and who breathe the impure air of lanes and alleys wholly unprovided with any sanitary appliances; its proximate cause is scrofulous disease of the mesenteric glands. The deaths registered from mesenteric disease in 1872 numbered 1,419.

Hydrocephalus or Water on the Brain.—1,089 deaths (611 males, 478 females) resulted from hydrocephalus. The deaths in the preceding year from the same cause amounted to 1,073—607 males and 466 females.

Scrofula.—The deaths returned under the head of scrofula amounted to 1,011—571 males and 440 females, against 984—539 males and 445 females—in the year 1872.

Cancer.—1,744 persons died from this fearful malady; and, as usual, it proved

most fatal among women, the proportion being 994 females to 750 males. In the year preceding 1,750 deaths from cancer were registered.

Dropsy.—The deaths caused by dropsy numbered 1,282—564 males and 718 females, against 1,206 in the previous year.

III. Local Diseases.

The number of deaths registered from "local diseases" amounted to 32,993—17,744 males and 15,249 females—or 1 in 2·96 of the total deaths registered; in 1872 the deaths registered from this class of disease amounted to 31,160—17,114 males and 14,046 females—or 1 in 3·1 of all the deaths registered.

Diseases of the Nervous System.—From this group of diseases there resulted 8,881 deaths—4,916 males and 3,965 females—showing a slight increase on the number registered from the same causes in the year preceding. Of those registered during the year 1873, 4,087 were referred to convulsions, 1,813 to paralysis, 963 to apoplexy, 593 to cephalitis or inflammation of the brain, 346 to epilepsy, 227 to insanity, 3 to chorea or St. Vitus's dance, and in 849 instances death was ascribed to brain disease unspecified.

Diseases of the Organs of Circulation.—Under this heading were tabulated 4,236 deaths—2,219 males and 2,017 females; being 298 in excess of the number registered in the previous year. Deaths from heart disease numbered 4,050; from aneurism, 100; from pericarditis or inflammation of the heart's covering, 86.

*Diseases of the Respiratory Organs.**—The following Table No. III. shows the deaths registered from this group of diseases during each of the ten years 1864–73, from which it may be seen that the annual average number was 13,144, or 237·76 per 100,000 of the inhabitants. The deaths (13,664) registered during the year 1873 were 520 above the average.

Table III.—Showing, by Divisions, the Number of Deaths from Diseases of the Respiratory Organs *registered* in Ireland during the Ten Years 1864–73; the Average Annual Number; and Annual Average Death-rate.

Diseases.		Divisions.								Total, Ireland.

Average annual rate per 100,000 Inhabitants,		243·67	157·34	328·85	209·44	223·78	164·32	289·93	260·62	237·76

* Phthisis or Pulmonary Consumption is not included in this group—see "Constitutional Diseases."

The Eastern and South-Eastern Divisions suffered most in proportion to their population from diseases of the respiratory organs. In 1868 there were only 10,393 deaths registered from diseases of the respiratory organs, being 2,751 below the average of the decade. The diminution in the deaths referred to these diseases in 1868, is attributable to the higher temperature of the air in that year, especially during the first three months, the quarter in which diseases of the respiratory organs prove most fatal. Of the deaths from these diseases registered in 1873, 10,355—5,135 males and 5,220 females—were attributed to bronchitis; 1,618—1,034 males and 584 females—to pneumonia or inflammation of the lungs; 544 to asthma; 294 to pleurisy; 109 to laryngitis; and 744 to "lung disease unspecified."

Diseases of the Digestive Organs.—From diseases of this description there died 4,470 persons—2,416 males and 2,054 females—against 4,413 registered in the previous year. Enteritis or inflammation of the bowels caused 518 deaths; gastritis or inflammation of the stomach, 309; peritonitis or inflammation of the covering of the bowels, 278; ileus or obstruction of the bowels, 339; stomach disease unspecified, 837; hepatitis or inflammation of the liver, 206; jaundice, 143; liver disease unspecified, 1,114; 17 deaths were referred to spleen disease.

Diseases of the Urinary Organs.—1,218 deaths were ascribed to various affections of the urinary organs—935 males and 283 females. Of this number 576 were returned as "kidney disease unspecified;" 266 were referred to nephria or Bright's disease; 126 to diabetes; 86 to cystitis or inflammation of the bladder; 79 to nephritis or inflammation of the kidneys; 71 to ischuria or "suppression of the secretion of urine;" and 14 to stone in the bladder.

Diseases of the Organs of Generation.—To diseases of this class 135 deaths were referred; one of these deaths is said to have occurred from hydrocele; the remainder were caused by ovarian disease, (62), and uterine disease, (72).

Diseases of the organs of locomotion caused 174 deaths, and *diseases of the integumentary system* 215, of which 89 were ascribed to ulcer, 6 to phlegmon, and 120 to diseases of the skin.

IV. Developmental Diseases.

The deaths dependent on the growth and decay of the human frame amounted to 27,132—12,347 males and 14,785 females. 21,013—9,442 males and 11,571 females were referred to old age; 5,069 to debility—2,603 males and 2,466 females. The number of deaths ascribed to premature birth was 242—140 males and 102 females; 248—135 males and 113 females, were referred to teething, of which number 107 took place in the North-Eastern Division. 16 deaths occurred from cyanosis against 3 in the year preceding. Of the persons who died from cyanosis, 1, a male, was stated to have attained the age of 45, and 2 females were returned as 20 years and upwards; 17 deaths were caused by spina bifida, and 18 by other malformations.

The deaths registered from the accidents of childbirth amounted to 493; the average annual number for the ten years was 628. If to 493 deaths registered in the year 1873, the deaths from metria or childbed fever (275) be added, we have a total of 768 deaths of parturient women, or the death of one mother to every 188 of the births registered during the year.

V. Violent Deaths.

The total number of deaths from violence *registered* during the year 1873 was ,127—1,480 males and 647 females. The average annual number for the ten years 1864–73 was 2,144, or 38·78 in 100,000 of the inhabitants.

Table IV.—Showing, by Divisions, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths) *registered* during the Ten Years 1864–73; the Average Annual Number; and the Average Rate per 100,000 of the Inhabitants.

Class.	Divisions.								Total, Ireland.
	North-Eastern.	North-Western.	Eastern.	North Midland.	South Midland.	Western.	South-Eastern.	South-Western.	
Violent Deaths, 1864,	463	223	391	165	192	223	238	315	2,210
1865,	416	197	385	173	189	248	198	377	2,183
1866,	477	146	415	153	174	227	227	343	2,162
1867,	426	186	406	159	147	256	219	378	2,177
1868,	444	174	395	174	166	259	192	339	2,143
1869,	443	179	374	194	159	230	191	361	2,131
1870,	427	171	428	163	165	247	210	394	2,205
1871,	432	167	385	174	164	227	189	363	2,101
1872,	434	163	387	132	145	233	159	345	1,998
1873,	464	155	417	156	149	240	204	342	2,127
Average annual number, 1864–73, . . .	443	176	398	164	165	239	203	356	2,144
Average annual rate per 100,000 Inhabitants, .	39·73	32·54	49·75	30·89	35·20	30·52	43·53	43·25	38·78

In proportion to the population, violent deaths were greatest in the Eastern, South-Eastern, and South-Western Divisions, and lowest in the Western, North-Midland, and North-Western. Of the violent deaths, 1,904 were accidental, 88 homicidal, 86—68 males and 18 females—suicidal; 2 males were executed, and in 47 instances the returns did not afford information as to whether the deaths were accidental, homicidal, or suicidal.

In 339 instances of sudden death the cause was unascertained.

The cause of death was not specified in 2,200 instances, against 2,385 in the year 1872.

The ratio of unspecified deaths to the total deaths registered was 1 in 40·8 in 1872, and 1 in 44·3 in 1873.

I am,
Sir,
Your obedient servant,
W. M. BURKE.

To

The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31*st December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown*—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,
Your obedient Servant,
WILLIAM DONNELLY
Registrar-General.

To the
Registrar of Births, Deaths, and Marriages,
District of ———

* The Right Honorable Thomas O'Hagan, Attorney-General (now Lord O'Hagan; and James A. Lawson, Esq., Solicitor-General—now a Judge of the Common Pleas.

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 75 (*see* page 34), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]

Population, Marriages, Births, Deaths, and Emigration in 1874, . . . 5
Marriages—their Number and Proportion to the Population, ... 5
Minors, Widowers and Widows, and Signatures to Marriage Registers, . . 5
Ages of Persons Married, ... 6
Number of Marriages and Proportional Number (1) of Persons Married who wrote their Names in the Registers, (2) of Persons not of Full Age, and (3) of Re-marriages, in each Registration Division in the years 1864-74 (Table I.), ... 7
Marriages (1) of Roman Catholics, (2) of Protestants, and the total Number registered in each Quarter of the Year, ... 8
Marriages of Protestants from 1845 to 1874, celebrated *according* and *not according* to the Rites of the late Established Church (Table II.), ... 9
Buildings registered for the Solemnization of Protestant Marriages (Table III.), . . 10
Marriages by Registrars' Licence, and by Presbyterian Ministers' Licence, . . . 12
Births registered in 1874, ... 12
Deaths registered in 1874, ... 13
Emigration from each Province during the year 1874, ... 14
Meteorological Observations, ... 14
Remarks on the progress of Registration, ... 15

Summary of the Quarterly Reports, 1874:

First Quarter, ending March 31st, ... 17
Second Quarter, ending June 30th, ... 21
Third Quarter, ending September 30th, ... 25
Fourth Quarter, ending December 31st, ... 29
Estimated Population of Ireland from 1801 to 1874, ... 34

ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1874, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors, and of those who signed the Registers by Marks, ... 36-45

Ages of 14,830 Persons married in 1874, distinguishing those of Bachelors, Spinsters, Widowers, and Widows, ... 46, 47

Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1874; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births throughout, ... 48-7

Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1874, ... 74-83

Page

Deaths registered in each of the Four Quarters of 1874 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, 84–93

Deaths of Males and Females at different Ages registered in 1874, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, . . . 94–101

Causes of Death of Males and Females in Ireland, at different periods of life, in 1874, . 102–109

Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1874, ... 110–113

Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1874, . 114–121

Deaths from several Zymotic and other Causes in 1874, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties, . . . 122–125

Topographical Description of the Eight Registration Divisions of Ireland, . . . 126

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1874, from WILLIAM M. BURKE, Esq., F.C.P.I., ... 127–136

Copy of Circular relating to Registration of Roman Catholic Marriages, . . . 137

Index of Superintendent Registrars' Districts, and of Registrars' Districts, . . . 138–145

REPORT

TO

His Grace, JAMES, DUKE OF ABERCORN, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Grace, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1874.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1874, was presented to Parliament in the Session of 1875. The Report now submitted contains detailed tables of the Ages and Condition of persons Married; of Births, distinguishing legitimate from illegitimate; and of Deaths, and their Causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 791 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1874 was 5,314,844; the persons whose marriages were registered during the year, amounted to 48,962, the number of marriages being 24,481; children born alive whose births were registered, amounted to 141,288; and the number of deaths registered was 91,961. The emigrants from Ireland during the year 1874 were 73,184. In the previous year—1873—there were *registered* 25,730 marriages, 144,377 births, and 97,537 deaths; the number of emigrants was 90,149.

MARRIAGES.

24,481 marriages were registered in Ireland during 1874, being in the proportion of 1 marriage to every 217 of the *estimated* population.

571 men and 2,905 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 2·33; of females, 11·87 per cent.

Of widowers, 2,777, and of widows, 1,437 were re-married; the proportion to the total marriages being 11·34 per cent. of widowers, and 5·87 per cent. of widows.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 48,962 persons married in 1874, 16,284 (7,367 men and 8,917 women) signed the registers with marks; being in the proportion of 33·26 per cent.—30·09 per cent. of the males, and 36·42 per cent. of the females married. In the year 1864, 38·6 per cent. of the males, and 50·3 per cent. of the females married, signed the register by marks.

In 1874 the marriage register was signed by mark by both parties in 5,657, and by one or other of the persons married in 4,970 instances—thus in 10,627, or 43·4 per cent. of the total number of marriages registered, one or both of the persons married signed by mark.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1874 the exact ages of both parties were given in 7,415 instances. Of these 6,606 were bachelors, and 7,000 spinsters; 809 were widowers, and 415 widows. The largest number of wives married between the ages of 21 and 30—the number being 4,417, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—4,104—also married between 21 and 30 years of age.

222 bachelors were married to widows, both of whose ages at the time of marriage are recorded. 105 of these widows and 93 of the bachelors married between 25 and 35 years of age. 616 of the marriages in which the ages of both parties were recorded, were between widowers and spinsters, 333 of the former being between the ages of 30 and 45, and 405 of the latter between 21 and 35.

Of widowers and widows married, whose ages at the time of marriage were stated, there were 193 couples. Of these the largest number of widows were between 35 and 45, and of widowers between 50 and 60.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the

occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to the Act coming into operation.

The number of marriages registered in each of the eleven years 1864–74; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Number of Marriages in the Eight Divisions of Ireland during the years* 1864–74, *and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.*

	Registration Divisions.		Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.	
								Widowers.	Widows.

		1874	3,637	70·1	62·6	2·20	13·45	9·73	6·79

The extent and position of each of these divisions are specified at p. 126.

Of the total number of marriages (24,481) registered in 1874, 17,348 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 7,133 marriages were of members of the various Protestant persuasions. Of the latter marriages 3,914 were in churches and chapels of the late Established Church, 2,365 in Presbyterian

Meeting-houses, 299 in "Registered Buildings," 547 in the Registrars' offices, 7 according to the usages of the Society of Friends, and 1 marriage was between members of the Jewish persuasion.

Of the entire number of marriages in 1874 there were contracted in the quarter ending the last day of March, 9,309; of June, 5,123; of September, 4,921; of December, 5,128.

The following table gives a statement showing in continuation of the return in my report for 1873, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1874, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the late Established Church.						Marriages. Not according to the Rites of the late Established Church.						Total Marriages registered under 7 & 8 Vic., cap. 81.
	Special License.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	Total.	In Registered Presbyterian Meeting-houses.	In Registered Buildings.	In the Registrars' Offices.	Society of Friends.	Jews.	Total.

There is not any return made to me of the places of worship belonging to Roman Catholics, in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting

* The 7 and 8 Vic., c. 81, came into operation 1st April, 1845.

† The increase in the number of marriages by Special Licence and in those on Registrar's Certificate in 1871 is caused by the provisions of sections 36 and 38 of "The Matrimonial Causes and Marriage Law (Ireland) Amendment Act, 1870," and the decrease of Marriages on Registrar's Certificate, in 1872 and subsequent years by the operation of sections 25, 26, and 27 of 34 & 35 Vic., cap. 49.

other religious persuasions, that there were 1,506 Churches and Chapels of the late Established Church, 593 registered Presbyterian Meeting-houses, and 275 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1874. During the year 1874 there was a decrease of 3 such places in the late Established Church; an increase of 3 in the Presbyterian Church; and an increase of 9 in other religious communities. The "Registered Buildings" belong to the following denominations:

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	154	Church Methodists,	1
Reformed Presbyterians,	36	Covenanters,	1
Independents,	21	United Original Seceders,	1
Baptists,	17	Protestant Dissenters,	1
Seceders,	11	Christians,	1
United Presbyterians,	9	Non-Subscribing Unitarians,	1
Methodists New Connexion,	7	"The Catholic Apostolic Church,"	1
Moravians, or United Brethren,	5	Jews,	1
Primitive Wesleyan Methodists,	5		
Evangelical Union,	2	Total,	275

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages under the 7 & 8 Vic., cap. 81, and Acts amending same,* may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1874 there were issued by the Registrars, 649 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1874.	Number of Registered Meeting-houses on 31st December, 1874.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	125	554	2,330
2. Remonstrant Synod of Ulster,	9	21	37
3. Presbytery of Antrim,	4	9	10
4. United Presbytery or Synod of Munster,	3	4	1
5. Northern Presbytery of Antrim,	1	5	16
Total,	142	593	2,394

BIRTHS.

The births registered in Ireland during 1874, amounted to 141,288. Of these, 72,516 were males, and 68,772 females, being in the proportion of 105 boys to every 100 girls.

The rate per cent. of births to the *estimated* population was 2·66, or 1 in 37·6 of the population.

There were 3,265 illegitimate births, of which 1,694 were those of males, and 1,571 females; the proportion to the total number of births being 2·3 in every 100. The highest rates, 4·6 and 2·6, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in the years 1870–74.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1870–74, *by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.

36,584 births were registered during the quarter ended 31st March; 38,514 in that ended 30th June; 33,831 during that ended 30th September and 32,359 in that ended 31st December.

DEATHS.

The deaths registered in 1874 amounted to 91,961—46,474 males, and 45,487 females—being in the proportion of 1·73 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 58 persons.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Per-centage of the Total Deaths which occurred at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864–1874, *by Sexes.*

Of the persons whose deaths were registered during the year 26·38 in every 100 were children under 5 years old—27·83 per cent. of the males and 24·90 per cent. of the females. 15·83 per cent. of the males, and 17·54 per cent. of the females, whose deaths were registered had passed their 75th year. 72 of the males and 89 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

25,770 deaths were registered during the first quarter of the year; 24,063 during the second; 19,538 during the third; and 22,590 during the fourth quarter.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several seaports, the number of emigrants who left Ireland during the year 1874 amounted to 73,184; of these, 39,096 were males and 34,088 females. Of the whole number, 11,710 were from Leinster; 24,272 from Munster; 27,734 from Ulster; and 9,451 from Connaught: 17 persons did not state the county or province to which they belonged.

Of the emigrants in 1874, 16·7 per cent. were under 15 years of age; 69·4 per cent. were 15 to 35 years old; and 13·9 per cent. were 35 and upwards.

METEOROLOGY.

The following particulars have been extracted from Returns of Meteorological Observations taken at the Ordnance Survey Office,* Phœnix Park, Dublin, during the years 1864–74, furnished by Colonel Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The mean height of the barometer during the year 1874 was 29·948 inches, against an average of 29·916 inches for the preceding ten years. The highest reading during the year (30·821) was on the 6th March, at 9.30 P.M., air calm, and the lowest (28·595 inches) was on the 11th December, at 3.30 P.M., wind W.

The mean temperature for the year was 49·0°; the highest registered was 81·3° on the 18th July, and the lowest was 22·5° on the 5th February. The average mean temperature for the years 1864–73 was 49·5°.

Rain or snow fell on 186 days during the year, the amount being 27·833 inches. The average annual rain-fall for the preceding ten years was ·938 in. less, while the average number of days on which rain or snow fell annually, in that period, was 192.

During the year 1874, Westerly winds were even more prevalent than usual, the number of days on which it blew from one of the three points, S.W., W., N.W., at 9.30 A.M., being 237 against an average of 202 days in the ten years 1864-73. The prevailing wind was the W., it having blown from that point on 119 days, with an average pressure of 2·26 lbs. per square foot. The strongest winds, S.W., were on the 27th March and 2nd April, the pressure being 25 lbs. per square foot.

* Latitude 53° 21′ 44·65″, north; longitude 6° 21′ 6·35″, west. Height above the sea 158·8 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

Mean, . .				29·948	29·940	29·951										

I beg here to repeat the observations made in my former Reports, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1874 do not show any improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in the years 1865–74]:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	1 „ 39	1 „ 61	1 „ 183
IRELAND [in 1866],	1 „ 38	1 „ 60	1 „ 185

Hanse Towns: Bremen [in 1864],	1 „ 28	1 „ 37	1 „ 105
Holland [in 1864],	1 „ 30	1 „ 42	1 „ 127
France [in 1864],	1 „ 38	1 „ 44	1 „ 127
Spain [in 1864],	1 „ 26	1 „ 32	1 „ 127
Austria (exclusive of Hungary) [in 1864],	1 „ 25	1 „ 31	1 „ 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

Registered	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.	1872.	1873.	1874.
Births,	136,414	144,970	146,090	144,388	146,051	145,659	149,846	151,355	149,278	144,377	141,288
Deaths,	93,144	93,154	93,027	93,503	86,185	89,593	90,462	88,348	97,294	97,537	91,961
Marriages,	27,406	30,802	30,121	29,742	27,699	27,277	28,667	28,960	26,943	25,730	24,481

Following this Report are summaries of the Quarterly Reports issued in 1874, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be
Your Grace's very faithful servant,
William Donnelly,
Registrar-General.

General Register Office,
Charlemont House,
Dublin, 29th April, 1876.

Quarterly Reports.

SUMMARY OF THE QUARTERLY REPORTS ISSUED IN 1874.

TABLE I.—Showing, by **Quarterly Periods,** the number of **Marriages** registered in Ireland in 1871, 1872, 1873, and 1874, distinguishing the number of Roman Catholic marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant under the 7 & 8 Vic., cap. 81 :—

Quarterly Periods.	Years and Number of **Marriages** Registered.							
	1871.		1872.		1873.		1874.	
	Roman Catholic.	Protestant.	Roman Catholic.	Protestant.	Roman Catholic.	Protestant.	Roman Catholic.	Protestant.
Quarter ending 31st March,	9,923	1,892	8,297	1,972	8,383	1,860	7,608	1,701
Quarter ending 30th June,	3,730	1,944	3,639	1,875	3,209	1,820	3,359	1,764
Quarter ending 30th September,	3,357	1,956	3,360	2,014	3,130	1,887	3,136	1,785
Quarter ending 31st December,	3,932	2,226	3,636	2,150	3,407	2,034	3,245	1,883
Total,	20,942	8,018	18,932	8,011	18,129	7,601	17,348	7,133

Quarterly Reports.

First Quarter.

Marriages.—There were 9,309 marriages *registered* in Ireland during the first quarter of 1874, a number affording an annual ratio of 1 in every 143, or ·701 per cent., of the *estimated* population. The average number of marriages registered in the corresponding quarter of the years 1869–73 was 10,893.

Births.—The births registered during the first quarter of the year 1874 amounted to 36,584—18,916 boys and 17,668 girls—affording an annual ratio of 1 in every 36·3, or 2·75 per cent., of the *estimated* population. The average number of births registered during the corresponding quarter of the previous five years was 40,005.

Deaths.—There were 25,770 deaths—13,002 males and 12,768 females—*registered* during the quarter, affording an annual ratio of 1 in 51·6, or 1·94 per cent., of the *estimated* population. The average number *registered* during the first quarter of the preceding five years was 28,219.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 31st March, 1874, amounted to 11,464—7,432 males and 4,032 females. The average number of emigrants during the corresponding quarter of the preceding five years was 11,799.

Diseases.

The decrease in the number of deaths registered during the first quarter of 1874 compared with corresponding quarter of previous years, was due more to the mildness of the season than to any improvement in the sanitary condition of the country. The deaths from the principal zymotic diseases showed an increase of 195 as compared with the last quarter of 1873. With very few exceptions, the Registrars who refer to the subject report most unfavourably as regards the sanitary condition of their districts. One or two illustrations may suffice. The Registrar of No. 3 district, Belfast, referring to a court in which typhoid fever prevailed, says:—"All the back yards in this court were most filthy, and the privies were overflowing." The Registrar of Emly, Tipperary, makes the following observation:—"It is my opinion that nearly half the sickness is due to overcrowding in the damp, filthy cabins of the poor, where it is not at all an uncommon thing to see four or five human beings, two pigs, a goat, a cow, and a score of fowl, with perhaps a donkey, inhabiting in common one small room."

Small-pox.—There were registered from this disease 145 deaths, being an increase of 70 on the number registered during the last quarter of 1873, and a decrease of 18 as compared with the March quarter of the same year. Of the deaths from small-pox 134 occurred in the province of Ulster, 10 in Leinster, and 1 in Munster; Connaught escaped altogether. The source of infection could, in nearly all instances, be clearly traced to Scotland. The benefits resulting from vaccination and re-vaccination were abundantly evidenced by the modified form of the disease, and the trifling mortality as compared with its virulence, confluency, and fatality in those unprotected by vaccination. It would appear from the report of the Registrar of Mountcharles District, Donegal Union, that inoculation is (despite the vigilance of the authorities) still carried on; he states that—"Small-pox has been brought into the district by inoculation, and the disease is now spreading over the greater part of the entire district; almost all the cases that I have seen in this and the adjoining district were of the confluent form."

Measles.—To this disease 214 deaths were referred; in the corresponding quarter of 1873, 559 persons died from measles. Of the 214 deaths from rubeola, 111 were contributed by the province of Leinster, 15 by Munster, 63 by Ulster, and 25 by Connaught.

Scarlet Fever.—779, or 1 in every 34, of the total deaths registered during the quarter, resulted from this pestilence. In the corresponding quarter of 1873 the number registered was 435. The deaths from scarlet fever were distributed among the four provinces as follows:—Leinster 312, Munster 181, Ulster 247, and

Quarterly Reports. First Quarter.

Connaught 39. The Registrar of Tullamore makes the following report:—"Scarlatina in a very malignant form appeared in the town of Tullamore in the month of January. The disease was brought to a crowded school by a pupil recently recovered from it; 9 children were almost immediately infected, of whom died; 3 adults took it from them, all of whom recovered. The disease did not extend to the poorer class."

Diphtheria.—During the quarter the number of deaths registered from diphtheria was 140, against 76 in the corresponding quarter of the year 1873. Diphtheria proved most fatal in the same provinces as did scarlet fever. In the province of Leinster 41 persons died from this disease, in Munster 27, in Ulster 64, and in Connaught 8.

Whooping-cough.—The deaths from whooping-cough numbered 604, showing an increase of 97 as compared with the corresponding quarter of 1873. Of the 604 deaths from whooping-cough, 183 occurred in Leinster, 196 in Munster, 143 in Ulster, and 82 in Connaught. The Registrar of No. 1 District, Drogheda, reports that—"Whooping-cough was epidemic during the quarter, and was very fatal. In my experience, no child under 12 months attacked by this disease has recovered. I am sorry to say that no medicine seems to have the least effect in controlling it."

Fever.—The deaths from this disease amounted to 845, against 905 in the March quarter of 1873. In the province of Leinster the deaths from fever numbered 250, in Munster 215, in Ulster 289, and in Connaught 91. The Registrar of No. 2 District, Newry, states that—"Several cases of typhus fever have occurred; all these were in houses unfit for human habitation, badly ventilated, and kept in a filthy condition;" and, with a view of proving the benefits resulting from cleanliness, he adds that—"In other parts of the town, where cleanliness was observed, fever of this kind has been absent."

Diarrhœa.—This disease caused 409 deaths, showing a decrease of 116 as compared with the first quarter of 1873.

Simple Cholera.—This disease was the cause of 11 deaths, against 9 in the first quarter of 1873.

Inquests.—There were 688 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 38 of the total deaths registered. In Leinster there was 1 inquest to every 32 deaths registered; in Munster 1 to 35; in Ulster 1 to 44; and in Connaught 1 to 48.

Deaths in Public Institutions.—Of the 25,770 deaths registered during the quarter, 3,762, or 14·5 per cent., occurred in Public Institutions. In Leinster the per-centage was 19·0; in Munster 17·6; in Ulster 10·5; and in Connaught 9·1.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf, for the quarter ending 31st March, 1874, was 9*d.*, being one penny higher than in the corresponding period of 1873; in the first quarter of 1864 the average price was 6*d.*

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 20*s.* per cwt.; during the first quarter of the previous year it was 16*s.* 4*d.* In the corresponding period of 1864 it was only 11*s.*

At the Dublin Potato Market the average prices of potatoes during the quarter ranged from 4*s.* 4*d.* to 5*s.* 10*d.* per cwt., against 4*s.* 6*d.* to 9*s.* 6*d.* in the corresponding quarter of 1873; the average prices for the first quarter of 1864 were only 2*s.* 6*d.* to 3*s.* 3*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 54*s.* 6*d.* to 80*s.* per cwt., against 65*s.* to 80*s.* 6*d.* in the corresponding quarter of 1873; for the first quarter of 1864 the average prices were 51*s.* 6*d.* to 64*s.* 6*d.*

Quarterly Reports.

First Quarter.

The following statement shows the average prices of the above-mentioned articles of food in Dublin *during the first quarter* of the years 1864–74 :—

Years.	Bread (Messrs. Manders & Co.'s 4 lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (1st quarter),	6	11 0	2 6 to 3 3	51 6 to 64 6
1865 „	5½	11 9	3 1 to 3 7	54 6 to 68 0
1866 „	6½	14 10	2 6 to 3 6	50 6 to 63 6
1867 „	8	16 1	4 5 to 5 7	53 0 to 70 0
1868 „	9	16 10	4 6 to 5 2	49 6 to 63 6
1869 „	7	15 8	3 5 to 4 10	54 6 to 70 0
1870 „	6	14 3	3 9 to 4 8	54 6 to 66 6
1871 „	7½	15 2	3 1 to 5 6	60 0 to 73 6
1872 „	8	15 0	3 5 to 4 5	59 0 to 72 6
1873 „	8	16 4	4 6 to 9 6	65 0 to 80 6
1874 „	9	20 0	4 4 to 5 10	54 6 to 80 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1874 was 52,029, against 52,916 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 31,886 against 32,012 for the first quarter of 1873.

Of the persons receiving in-door relief during the first quarter of 1874 an average number of 602 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 566.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the first quarter of the year 1874 was 30·021 inches, against an average of 29·811 inches for the corresponding quarter of the previous five years; the highest reading (30·821 inches) was on the 6th March, at 9.30 P.M., air calm; and the lowest (28·702 inches) on the 26th February, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 42·3°, against an average of 42·2° for the first quarter of the years 1869–73. The maximum temperature was 61·9°, and the minimum 22·5°.

Rain or snow fell on 43 days during the quarter. The rain-fall measured 5·264 inches against an average of 6·811 inches for the first quarter of the previous five years. The greatest monthly rain-fall was in January, when 2·265 inches were registered.

The wind blew on 34 days from W., on 24 from S.W., on 12 from S., on 6 from E., on 4 from N.W., on 2 each from N., N.E., and E., and on 4 days the air was calm, at 9.30 A.M.

Second Quarter.—April, May, June.

Second Quarter.

Marriages.—The number of marriages *registered* in Ireland during the second quarter of 1874 amounted to 5,123, equal to an annual ratio of 1 in every 259, or 386 per cent., of the *estimated* population. The average number *registered* in the corresponding period of the preceding five years was 5,406.

Births.—The births *registered* during the second quarter of 1874 amounted to 18,514—19,671 boys and 18,843 girls—affording an annual ratio of 1 in every 4·5, or 2·90 per cent., of the *estimated* population. The average number of births registered during the corresponding quarter of the preceding five years was 40,159.

Quarterly Reports. Second Quarter.

Deaths.—There were 24,063 deaths—12,176 males and 11,887 females—*registered* during the quarter, affording an annual ratio of 1 in 55·2, or 1·81 per cent., of the *estimated* population. The average number *registered* during the second quarter of the previous five years was 24,352.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th June 1874, amounted to 34,317—17,732 males and 16,585 females. The average number of emigrants during the corresponding quarter of the preceding five years was 36,530.

TABLE showing for each **Registration Province** and **County** in Ireland the Annual Rate per 1,000 of the estimated Population, represented by the number of **Marriages, Births,** and **Deaths** registered in the Quarter ended 30th June 1874.

Diseases.

The deaths *registered* during the second quarter show a decrease of 2,049 as compared with the corresponding period of the year 1873, and of 1,707 as compared with the first quarter of 1874. From the eight principal zymotic diseases 2,983 persons died; in the corresponding quarter of 1873 and the first quarter of 1874, the number of deaths from the forenamed diseases was 3,010 and 3,147 respectively.

The temperature during the quarter was slightly above the average, and the rain-fall was 1·563 inches below the average.

Small-pox.—The deaths from small-pox registered during the quarter numbered

27, against 145 in the first three months of the year, and 233 in the corresponding three months of the year 1873. Of the deaths from this disease 111 occurred in the province of Ulster, 12 in Connaught, 1 in Leinster, and 3 in Munster. In a great many instances the disease was imported from Scotland; some persons arrived from that country while labouring under the disease. Notwithstanding the vigilance of the Constabulary and the action taken on previous occasions by the Poor Law Commissioners, the baneful practice of inoculation is being carried on, and the present law against inoculation has proved inoperative. The Registrar of the Dunkineely District, Donegal Union, has furnished the following report:—"It is a sad reflection, which I think it my duty to mention, viz., that the 6 cases of death from small-pox recorded, and which were of the ages respectively of 12, 12, 11, 17, 16, 14, (not merely infants,) were inflicted and caused by the hand of man, under the vile practice of inoculation, which has been extensively carried on in these more remote and backward parts of our country, and which, it seems to me, the law as it stands is powerless to prevent, requiring, as it does, the conviction of the person or persons who did the inoculation, whereas, if the law were modified to this extent, simply to hold the parents or guardians of the child—the parties really guilty of the violation of the law—responsible to the laws, on simply seeing the evidence of inoculation, by whomsoever done, the efficiency of the law, I cannot but suppose, would soon be apparent." Dunkineely is not the only district in Ireland where inoculation is practised, the Registrar of Mountcharles District, Donegal Union, in his report for the first quarter of the year, refers to cases of small-pox of the confluent form resulting from inoculation.

Fever.—The deaths from fever registered during the quarter amounted to 914, against 845 in the preceding quarter, and 1,014 in the second quarter of the year 1873. In proportion to the population the deaths from fever were nearly equally distributed throughout the four provinces. 92 of the deaths from fever occurred in the Dublin Registration District; one-half of these resulted from typhoid or enteric fever.

Scarlet Fever.—761 persons fell victims to scarlet fever; in the corresponding quarter of the previous year the deaths from this disease amounted to 388, and in the first quarter of 1874 to 779. 176 of the deaths from scarlet fever occurred in the Dublin Registration District. In some localities the disease was of a very malignant nature; in No. 2 District, Belfast, 2 cases proved fatal within forty-eight hours.

Whooping-cough.—515 deaths were caused by whooping-cough, showing a decrease of 89 as compared with the preceding quarter, and an increase of 70 on the number registered during the second quarter of 1873. Of the 35 deaths registered in the Jamestown District, Carrick-on-Shannon, 7 resulted from whooping-cough. Few families in the Roosky District, Strokestown Union, escaped this disease, which in 4 instances terminated in death. 7 of the 35 deaths registered in the Carrickbyrne District, New Ross Union, were caused by whooping-cough.

Diphtheria.—125 deaths were caused by diphtheria, against 140 in the preceding quarter, and 56 in the June quarter of the year 1873. The deaths from diphtheria were distributed among the four provinces as follows:—Leinster, 55; Munster, 10; Ulster, 56; and Connaught, 4.

Measles.—The deaths from measles numbered 165, showing a diminished mortality of 49 as compared with the preceding quarter, and 186 when compared with the second quarter of 1873.

Diarrhœa.—357 deaths were ascribed to diarrhœa, against 409 in the preceding quarter, and 507 in the second quarter of 1873.

Simple Cholera.—Only 19 deaths were attributed to simple cholera.

It is satisfactory to find that the sanitary condition of some few localities has been ameliorated during the quarter. The Registrar of the Drogheda District, No. 1, says in his report, that—"The district is very healthy at present, due, I should say, in a great measure, to the compulsory sanitary arrangements enforced in the town, and which were recommended in a conjoint report furnished to the Local Government Board Inspector by my colleague, Dr. Kelly, and myself. This

Quarterly Reports. Second Quarter.

report, I may mention, had reference to the absence of sewers in some of the principal streets, and to the deficiency of the water supply." The Registrar of the Termonfeckin District, Drogheda Union, reports that the sanitary condition of his district has been improved. The Registrar of the Ballyhooly District, Fermoy Union, states that—"The villages have been cleaned since my last report;" he adds, however, "The water of Ballyhooly is very bad still." Thorough drainage has been completed in Drogheda row, Monasterevin, and with beneficial results. But if some few districts have been rendered more healthful by sanitary improvements, many others remain in a wretched condition. Among these may be instanced Banbridge; the Registrar of this district, referring to an outbreak of typhoid fever, observes—"The occurrence of this epidemic naturally drew attention to the water supply, and the Town Commissioners had the water analyzed by Mr. Cameron, analyst to the city of Dublin. His report was simply appalling. Of the seventeen pumps not one yielded pure water, and four were contaminated so much as to be actually dangerous." The drainage, he adds, is most imperfect; many houses having no yards, the refuse is thrown out upon the public streets, and "when the rain comes, all is washed into the drains, and a portion oozes into the adjoining wells, so that an epidemic of cholera or typhoid fever means, in plain language, that people are drinking a solution of human excrement." The water supply and the sewerage are both bad in Downpatrick. The Registrar of No. 2 District, Cork, in despair, says—"My district has been in a very bad sanitary condition from the time that I first took charge of it up to the present, and I have come to the conclusion that it is sheer waste of time to trouble myself writing any more sanitary reports." It is not surprising to find neglect as to sanitation in the provinces, when Dublin, the metropolis, continues to be, in consequence of neglected sanitation, one of the most unhealthy towns in the kingdom.

Inquests.—There were 643 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 38 of the total deaths registered. In Leinster there was 1 inquest to every 35 deaths registered; in Munster 1 to 35; in Ulster 1 to 38; and in Connaught 1 to 49.

Deaths in Public Institutions.—Of the 24,063 deaths registered during the quarter, 3,610 or 15·0 per cent., occurred in Public Institutions; in Leinster the per-centage was 19·5; in Munster 18·4; in Ulster 9·8; and in Connaught 12·1.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf, for the quarter ending 30th June, 1874, was 8½*d.*, which was ½*d.* higher than the average price for the corresponding period of 1873; in the second quarter of 1864 the average price was 6*d.*

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 21*s.* per cwt.; during the second quarter of the previous year it was 17*s.* 5*d.* In the corresponding period of 1864 it was only 10*s.* 6*d.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 4*s.* 4*d.* to 7*s.* per cwt., against 4*s.* 8*d.* to 10*s.* 4*d.* in the corresponding quarter of 1873; the average prices for the second quarter of 1864 were only 2*s.* 11*d.* to 3*s.* 8*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 57*s.* to 81*s.* per cwt., against 67*s.* to 89*s.* in the corresponding period of the year 1873; for the second quarter of 1864 the average prices were 53*s.* to 65*s.* 6*d.*

Quarterly Reports.

The following statement shows the average prices of the above-mentioned articles of food, in Dublin, *during the second quarter* of the years 1864–74 :—

Second Quarter.

1874 ,,	8½	21 0	4 4 to 7 0	57 0 to 81 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of the year 1874 was 47,986, against 47,818 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 31,991, against 31,452 during the second quarter of 1873.

Of the persons receiving in-door relief during the second quarter of 1874 an average number of 572 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 567.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the second quarter of 1874, was 30·006 inches, against an average of 29·927 inches for the corresponding quarter of the preceding five years; the highest reading (30·617 inches) was on the 15th June, at 9.30 A.M., wind N.E.; and the lowest (28·826) on the 2nd April, at 9.30 P.M., wind S.W. The mean temperature of the air during the quarter was 52·1°, against an average of 51·9° for the corresponding period of the preceding five years. The maximum temperature was 73·5°, and the minimum 27·0°. Rain fell on 38 days during the quarter. The rain-fall measured 3·745 inches, the average amount for the second quarter of the years 1869–73 being 5·308 inches. The greatest monthly rain-fall during the quarter was in May, when 1·994 inches were registered. The wind blew on 16 days from W., on 15 days from S.W., on 13 days from E., on 10 days each from N. and N.E., on 9 days from N.W., on 8 days from S., on 6 days from S.E., and the air was calm on 4 days, at 9.30 A.M.

Third Quarter.—July, August, September.

Third Quarter.

Marriages.—The number of marriages *registered* in Ireland during the third quarter of 1874 amounted to 4,921, equal to an annual ratio of 1 in every 270, or ·370 per cent., of the *estimated* population. The average number *registered* in the corresponding period of the preceding five years was 5,293.

Births.—There were 33,831 births *registered* in Ireland during the quarter ended 30th September, 1874—17,340 boys and 16,491 girls—representing an annual ratio of 1 in every 39·3, or 2·55 per cent., of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding five years was 34,022.

Deaths.—The deaths *registered* in Ireland during the third quarter of the year 1874 amounted to 19,538—10,035 males and 9,503 females—affording an annual ratio of 1 in every 68·0, or 1·47 per cent., of the *estimated* population. The average number *registered* during the corresponding quarter of the previous five years was 18,597.

Quarterly Reports. Third Quarter.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1874, amounted to 17,688—8,970 males and 8,718 females. The average number who emigrated during the corresponding quarter of the previous five years was 17,285.

Diseases.

The number of deaths registered in Ireland during the quarter ended September 30th, is 342 in excess of the number registered during the corresponding period of 1873. That the sanitary condition of the country was in a very unsatisfactory state is fully evidenced by the fact of the increased mortality having resulted from eight of the principal zymotic diseases, the deaths from which exceeded by 72 those registered in the corresponding quarter of 1873, and by 240 those in the second quarter of 1874.

Small-pox.—This disease proved fatal in 135 instances, showing an increase of 8 as compared with the preceding quarter, and 102 as compared with the third quarter of 1873. The deaths from small-pox were distributed through the provinces in the following order:—Ulster, 89; Connaught, 42; Munster, 3; and Leinster, 1. The Registrars of Balla District, Castlebar Union, and Kiltamagh District, Swineford Union, attribute the prevalence of small-pox in their localities to the practice of inoculation.

Scarlet Fever.—This fearful disease, which has been epidemic for more than twelve months, instead of manifesting any symptoms of abatement, continues its fatal progress with increased malignity. The deaths from scarlet fever registered during the third quarter numbered 1,019, showing an increased mortality of 258 as compared with the preceding quarter, and of 594 as compared with the corresponding quarter of 1873. The disease prevailed chiefly in the provinces of Leinster and Ulster; in the former province the deaths from scarlet fever amounted to 477, and in the latter to 415; whereas in Munster and Connaught only 66 and 61 deaths were, respectively, the result of this disease. Some of those attacked by scarlet fever succumbed to the disease within a few hours; in a few instances two, three, and four members of the same family were cut off. The Registrar of the Cenburb District, Dungannon Union, in referring to the disease having simultaneously attacked four children of one family, remarks that "the contagion seems to have been imported from Glasgow, through the medium of old clothes sent by a person there to the diseased family." That the fatality of the disease is in a great measure dependent on the sanitary condition of the district is fully evidenced by the remarks of the various Registrars in whose districts scarlet fever prevailed, and all can testify to the truthfulness of the following observation, which is the result of the experience of the Registrar of Newry, No. 2, viz.:—"The epidemic diseases (scarlatina, measles, and whooping-cough,) above referred to, have in this district been most prevalent, and deaths most numerous in proportion to the number attacked, in the neighbourhood of offensive odours."

Diphtheria.—This disease caused 141 deaths, against 125 in the previous quarter and 72 in the third quarter of 1873. Where scarlet fever was most fatal, there also the deaths from diphtheria were most numerous. It is not improbable that in many cases of scarlet fever where the throat symptoms were most prominent, the fatal results were attributed to diphtheria.

Measles.—One hundred and thirty-seven deaths were caused by measles, against 235 in the corresponding quarter of the preceding year and 165 in the June quarter of 1874. In some districts, measles and scarlet fever prevailed at the same time; an epidemic of the former occurred in Glengarriff.

Whooping-cough.—To this disease 517 deaths were ascribed, against 515 in the preceding quarter and 420 in the corresponding quarter of 1873. The distribution of the deaths from whooping-cough among the four provinces was as follows:—Leinster, 66; Munster, 189; Ulster, 131; and Connaught, 131. In the Keady District, Armagh Union, a severe epidemic of whooping-cough prevailed; scarcely a family escaped; "it attacked persons of all ages, from the infant of a few days old to persons over 60, and proved fatal in 17 cases." Fifteen of the 37 deaths registered in the Turloughmore District, Galway Union, resulted from whooping-cough. The Registrar reports that—"The children in the low bog villages were numerically more affected with whooping-cough than those living in the hilly parts of the district, and the mortality was proportionately higher." The Registrar of the Glengarriff District, Bantry Union, states that whooping-cough and measles were epidemic at the same time, and adds:—"In some instances the cause of death was registered as whooping-cough and measles." Eleven of the 28 deaths registered in Rosscarbery District, Clonakilty Union, were caused by whooping cough. Thirteen deaths were registered in the Tullagh District, Skibbereen Union; of these, 8 resulted from whooping-cough.

Fever.—To the various forms of continued fever 718 deaths were ascribed, against 914 in the preceding quarter and 648 in the third quarter of the year 1873.

Diarrhœa.—Four hundred and ninty-nine deaths were attributed to diarrhœa, against 615 in the corresponding quarter of the preceding year and 357 in the June quarter of 1874; they were distributed as follows:—in Leinster, 170; in Munster, 120; in Ulster, 182, and in Connaught only 27.

Simple Cholera.—Only 57 deaths were ascribed to this disease, of which number 20 occurred in Leinster, 22 in Munster, 13 in Ulster, and 2 in Connaught.

The sanitary improvements in certain districts have been considerable, and fol-

Quarterly Reports. Third Quarter.

lowed by the most satisfactory results. For instance, the Registrar of Lisburn, who has so repeatedly animadverted on the wretched sanitary condition of his district, reports as follows :—"I am happy to observe there is a very marked improvement already in the sanitary state of Lisburn and its vicinity, though but a very short time under the Towns Improvement Act. . . . I am glad to say that, on inquiry, I find there are not at present any cases of either fever, small-pox, or other infectious diseases in Lisburn Workhouse." As a sample of some of the districts where no sanitary improvements have been attempted, the following description of Scrabby District, Granard Union, by the Registrar, may be cited. In reference to the mortality from scarlet fever, he says :—"I fear the disease was greatly spread by want of proper sanitary arrangements in the district. In some of the houses I have seen a pig-house built in a corner of the kitchen or principal apartment of the house, and a patient in scarlatina in a bed beside it, a goat tied in another corner, and a cesspool in front of the house ; indeed, in a great number of houses, in the remote parts of the district, it is a common thing to see the family living in the same house with the cattle." There is no reason to doubt that, if the same improvements as regards cleanliness, &c., were carried out in Scrabby as have been in Lisburn, there would be a like diminution of preventable disease. At the same time, it must be borne in mind that the enforcement of sanitary reforms is surrounded with the greatest difficulties, and must take considerable time in its accomplishment.

Inquests.—There were 653 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 30 of the total deaths registered. In Leinster there was 1 inquest to every 26 deaths registered ; in Munster 1 to 26 ; in Ulster 1 to 34 ; and in Connaught 1 to 51.

Deaths in Public Institutions.—Of the 19,538 deaths registered during the quarter, 2,697 or 13·7 per cent., occurred in Public Institutions ; in Leinster the per-centage was 16·2 ; in Munster 16·9 ; in Ulster 10·5 ; and in Connaught 10·9.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the quarter ending 30th September, 1874, was 7½*d.*, being ½*d.* cheaper than in the corresponding period of 1873, and 1½*d.* dearer than in the third quarter of 1864.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 16*s.* 8*d.* per cwt. ; in the third quarter of the previous year it was 18*s.* 3*d.*, while in the corresponding quarter of 1864 it was only 10*s.* 8*d.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 4*s.* to 5*s.* 10*d.* per cwt., against 5*s.* 6*d.* to 7*s.* 4*d.* in the corresponding period of the previous year ; the average prices for the third quarter of 1864 were only 2*s.* 7*d.* to 3*s.* 10*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 52*s.* 6*d.* to 77*s.* 6*d.* per cwt., against 66*s.* 6*d.* to 84*s.* 6*d.* in the corresponding period of the previous year ; for the third quarter of 1864 the prices were 51*s.* to 62*s.* 6*d.*

The following statement shows the average prices of the above-mentioned articles of food in Dublin, *during the third quarter* of the years 1864-74 :—

Quarterly Reports.

Third Quarter.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of the year 1874 was 43,784, against 42,607 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 28,613, against 29,171 for the third quarter of 1873.

Of the persons receiving in-door relief during the third quarter of the year 1874 an average number of 563 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 557.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the third quarter of the year 1874, was 29·900 inches, against an average of 29·970 inches for the corresponding quarter of the preceding five years; the highest reading (30·490 inches) was on the 21st August, at 9.30 P.M., the air being calm; and the lowest (29·343 inches) on the 22nd September, at 9.30 A.M., wind S.S.E.

The mean temperature of the air during the quarter was 58·3°, against an average of 58·4° for the corresponding period of the preceding five years; the maximum temperature was 81·3° and the minimum 34·3°.

Rain fell on 54 days during the quarter. The rain-fall measured 9·821 inches, against an average of 7·867 inches for the third quarter of the years 1869–73. The greatest monthly rain-fall during the quarter was in August, when 5·086 inches were registered.

The wind blew on 31 days from S.W., on 30 days from W., on 9 days from N.W., on 7 days from E., on 6 days from S., on 2 days each from N.E. and S.E., and the air was calm on 5 days, at 9.30 A.M.

Fourth Quarter.

Fourth Quarter.—October, November, December.

Marriages.—There were 5,128 marriages *registered* in Ireland during the fourth quarter of 1874, a number affording an annual ratio of 1 in every 259, or ·386 per cent., of the *estimated* population. The average number of marriages *registered* in the corresponding quarter of the previous five years was 5,923.

Births.—There were 32,359 births *registered* in Ireland during the quarter ended 31st December, 1874—16,589 boys and 15,770 girls—representing an annual ratio of 1 in every 41·1, or 2·44 per cent., of the *estimated* population. The average number of births *registered* during the corresponding quarter of the preceding five years was 33,917.

Deaths.—The deaths *registered* in Ireland during the fourth quarter of the year 1874 amounted to 22,590—11,261 males and 11,329 females—a number affording an annual ratio of 1 in every 58·8, or 1·70 per cent., of the *estimated* population. The average number *registered* during the corresponding quarter of the previous five years was 21,479.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 31st December, 1874, amounted to 9,715—4,962 males and 4,753 females. The average number of emigrants during the fourth quarter of the preceding five years was 10,569.

Diseases.

The state of the public health during the fourth quarter was far from satisfactory. The number of deaths registered exceeded by 1,160 those registered in the corresponding quarter of the previous year, and by 3,052 the number in the third quarter of 1874.

The excessive mortality is mainly attributable to the prevalence and fatality of scarlet fever, which disease destroyed not less than 1,475 persons; the words "not less" are introduced advisedly, for there can be little doubt that very many deaths resulting from scarlet fever have been returned under the head of dropsy, a very common sequence of the scarlatinal poison.

The wave of scarlet fever broke with unequal force over the four provinces. Ulster suffered most, having lost 836 persons; next in order came Leinster, where 460 deaths occurred; then in Connaught there were 108 deaths, and the remaining 71 deaths took place in Munster.

During the first quarter of the year scarlet fever killed 779 persons; in the second quarter 761; in the third quarter 1,019, and, as before stated, in the quarter under consideration 1,475; thus making a total of 4,034 victims to this plague.

The report of the Registrar of the Kilrea District, Ballymoney Union, affords further proof, if such were needed, of the very contagious nature of the disease and is also of great importance in demonstrating the extreme tenacity with which the

ntagion or *materies morbida* clings to a habitation where scarlet fever had existed. is statement is as follows :—"Scarlet fever caused 5 deaths in November. The ntagion was brought from Coleraine into the family of a labourer of this town, with hose three young children it rapidly assumed a malignant form, and ended fatally. hen the first case appeared, the other children were removed from the house; but their return within a month, they soon caught the disease, though the premises ad been limewashed and thoroughly ventilated."

The Registrar of the Rathcoole District, Celbridge Union, attributes the out-eak of scarlet fever in his district to contagion brought from a distant "wake-ouse."

Diphtheria caused 159 deaths; of which number 84 occurred in Ulster, 53 in einster, 18 in Munster, and 4 in Connaught. In the Coleraine Union there were) deaths from this disease, 8 of which took place in the Articlave District, where ie total deaths amounted to 29. At Warrenspoint, in the Newry Union, of the) deaths registered 11 resulted from diphtheria. The Registrar complains of ie sanitary state of the town, stating that "the lanes are overcrowded," and that there is neither proper sewerage nor a constant supply of pure water."

Whooping-cough proved fatal in 393 instances, against 614 in the corresponding uarter of the previous year. This decrease may in some measure be ascribed to ie great mortality amongst children from scarlet fever.

In proportion to the population the mortality from whooping-cough was greatest i Connaught. Of the 97 deaths registered in the Ballyshannon Union, 15 resulted om this disease; and of the 191 deaths registered in the Sligo Union, 18 resulted om whooping-cough. In the Glengarriff District of the Bantry Union there were egistered 14 deaths, and of these 6 resulted from this disease; and in the Tullagh istrict, Skibbereen Union, 4 of the 14 deaths registered were caused by whooping-ough.

Fever was the cause of 672 deaths, against 671 in the corresponding quarter of ie year 1873, and 718 in the third quarter of 1874. The deaths from fever were, i proportion to the population, pretty equally distributed throughout the provinces.

Small pox numbered 162 deaths, against 135 in the preceding quarter, and 75 i the fourth quarter of 1873. Of the deaths from small-pox, 113 occurred in the rovince of Connaught, 47 in Ulster, 2 in Munster, and none in Leinster.

In the Swineford Union, 53 of the deaths from this disease took place. The egistrar of Kiltamagh District, in that union, states that 19 of the 46 deaths egistered by him were caused by this disease, and further adds that the disease is still making its ravages in the district, owing, in a great extent, to the practice f inoculation."

The Registrar of Tobercurry District reports :—"Small-pox of a bad nature is t present raging in my district. I have heard it rumoured that it was introduced ere and propagated chiefly by inoculation, but cannot find any positive proof."

Of 49 deaths registered in the Balla District, Castlebar Union, no less than 3 resulted from small-pox. The Registrar states that inoculation has been arried on to "a fearful extent" in his district.

Some of the Registrars refer to the improved sanitary condition of their districts, nd in several instances this improvement has been ascribed to the successful vorking of the new Sanitary Act; but that much remains to be done in the irection of sanitary improvement, the following extracts from notes of Registrars vill amply show. Thus, the Registrar of Fanad District, Millford Union, says :—"There are no sanitary arrangements carried out in this district. The generality f the houses of the small farmers and labourers in this district are overcrowded, lirty, and badly ventilated. Cattle are often kept in the same apartments in vhich the people sleep." The Registrar of Palmerston District, South Dublin Jnion, states :—"The Kilmainham township is in a very unsanitary condition. There are three palpable reasons why it should be so, viz. :—Insufficient surface lrainage; inhabited houses unfit to live in; bad and insufficient ashpit and privy .ccommodation." The Registrar of Tallaght District, in the same union, considers "it s absolutely necessary that a proper sewer, with gratings, should be made the entire

Quarterly Reports.

Fourth Quarter.

length of the village, which is constantly in a filthy state, and never will be other wise until the above suggestion is carried out." The Registrar of Cootehill District Cootehill Union, reports the prevalence of scarlatina in his district, and continues :— "On the 24th December I was called on to see a family, six in number; four were il with scarlatina, crowded in a small room; in an adjoining room six cows were kept a night; the manure was a foot deep in the apartment occupied by the cattle (which is the better room of the two)." The Registrar of Ardmore District, Yougha Union, remarks :—"The sanitary state of this district is disgraceful. The principa *well* in the village, while in its present condition, is nothing more than a shallow hole in the ground into which all kinds of filth and dirt drain." The Registra of Bruff District, Kilmallock Union, refers to the unsatisfactory sanitary condition of his district, and to the wretched houses of the labouring classes, and adds :— "I am at present attending a poor man for inflammation of the lungs, in one of those miserable abodes in which are crowded together six in family, a horse, and a pig, *all in one room*, capable of containing not more than about 700 cubic feet of air. Until something is done to improve the dwellings of the labouring classes, and to construct them on better hygienic principles, the progress of sanitary matters in this country will be slow indeed."

Inquests.—There were 723 inquests reported to the Registrars during the quarter this number being equal to 1 in every 31 of the total deaths registered. In Leinster there was 1 inquest to every 26 deaths registered; in Munster 1 to 27; in Ulster 1 to 37; and in Connaught 1 to 51.

Deaths in Public Institutions.—Of the 22,590 deaths registered during the quarter, 3,292, or 14·5 per cent., occurred in Public Institutions; in Leinster the per-centage was 18·6; in Munster 18·7; in Ulster 9·7; and in Connaught 10·7.

PRICES OF PROVISIONS, AND PAUPERISM.

During the whole of the fourth quarter of 1874 the price of Messrs. Mander and Co.'s 4-lb. loaf was 7*d.*, being 1½*d.* cheaper than the average price in the corresponding quarter of 1873. In the fourth quarter of 1864 the average price was only 5½*d.*

The average price of oatmeal in Dublin for the quarter was 17*s.* per cwt. against 16*s.* 7*d.* for the corresponding quarter of 1873. In the fourth quarter of 1864 the average price was 10*s.* 10*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato market for the fourth quarter of 1874 were 2*s.* 7*d.* to 3*s.* 7*d.* In the fourth quarter of 187 the average prices were 3*s.* 3*d.* to 4*s.* 9*d.*, and in the corresponding quarter of 186 they were 2*s.* 2*d.* to 3*s.* 4*d.*

The average prices of beef at the Dublin Cattle Market during the quarter we from 53*s.* 6*d.* to 77*s.* 6*d.* per cwt., against 57*s.* 6*d.* to 77*s.* in the correspondi quarter of 1873, and 49*s.* 6*d.* to 65*s.* 6*d.* in the fourth quarter of 1864.

The following statement shows the average prices of the above-mentioned articl of food in Dublin *during the fourth quarter* of the years 1864–74 :—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.

Quarterly Reports.

Fourth Quarter.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1874 was 46,996, against 46,225 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 28,439, against 28,211 for the fourth quarter of 1873.

Of the persons receiving in-door relief during the fourth quarter of 1874 an average number of 557 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 561.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the fourth quarter of the year 1874 was 29·859 inches, against an average of 29·864 inches for the corresponding quarter of the preceding five years; the highest reading (30·426 inches) was on the 30th October, at 9.30 P.M., wind N.E.; and the lowest (28·595 inches) on the 11th December, at 9.30 A.M., wind W.

The mean temperature of the air during the quarter was 43·3°, against an average of 44·0° for the corresponding period of the preceding five years. The maximum temperature was 63·9°, and the minimum 23·5°.

Rain or snow fell on 51 days during the quarter. The rain-fall measured 9·003 inches, being considerably over the average. The greatest monthly rain-fall during the quarter was in November, when 3·235 inches were registered.

The wind blew on 38 days from W., on 17 days from S.W., on 10 days from N.W., on 6 days from E., on 5 days each from N.E., S.E., and S., on 4 days from N., and on 2 days the air was calm, at 9.30 A.M.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1874, inclusive:—

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Report of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1851 and 1871 as explained for the last period.

1872-4—By assuming the annual excess of births over deaths to equal 1 per cent. of the population, and deducting the number of emigrants according to the returns obtained by the Registrar-General.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1874.

RE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical he Dispensary Districts of the same names, except in a few instances.

letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superin- nt Registrar's District.

herever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes he births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1874—REGISTRARS' DISTRI

Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or ends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; he *Registration* Counties differ more or less from the Counties *Proper*.

ding to the Census of 1871.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I., The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II., The North-Western Division, is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III., The Eastern Division, is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV., The North Midland Division, is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V., The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI., The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII., The South-Eastern Division.—This division extends from its junction with the "Eastern" division, southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

No. VIII., The South-Western Division, extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland, from William M. Burke, Esq., f.c.p.i.

Year 1874.

Sir,

I beg to submit for your consideration some observations as to the causes of the deaths which were registered in Ireland during the year 1874.

"The General Abstract of the numbers of Marriages, Births and Deaths registered in Ireland" in the year 1874, (laid before Parliament in April, 1875.) contains in addition to the enumeration of the total deaths registered, a table showing the number of registered deaths which resulted from the eight principal zymotic diseases (small-pox, measles, scarlet fever, diphtheria, whooping-cough, fever, diarrhœa and cholera,) during the years 1864–74, with the average annual number in the ten years 1864–73; the annual mortality per 1,000 of the estimated population from all causes, and from the above-named diseases; and the ratio which the deaths from those diseases bear to the total deaths registered in each year.

By means of the table referred to, much valuable information was afforded long in anticipation of the "Detailed Annual Report," in the compilation of which much time and labour are required.

The total number of deaths registered during the year was 91,961, against 97,537 in the preceding year, showing a decrease in the mortality of 5,576.

The cause of death was not specified in 2,901 instances, showing an increase of 362 as compared with the year 1873. Of all the deaths registered, the cause was not specified or was ill-defined in 1 in every 31·7. This proportion varied from 1 in 17·7 in the Western Division to 1 in 68·4 in the North-Eastern Division.

Following the course which was adopted for the previous year, I now give Tables showing by Divisions the mortality from the principal diseases for the ten years 1864–73, the average for that period, and the deaths from those diseases in the year 1874 as contrasted with the average for the preceding ten years.

TABLE I.—Showing, by DIVISIONS, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class *registered* in Ireland during the Ten Years 1864–73; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the Number *registered* in 1874, and the Rate represented thereby.

I. Zymotic Diseases.

As stated in my last letter, the average annual number of deaths from zymotic diseases for the ten years 1864–73 was 16,850, affording an average annual rate of 304·80 per 100,000 of the estimated population. In the year under consideration the number of deaths from this class of diseases was 17,057, or 320·93 in 100,000 inhabitants, the rate varying from 412·34 in the Eastern and 398·85 in the North-Eastern to 256·88 in the North Midland and 235·77 in the North-Western Division.

Small-pox.—The average annual number of deaths from small-pox registered during the decade, 1864–73, was 602 (during the year 1872 this disease was epidemic and killed 3,248 persons); the number registered in the year 1874 was 569, nearly all of which occurred in the North-Eastern, North-Western and Western Divisions. The mortality from small-pox equalled 10·71 in every 100,000 of the inhabitants in the year 1874.

Measles.—The deaths from measles amounted to 667. The average annual number of deaths from this disease during the previous ten years was 1,019. In proportion to the population measles was most fatal in the Eastern, South Midland and North Midland Divisions.

Scarlet Fever.—To this pestilence no less than 4,034 persons fell victims; that is to say, 75·90 in every 100,000 of the inhabitants died from scarlet fever. In the Eastern Division the rate reached 152·04, and in the North-Eastern 134·12, while in the South-Western it only reached 32·87, and in the Western 21·95 per 100,000 inhabitants. The average annual number of deaths from scarlet fever during the previous ten years was 2,804, or 50·72 to every 100,000 of the estimated population.

Diphtheria.—This disease proved more fatal during the year 1874 than in any year, except 1864, since the Registration Act came into operation. The deaths registered in 1874 amounted to 565, against an annual average of 309 for the years 1864–73. As was the case with scarlet fever, the North-Eastern and Eastern Divisions suffered most, both numerically and in proportion to the estimated population.

Quinsy.—This disease caused 291 deaths, against 300 in the year preceding.

Croup.—The deaths from croup registered during the year numbered 1,799—972 males and 827 females. As in previous years, the South-Western and Western Divisions suffered most from this disease.

Whooping-cough.—2,029 deaths—879 males and 1,150 females—resulted from this disease. The average yearly number of deaths from whooping-cough for the previous ten years was 1,756. In the year 1874 the mortality from this disease was much greater in proportion to the population in the South-Eastern and South-Western than in any of the other divisions.

Fever.—The number of deaths from the three forms of fever amounted to 3,149; of these, 1,613 were of males and 1,536 of females. The average annual number for the preceding ten years was 3,798. The greatest number of deaths from fever in proportion to the population at each age-period occurred between the ages of 15 and 20 years, viz., 83·52 per 100,000 persons living at that age; next comes the period between the ages of 65 and 75, then 75 and upwards.

TABLE II.—Showing for the year 1874 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the estimated number living at each Age represented thereby.

Of the deaths from fever registered, 756 were referred to typhus, 910 to typhoid or enteric fever, and 1,483 to "fever" or simple continued fever. The deaths from fever in 1874 represent a rate of 59·25 in every 100,000 inhabitants. The mortality from fever varied in the Registration Divisions of the country. Thus, in the Eastern Division the rate was 72·99 deaths to 100,000 of the population; in the South Midland 69·20, and in the South-Western 64·23; whereas in the North-Western it was 47·66, and in the North Midland 40·53.

Erysipelas.—The deaths from erysipelas, as registered, have varied very slightly from year to year as regards all Ireland. The average for the ten years 1864–73 was 291; in the year 1874 the deaths from this disease numbered 292, against 234 in the preceding year.

Metria or Puerperal Fever.—The number of women who died from child-bed fever was 333; the average annual number of deaths from this disease for the ten years 1864–73 was 309.

Influenza.—This disease proved fatal in 100 instances; a like number was registered in the year preceding. The average annual number of deaths from influenza in the years 1864–73 was 166.

Dysentery.—To this disease 294 deaths were attributed, being 4 less than in the preceding year, and 162 less than the annual average.

Diarrhœa.—1,671 deaths were ascribed to diarrhœa, against 2,095 in 1873, and 1,937, the average annual number for the years 1864-73.

Cholera.—The deaths from simple cholera amounted to 103, against 91 in 1873. One man died from glanders.

II. CONSTITUTIONAL DISEASES.

15,723 deaths from constitutional diseases (7,596 males and 8,127 females) were registered, against 17,152 in the previous year.

Phthisis or Pulmonary Consumption.—9,416 persons fell victims to this disease (4,522 males and 4,894 females), being 177·16 deaths in every 100,000 of the population.

TABLE III.—Showing, by DIVISIONS, the Number of Deaths from Phthisis or Pulmonary Consumption *registered* in Ireland during the Ten Years 1864–73; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the number *registered* in 1874, and the Rate represented thereby.

DISEASE.		DIVISIONS.								TOTAL, IRELAND.

	1873,	2,757	932	2,079	705	812	877	830	1,349	10,341
Av. annual No. 1864–73,		2,745	886	2,063	752	826	735	846	1,249	10,102
Number in 1874, . .		2,777	786	1,807	693	729	786	759	1,129	9,416
Rate per 100,000 Inhabitants,	Av. 1864–73,	246·18	163·81	257·86	141·63	176·21	93·85	181·42	151·76	182·73
	1874, . .	250·64	152·90	232·63	139·73	168·73	97·89	172·89	141·62	17·716

The death rate from phthisis was highest in the North-Eastern Division, 250·64 in every 100,000 having died from this disease; in the Eastern the rate was 232·63; in the South-Eastern 172·89.

Mesenteric Disease.—The deaths from mesenteric disease or marasmus numbered 1,174—593 males and 581 females.

Hydrocephalus or Water on the Brain.—The deaths from this disease amounted to 1,015—574 males and 441 females.

Scrofula.—The deaths from this depraved state of the constitution amounted to 942—525 males and 417 females.

Gout.—From this disease but few die in Ireland; the number of deaths there from registered during the year did not exceed 14—13 males and 1 female.

Cancer.—The deaths from cancer numbered 1,768—767 males and 1,001 females.

Dropsy.—Under the head of dropsy 1,206 deaths were tabulated.

III. LOCAL DISEASES.

29,403 deaths (16,244 males and 13,159 females) were referred to those diseases termed "local."

Diseases of the Nervous System.—8,248 deaths (4,631 males and 3,617 females) were referred to diseases of the nervous system, comprising 4,016 from convulsions, 1,441 from paralysis, 926 from apoplexy, 560 from cephalitis or inflammation of the brain, 330 from epilepsy, 190 from insanity, 5 from chorea or St. Vitus's dance, and 780 from brain disease unspecified.

Diseases of the Organs of Circulation.—The number of deaths from this order of diseases was 3,757—males 2,037 and females 1,720. In the year preceding, the deaths from diseases of the organs of circulation amounted to 4,236. The number of deaths from heart disease was 2,582—1,910 males and 1,672 females; 76 deaths

resulted from pericarditis or inflammation of the heart's covering, and 99 from aneurism.

*Diseases of the Respiratory Organs.**—The deaths registered from this group of diseases amounted to 11,419—6,151 males and 5,268 females—affording a death rate of 214·85 per 100,000 of the population, against an average annual death rate of 237·76, for the ten years 1864–73. The Eastern and South-Eastern Divisions (as was observed in the preceding year) suffered most in proportion to their population from diseases of the organs of respiration.

TABLE IV.—Showing, by DIVISIONS, the Number of Deaths from Diseases of the Respiratory Organs *registered* in Ireland during the Ten Years 1864–73; the Average Annual Number for that period, and the Average Annual Rate per 100,000 of the Estimated Population; with the number *registered* in 1874, and the Rate represented thereby.

The deaths from the foregoing order of diseases include 8,279 deaths from bronchitis—4,179 males and 4,100 females; 1,692 (1,145 males, 547 females) from pneumonia; 398 from asthma; 271 from pleurisy; 110 from laryngitis; and 669 from lung disease "unspecified."

Diseases of the Digestive Organs.—To this group of diseases 4,237 deaths were ascribed; of these, 2,272 were males, and 1,965 females; 475 deaths were ascribed to enteritis or inflammation of the bowels—the sexes were 271 males, 204 females; peritonitis or imflammation of the covering of the bowels caused 307 deaths—137 males and 170 females; 396 deaths were ascribed to gastritis or inflammation of the stomach; 353 to ileus or obstruction of the bowels; 161 to ulceration of the intestines; 139 to hernia or rupture of the bowels; 51 to stricture of the intestines; 37 to intussusception; 7 (males) to fistula; 666 to stomach disease "unspecified;" 974 to liver disease "unspecified;" 237 to hepatitis or inflammation of the liver; 156 to jaundice; 17 to spleen disease; and 1 to disease of the pancreas.

Diseases of the Urinary Organs.—To the various affections of the urinary organs 1,255 deaths—939 males and 316 females—were referred. Of these, 320 resulted from nephria or Bright's disease; 107 from diabetes; 98 from cystitis or inflamma-

* Phthisis or Pulmonary Consumption is not included in this group—see "Constitutional Diseases."

tion of the bladder; 84 from nephritis or inflammation of the kidneys; 23 from ischuria or "suppression of the secretion of urine;" 19 from stone in the bladder; and 604 from kidney disease "unspecified."

Diseases of the Organs of Generation.—Under this heading 126 deaths are included. Five of these were of males; 1 was attributed to orchitis or inflammation of the testicle, 2 to hydrocele and 2 to pelvic abscess. Of the 121 deaths of females, 59 were the result of ovarian disease, and the remaining 62 were attributed to disease of the uterus.

Diseases of the Organs of Locomotion caused 166 deaths—111 males and 55 females—and *Diseases of the Integumentary System* 195; of these 78 were referred to ulcer, 6 to phlegmon and 111 to diseases of the skin.

IV. Developmental Diseases.

The number of deaths resulting from the development and decay of man amounted to 24,810—11,304 males and 13,506 females. To old age the deaths of 19,101 persons were ascribed—of these deaths 8,662 were males and 10,439 were females; 4,585 deaths were attributed to debility; 204 children—109 males and 95 females—died in consequence of being prematurely born; 264 children from teething, the sexes being equal—120 of the deaths from teething occurred in the North-Eastern Division; 7 deaths resulted from cyanosis; 16 from spina bifida; and 8 from "other malformations." The deaths resulting from the accidents of child-birth amounted to 602; the average annual number for the ten years 1864-73 was 628. If the deaths from metria registered during the year 1874 (333) be added to the deaths (602) from child-birth, we have a total of 935 of parturient women, or the death of one mother to every 151 of the births registered.

V. Violent Deaths.

Table V.—Showing, by Divisions, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths) *registered* during the Ten Years 1864–73; the Average Annual Number for that period, and the Average Rate per 100,000 of the Estimated Population; with the number *registered* in 1874, and the Rate represented thereby.

Class.		Divisions.								Total, Ireland.
		North-Eastern.	North-Western.	Eastern.	North Midland.	South Midland.	Western.	South-Eastern.	South-Western.

Av. annual No. 1864–73,		443	176	398	164	165	239	203	356	2,144
Number in 1874, . .		458	174	385	139	135	228	184	364	2.067
Rate per 100,000 Inhabitants,	Av. 1864–73,	39·73	32·54	49·75	30·89	35·20	30·52	43·53	43·25	38·78
	1874, . .	41·34	33·85	49·56	28·03	31·25	30·32	41·91	45·66	38·89

The number of deaths registered as having resulted from violence during the year 1874 was 2,067—1,371 males, 696 females—or 38·89 in every 100,000 of the estimated population. The average annual number of deaths from violence during the ten years 1864–73 was 2,144.

Of the violent deaths registered, 1,867 were accidental, 100 were homicidal, 99 were suicidal; 1 execution was registered during the year.

In 270 instances of sudden death the cause was not ascertained.

I am,
Sir,
Your obedient servant,
W. M. BURKE.

To
The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31*st December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown*—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,
Your obedient Servant,
WILLIAM DONNELLY,
Registrar-General.

To the
Registrar of Births, Deaths, and Marriages,
District of ————.

*The Right Honorable Thomas O'Hagan, Attorney-General (now Lord O'Hagan); and James A. Lawson, Esq., Solicitor-General—now a Judge of the Common Pleas.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 75 (*see* page 38), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]
